## ASIS Physical Security Professional Exam Sample Questions (Q67-Q72):

### NEW QUESTION # 67

A new research and development center is being planned. At what point in the project should the security manager become involved?

- A. Completion of the preliminary architectural drawings
- B. Concept presentation to senior management
- C. Equipment specification and bid phase
- D. Initial design phase

**Answer: D**

Explanation:

Security input is most effective when introduced during the initial design phase of a facility. This allows for integration of security considerations into architectural planning, site layout, and system infrastructure before major design decisions are finalized.

A and B are too late in the process.

D (Concept presentation) is usually too early and conceptual for detailed security input.

- D. Invoicing

**Answer: A****NEW QUESTION # 69**

A device that sends a signal about whatever is sensed to some other location is called:

- A. Circuit device
- B. Line device
- C. Wave device
- D. Signal device

**Answer: A****NEW QUESTION # 70**

The moment the fire begins, when fuel, air, and an ignition source all come together at the right rate for the correct period of time is called:

- A. Pyrolysis stage
- B. Free burning
- C. Ignition stage
- D. Incipient stage

**Answer: C**

Explanation:

The ignition stage is the point at which a fire starts. This occurs when fuel, heat, and oxygen are present in the correct combination and for the right duration. It marks the beginning of combustion and transitions the scenario from a fire hazard to an active fire.

Free burning (A) is a later stage where flames are fully developed.

Pyrolysis stage (C) refers to pre-ignition gas release.

Incipient stage (D) can be synonymous with ignition but more commonly refers to the pre-flame development phase.

**NEW QUESTION # 71**

One important element of a "key control policy" is:

- A. Limiting master key access to security personnel

- B. Accounting for all keys on a regular basis
- C. Providing a maximum of 3 replacement keys in the keybox for all lock locations
- D. Ensuring no more than 3 people issue keys

#### Answer: B

Explanation:

Comprehensive Detailed Explanation:

A core element of an effective key control policy is ensuring accountability for all keys. This includes maintaining logs, conducting regular audits, and verifying that issued keys are returned or accounted for. This reduces the risk of unauthorized access and is fundamental in access control strategies.

A and C are arbitrary numeric limits and not standard policy practice.

D may be part of policy but is not as critical as ongoing accountability.
