Pass Leader SC-200 Dumps & SC-200 Valid Test Pass4sure

Our SC-200 free demo provides you with the free renewal in one year so that you can keep track of the latest points happening. As the questions of exams of our SC-200 exam dumps are more or less involved with heated issues and customers who prepare for the exams must haven't enough time to keep trace of exams all day long, our SC-200 Practice Engine can serve as a conducive tool for you make up for those hot points you have ignored. You will be completed ready for your SC-200 exam.

Microsoft Security Operations Analyst Sample Questions (Q239-Q244):

NEW QUESTION # 239

You have a Microsoft 365 subscription. The subscription uses Microsoft 365 Defender and has data loss prevention (DLP) policies that have aggregated alerts configured.

You need to identify the impacted entities in an aggregated alert.

What should you review in the DIP alert management dashboard of the Microsoft Purview compliance portal?

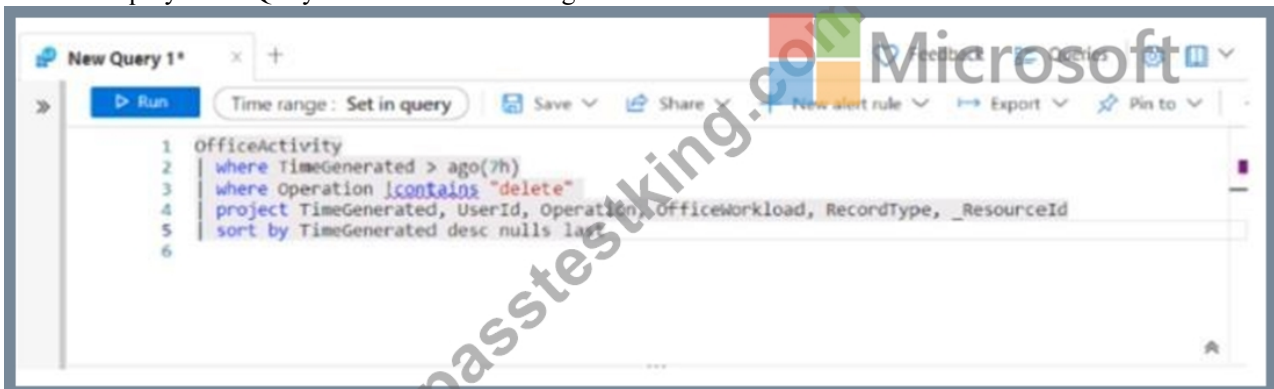

- A. Management log
- B. the Events tab of the alert
- C. the Sensitive Info Types tab of the alert
- D. the Details tab of the alert

Answer: A

NEW QUESTION # 240

You have a Microsoft Sentinel workspace.

You have a query named Query1 as shown in the following exhibit.

You plan to create a custom parser named Parser1. You need to use Query1 in Parser1. What should you do first?

- A. Remove line 5.
- B. In line 4, remove the TimeGenerated predicate.
- C. In line 3, replace the 'contains operator with the !has operator.
- D. Remove line 2.

Answer: D

Explanation:

Explanation

This can be confirmed by referring to the official Microsoft documentation on creating custom log queries in Azure Sentinel, which states that the "has" operator should not be used in the query, and that it is unnecessary.

Reference: <https://docs.microsoft.com/en-us/azure/sentinel/query-custom-logs>

NEW QUESTION # 241

You manage the security posture of an Azure subscription that contains two virtual machines name vm1 and vm2.

The secure score in Azure Security Center is shown in the Security Center exhibit. (Click the Security Center tab.)

Secure Score

66% (~30 of 45 points)

NEW QUESTION # 242

You are informed of a new common vulnerabilities and exposures (CVE) vulnerability that affects your environment.

You need to use the Microsoft Defender portal to request remediation from the team responsible for the affected systems if there is a

documented active exploit available.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

The screenshot shows a Microsoft exam interface. On the left, there is a list of six actions, each preceded by a three-dot icon. On the right, there is an empty 'Answer Area' with a Microsoft logo at the top. The actions are:

- Select **Go to related security recommendations**.
- From Advanced hunting, search for cveId in the DeviceTvmSoftwareInventoryVulnerabilities table.
- Create the remediation request.
- From Device Inventory, search for the CVE.
- From Vulnerability Management, select **Weaknesses**, and search for and select the CVE.
- Open the Threat Protection report.

Answer:

Explanation:

The screenshot shows the same Microsoft exam interface, but now three actions have been moved from the list to the 'Answer Area' on the right. The actions in the 'Answer Area' are:

- From Vulnerability Management, select **Weaknesses**, and search for and select the CVE.
- Select **Go to related security recommendations**.
- Create the remediation request.

- * From Vulnerability Management, select Weaknesses, and search for and select the CVE.
- * Select Go to related security recommendations.
- * Create the remediation request.

NEW QUESTION # 243

You deploy Azure Sentinel.

You need to implement connectors in Azure Sentinel to monitor Microsoft Teams and Linux virtual machines in Azure. The solution must minimize administrative effort.

Which data connector type should you use for each workload? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Microsoft Teams:

Linux virtual machines in Azure:

Custom
Office 365
Security Events
Syslog

Custom
Office 365
Security Events
Syslog

Microsoft

Answer:

Explanation:

Microsoft Teams:

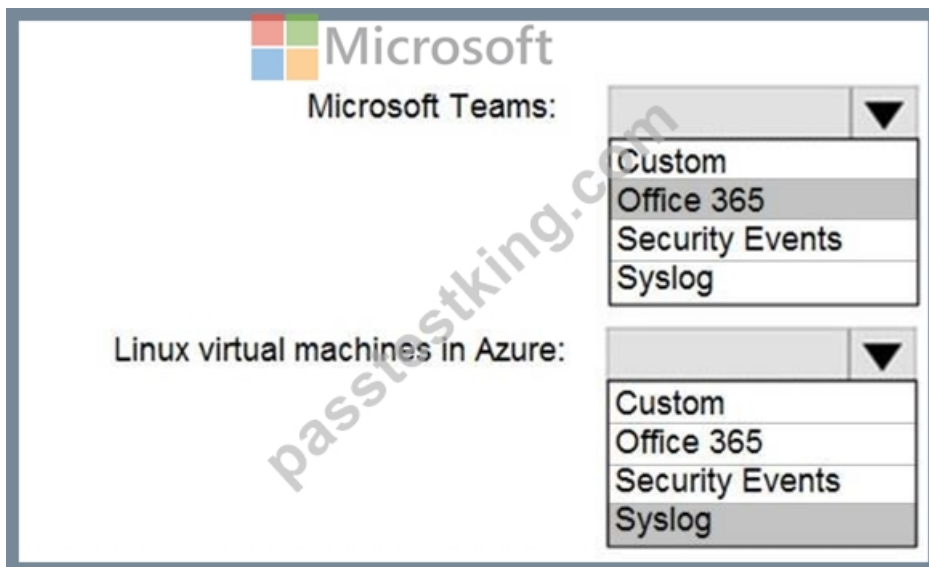

Linux virtual machines in Azure:

Custom
Office 365
Security Events
Syslog

Custom
Office 365
Security Events
Syslog

Microsoft
