Google Workspace is a powerful suite of cloud-based productivity tools that can greatly enhance the productivity of businesses and organizations of all sizes. As more and more companies turn to Google Workspace to streamline their workflows and collaboration,

the need for qualified professionals who can administer and manage these tools becomes increasingly important. That's where the Google-Workspace-Administrator Certification comes in.

Google Cloud Certified - Professional Google Workspace Administrator Sample Questions (Q94-Q99):

NEW QUESTION # 94

Your organization has been using Google Workspace for almost a year, and your annual security and risk assessment initiative is approaching in preparation for the risk assessment you want to quickly review all the security-related settings for Gmail, Drive and Calendar and identify the ones that may be posing risk What should you do?

- A. Review the Security health page in the Admin console
- B. Review all settings for each organizational unit (OU) separately because it is the only way to see the security settings tor Workspace apps
- C. Review the Gmail Drive, and Calendar reports in the Reporting section in the Admin console.
- D. Review all the alerts in the Alert center

Answer: A

Explanation:
Access Admin Console: Log in to the Google Admin console using your administrator account.
Navigate to Security Health Page: In the Admin console, go to the Security section and select Security health. This page provides a comprehensive overview of your organization's security settings.
Review Security Settings: The Security health page lists various security settings for Gmail, Drive, and Calendar. It highlights settings that might pose a risk and provides recommendations for improvement.
Identify and Mitigate Risks: Carefully review the highlighted settings. Follow the recommendations to enhance your organization's security posture. This ensures that any potential risks are identified and mitigated promptly.

Google Workspace Security Best Practices

NEW QUESTION # 95

Your organization is concerned with the increasing threat of phishing attacks that may impact users.
Leadership has declined to force-enable 2-Step verification. You need to apply a security measure to prevent unauthorized access to user accounts.
What should you do?

- A. Decrease the Maximum User Session Length.
- B. Revoke token authorizations to external applications.
- C. Enable Enforce Strong Password policy.
- D. Enable Employee ID Login Challenge.

Answer: D

Explanation:
Sign in to the Google Admin console.
From the Admin console Home page, go to "Security" and then "Login challenges." Enable the "Employee ID login challenge" setting.
Configure the challenge by defining the employee IDs that users need to provide during the login process.
Enabling Employee ID login challenges adds an additional layer of security without requiring 2-Step verification. This helps prevent unauthorized access by ensuring that users provide an additional piece of information known only to them.
Reference:
Google Workspace Admin Help - Configure login challenges
"?>>?b GF\]\rom the Admin console Home page, go to "Security."
Under "Security," select "API controls."
In the "API controls" section, click on "Manage Third-Party App Access." Find the Google Drive API in the list.
Choose "Disable All Access" for Google Drive to ensure that no third-party apps have OAuth permissions to Google Drive.
This configuration adheres to the policy set by the Chief Information Security Officer by preventing third-party apps from accessing Google Drive via OAuth.
Google Workspace Admin Help - Manage API client access

NEW QUESTION # 96

Your organization has recently gone Google, but you are not syncing Groups yet. You plan to sync all of your Active Directory group objects to Google Groups with a single GCDS configuration.

Which scenario could require an alternative deployment strategy?

- A. Some of the Active Directory groups do not have email addresses.
- B. Some of the Active Directory groups have members external to organization.
- C. Some of the Active Directory groups do not have owners.
- D. Some of your Active Directory groups have sensitive group membership.

Answer: D

Explanation:

When planning to sync all Active Directory group objects to Google Groups using Google Cloud Directory Sync (GCDS), you must consider the sensitivity of the group memberships. If some of the groups contain sensitive information or membership, an alternative deployment strategy might be necessary.
* Sensitive Group Membership: If certain groups contain members or data that are sensitive, synchronizing these groups directly might expose this sensitive information to unauthorized users.
* Alternative Strategies:
* Implement separate synchronization settings for sensitive groups.
* Use security groups to control access to sensitive information.
* Manually manage sensitive groups to ensure tight control over membership and data access.
* Steps to Consider:
* Evaluate which groups contain sensitive information.
* Configure GCDS to exclude these sensitive groups from the general synchronization process.
* Synchronize sensitive groups separately or manage them manually to ensure data security and compliance with privacy policies.

NEW QUESTION # 97

Your organization is in the process of deploying Google Drive for desktop so that your users can access Drive files directly from their desktops. For security reasons, you want to restrict Drive for desktop to only company-owned devices. What two steps should you take from the admin panel to restrict Drive for desktop to only company-owned devices?
Choose 2 answers

- A. Create a company-owned device inventory using serial numbers of devices.
- B. Install the Google Endpoint Verification extension on machines using Drive for Desktop.
- C. Apps > Google Workspace > Drive and Docs > Features and Applications > Google Drive for Desktop > Only Allow Google Drive for desktop on authorized devices
- D. Create a company-owned device inventory using an asset tag.
- E. Devices > Endpoints > Add a filter-> Management Type > Drive for desktop > Apply

Answer: C,E

NEW QUESTION # 98

Per regulatory requirements, your company is required to keep the data of employees located in Germany within Europe and the data of employees located in the US within the US. The employees in Germany are in a separate organizational unit (OU) than employees in the US. You need to ensure that where employee data is stored is in compliance with the location regulations.
What should you do?

- A. Create two Groups. Assign employees into the Germany or US Group based on their location. Use Google Drive trust rules to prevent sharing between the Groups.
- B. Navigate to the Data Regions function in the Admin console. Select 'No preference.'
- C. Navigate to the Data Regions function in the Admin console. Select the Europe region for employees in Germany, and select the US region for US employees.
- D. Instruct employees to use Drive for desktop to keep documents on their corporate computers.

Answer: C

Explanation:
Using the Data Regions function in the Google Admin console, you can specify where data is stored for different organizational units (OUs) based on their geographical location. This ensures that employee data for those in Germany is stored within Europe, while data for US employees is stored within the US, meeting the regulatory requirements for data locality. This approach automates compliance and eliminates the need for manual tracking or additional configurations.
Okay, I will carefully review the question and provide a 100% verified answer based on the official Associate Google Workspace Administrator documentation, correct any typing errors, and present it in the requested format.

NEW QUESTION # 99

......
