Salesforce Health Cloud Accredited Professional Sample Questions (Q75-Q80):

NEW QUESTION # 75

In which three ways can users access Provider Management standard objects? (Choose three)

- A. By assigning the Provider Permission set.
- B. By using Health Cloud.
- C. By using Service Cloud
- D. By assigning Health Cloud Platform Permission set licenses.
- E. By assigning Health Cloud Foundation Permission set.

Answer: A,D,E

Explanation:

Explanation

Health Cloud Foundation

Assigns read access to additional Health Cloud platform capabilities, including the Provider Management data model.

The Health Cloud Provider Network Management permission set grants access to provider management objects so users can manage credentialing and recruiting.

To use the Provider Network Management features of Health Cloud, assign both the Provider Network Management permission set and the Health Cloud permission set to your users

- A. CMS risk scores cannot be recalculated in Health Cloud.
- **B. Risk scores are recalculated only for patients that are affiliated with a Care Program**
- C. Risk scores can only be calculated using the CMS recalculation API.
- D. CMS risk scores should be recalculated using only third party APIs.

Answer: B

NEW QUESTION # 79

45 of 60. A payer is looking for a solution to recruit, credential, and onboard providers into its network.

Which Health Cloud add-on should help the payer address these requirements?

- A. Utilization Management
- B. Provider Relationship Management
- **C. Provider Network Management**
- D. Contact Center for Payers

Answer: C

Explanation:

To effectively recruit, credential, and onboard providers into its network, a payer should utilize the Provider Network Management add-on in Salesforce Health Cloud.

Understanding Provider Network Management:

* Purpose: Provider Network Management (PNM) is designed to streamline the processes of recruiting, enrolling, credentialing, and managing healthcare providers within a payer's network. It enhances operational efficiency, ensures compliance, and improves provider satisfaction.

* Key Features:

* Provider Enrollment: Facilitates efficient registration and recruitment of providers, reducing onboarding time and enhancing engagement.

* Credentialing: Supports verification and validation of provider qualifications, ensuring that only qualified professionals join the network.

* Contract Management: Manages various contract types and network models, accommodating diverse provider relationships.

* Network Adequacy: Assists in constructing effective provider networks to meet patient needs and regulatory requirements.

Implementation Steps:

* Acquire the Provider Network Management Add-On:

* Ensure that your Salesforce Health Cloud instance includes the PNM add-on, which is available in Enterprise and Unlimited editions.

* Configure Provider Enrollment Processes:

* Set up workflows for provider recruitment and registration, utilizing PNM's enrollment features to streamline the process.

* Establish Credentialing Protocols:

* Implement credentialing workflows to verify provider qualifications, leveraging PNM's integration capabilities for primary source verification.

* Manage Contracts and Networks:

* Utilize PNM's contract management tools to handle various contract types and maintain an organized provider network.

References:

How Provider Network Management Works: For a comprehensive overview of PNM's functionalities, refer to Salesforce's official documentation: [How Provider Network Management Works](#) Get to Know Provider Network Management: To understand the setup and configuration of PNM, consult:

[Get to Know Provider Network Management](#)

Conclusion:

By implementing the Provider Network Management add-on, payers can effectively recruit, credential, and onboard providers, thereby enhancing network efficiency, ensuring compliance, and improving overall provider satisfaction.

NEW QUESTION # 80

.....
