## Associate-Google-Workspace-Administrator Test Sample

Free demo are available for Associate-Google-Workspace-Administrator study materials for you to have a try before purchasing, which will help you have a deeper understanding of what you are going to buy. You can find the free demo for Associate-Google-Workspace-Administrator exam braindumps in our website. If you are quite satisfied with the free demo, and want the complete version, just add it to the cart and pay for it. You will get the downloading link and password for the Associate-Google-Workspace-Administrator Study Materials within ten minutes, if you don't receive, you can ask for help from our service staff.

### Google Associate Google Workspace Administrator Sample Questions (Q50-Q55):

#### NEW QUESTION # 50

Your company has recently migrated from an on-premises email solution to Google Workspace.

You have successfully added and verified the new primary domain. However, you also want to continue receiving emails sent to your former on-premises email server for a transitional period.

You need to ensure that emails sent to your former domain are still delivered to your on-premises server, even though your primary email system is now Google Workspace. What should you do?

- A. Adjust the TTL (Time-to-Live) for the former domain to ensure a smooth transition.
- B. Add the former domain as a domain alias for the primary domain.
- **C. Configure MX records for the former domain to point to your on-premises email servers.**
- D. Add the former domain as a secondary domain in your Google Workspace settings and verify the domain.

**Answer: C**

Explanation:

To ensure that emails sent to your former domain are still delivered to your on-premises server during a transitional period after migrating your primary email to Google Workspace, you need to configure the MX (Mail Exchanger) records for the former domain to point to your on-premises email servers.

#### NEW QUESTION # 51

You are designing a group structure for your company that will be used to grant access to a specific shared drive. You need this solution to automatically add and remove employees based on their job role. What should you do?

- A. Create a configuration group. Add users on an exception basis. Grant the configuration group access to the shared drive.
- B. Create a distribution list. Add all employees with the desired job role. Grant the distribution list access to the shared drive.
- C. Create a security group. Add all employees with the desired job role. Grant the security group access to the shared drive.
- **D. Create a dynamic group. Set the membership criteria to the desired job role. Grant the dynamic group access to the shared drive.**

**Answer: D**

Explanation:

A dynamic group automatically manages its membership based on user attributes, such as job role. This approach ensures that employees are automatically added or removed from the group based on their role, minimizing manual effort and ensuring that the group always reflects the current team composition. Granting this dynamic group access to the shared drive ensures that the right users have the appropriate permissions without requiring constant manual updates.

#### NEW QUESTION # 52

You work for a multinational organization. Employees in several office buildings are experiencing issues with Google Voice, including dropped calls and poor call quality. You need to quickly determine whether this is a localized issue or a broader Google Voice service disruption. What should you do?

- **A. Check the Google Workspace Status Dashboard for reported service outages or disruptions.**
- B. Use the security investigation tool to search user log events for "Call failed", and analyze packet loss data.
- C. Check the Google Workspace Updates blog for announcements about Google Voice issues.
- D. Verify whether users in the affected buildings have been assigned Google Voice licenses.

**Answer: A**

Explanation:

When multiple users across different office buildings experience issues with a Google Workspace service like Google Voice (dropped calls, poor call quality), the first and most efficient step to determine if it's a widespread service disruption or a localized issue is to check the official Google Workspace Status Dashboard. This dashboard provides real-time and historical information on the status of all Google Workspace services.

Here's why the other options are less effective as the first step:

A . Verify whether users in the affected buildings have been assigned Google Voice licenses. If users are experiencing issues like dropped calls, it implies they have licenses and can generally access the service. A licensing issue would likely prevent them from using Google Voice at all, not just lead to poor quality. This would be a troubleshooting step if the dashboard shows no outage and individual users can't use the service at all.

C . Check the Google Workspace Updates blog for announcements about Google Voice issues. The Updates blog is for new features, policy changes, and sometimes post-mortems of past major incidents, but it's not a real-time status indicator for current outages. The Status Dashboard is designed for this immediate check.

D . Use the security investigation tool to search user log events for "Call failed", and analyze packet loss data. The security investigation tool is excellent for detailed forensic analysis of specific user activities and security events. While it could eventually reveal packet loss or call failure events, it's a time-consuming investigative tool. Before diving into granular logs, you first need to rule out a broader service outage that would affect many users. If the Status Dashboard shows no issues, then using the investigation tool to look at specific user logs is a valid next step for localized troubleshooting.

Reference from Google Workspace Administrator:

Google Workspace Status Dashboard: This is the primary and official source for real-time information on the status of Google Workspace services. It is designed precisely for checking widespread outages or disruptions.

#### NEW QUESTION # 53

Your company provides shared Chromebook workstations for employees to access sensitive company data. You must configure the devices to ensure no sensitive data is stored locally and that browsing data is cleared after each use. What should you do?

- A. Enable the Manage Guest Session functionality, and set the maximum user session length.
- B. Disable offline access for all Workspace apps. Enable incognito mode for Chrome browsing sessions.
- **C. Force ephemeral mode in Chrome. Disable offline access for sensitive Workspace apps like Docs, Sheets, and Drive.**
- D. Force ephemeral mode in Chrome. Allow offline access for all Workspace apps with strict expiration times.

**Answer: C**

Explanation:

Enabling ephemeral mode in Chrome ensures that all browsing data is cleared after each session, and nothing is stored locally on the Chromebook. Disabling offline access for sensitive Workspace apps, such as Docs, Sheets, and Drive, ensures that users cannot download or store sensitive data locally. This combination provides a secure environment, preventing the retention of any sensitive data on the device after use.

#### NEW QUESTION # 54

Your organization's users are reporting that a large volume of legitimate emails are being misidentified as spam in Gmail. You want to troubleshoot this problem while following Google-recommended practices. What should you do?

- A. Adjust the organization's mail content compliance settings in the Admin console.
- **B. Contact Google Workspace support and report a suspected system-wide spam filter malfunction.**
- C. Disable spam filtering for all users.
- D. Advise users to individually allowlist senders.

**Answer: B**

Explanation:

If legitimate emails are being misidentified as spam across the organization, it suggests that there may be a broader issue with the spam filtering system. Contacting Google Workspace support to investigate and resolve the problem is the recommended approach. Disabling spam filtering or adjusting individual settings may not resolve the root cause and could potentially lead to further issues.

## NEW QUESTION # 55

.....

Are really envisioned to attempt to be Associate-Google-Workspace-Administrator certified professional. Then enrolled in our preparation suite and get the perceptively planned actual Dumps in two accessible formats, PDF and preparation software. DumpsKing is the preeminent platform, which offers Associate-Google-Workspace-Administrator Dumps duly equipped by experts. Our Associate-Google-Workspace-Administrator Exam Material is good to pass the exam within a week. DumpsKing is considered as the top preparation material seller for Associate-Google-Workspace-Administrator exam dumps, and inevitable to carry you the finest knowledge on Associate-Google-Workspace-Administrator exam certification syllabus contents.
