NEW QUESTION # 97

A product administrator needs to use the Constraint Modeling Language (CML) construct available in Advanced Configurator to define a relationship for a House with up to five rooms. The relationship also requires that a MediaRoom in the color blue must be included when the house has more than three rooms.

Which option should the administrator use to accomplish this?

- A. type House {
 relation rooms : Room(4,5J;
 require(rooms.size > 3, rooms!MediaRoom](color = "Blue"))
 }
- B. type House {
 relation rooms: Room[0..5];
 require(rooms.size > 3, House(MediaRoom-true, color "Blue"))
 };
- C. type House {
 relation rooms: Room[0..5];
 require(rooms.size > 3, rooms!MediaRoom](color = "Blue"))
 }

Answer: C

NEW QUESTION # 98

What are three reasons why you would need an AppExchange Solution to support generating a Document in support of a Revenue Cloud Project?

- A. Electronic Signature
- B. Attachments
- C. Watermarks
- D. Contract Redlining
- E. Invoice Generation

Answer: A,C,D

NEW QUESTION # 99

Some of the users at universal containers have faced long processing times during quote document generation. What can be done to reduce the processing times for document generation?

- A. increase the number of product of product rules and option constraints
- B. reducing the number of quote line fields displayed in the quote line editor
- C. using compressed image formats for image files included in the quote document
- D. reducing the number of line columns that are included in the quote document
- E. Reducing the number of product rules and option constraints

Answer: C

Explanation:

Reducing processing times during quote document generation in Salesforce CPQ can be achieved through various optimizations. One effective method is using compressed image formats for image files included in the quote document. This reduces the file size of the images, leading to faster loading and processing times when generating quote documents. While the specific reference to this practice is not directly available in the provided Salesforce Revenue Cloud documents, it is a widely recognized optimization technique in document generation processes to enhance performance and reduce loading times.

NEW QUESTION # 100

Which three customer teams should be invited to participate in scoping a Revenue Cloud project?

- A. Accounting and Finance
- B. Human Resources
- C. Customer Service

- D. Information Technology
- E. Sales Operations

Answer: A,D,E

Explanation:

Scoping a Revenue Cloud project involves understanding the business needs, defining the project goals, and planning the implementation strategy¹². The teams that should be involved in this process are those that have a direct stake in the project's outcome and can provide valuable input into the project's requirements¹². These teams typically include:

Accounting and Finance: This team can provide insights into the financial processes that the Revenue Cloud project will support, such as billing, revenue recognition, and financial reporting¹².

Sales Operations: This team can provide insights into the sales processes that the Revenue Cloud project will support, such as quote-to-cash, contract management, and sales forecasting¹².

Information Technology: This team can provide technical expertise and support for the implementation of the Revenue Cloud project, including system integration, data migration, and IT infrastructure¹². Reference: 12
