In line with the concept that providing the best service to the clients, our company has forged a dedicated service team and a mature and considerate service system. We not only provide the free trials before the clients purchase our FCP\_FGT\_AD-7.6 study materials but also the consultation service after the sale. We provide multiple functions to help the clients get a systematical and targeted learning of our FCP\_FGT\_AD-7.6 Study Materials. So the clients can trust our FCP\_FGT\_AD-7.6 study materials without doubt.

## Fortinet FCP\_FGT\_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Routing: This section of the exam measures the skills of firewall administrators and covers the configuration of routing features on FortiGate devices. It includes defining and applying static routes for directing traffic within and outside the network, as well as setting up Software-Defined WAN (SD-WAN) to distribute and balance traffic loads across multiple WAN connections efficiently.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Deployment and system configuration: This section of the exam measures the skills of network security engineers and covers essential tasks for setting up a FortiGate device in a production environment. Candidates are expected to perform the initial configuration, establish basic connectivity, and integrate the device within the Fortinet Security Fabric. They must also be able to configure a FortiGate Cluster Protocol (FGCP) high availability setup and troubleshoot resource and connectivity issues to ensure system readiness and network uptime.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Firewall policies and authentication: This section of the exam measures the skills of firewall administrators and covers the implementation and management of security policies. It involves configuring basic and advanced firewall rules, applying Source NAT (SNAT) and Destination NAT (DNAT) options, and enforcing various firewall authentication methods. The section also includes deploying and configuring Fortinet Single Sign-On (FSSO) to streamline user access across the network.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• VPN: This section of the exam measures the skills of network security engineers and covers the configuration and deployment of Virtual Private Network (VPN) solutions. Candidates are required to implement SSL VPNs to grant secure remote access to internal resources and configure IPsec VPNs in either meshed or partially redundant topologies to ensure encrypted communication between distributed network locations.</li></ul>

Topic 5	<ul style="list-style-type: none"> <li>• Content inspection: This section of the exam measures the skills of network security engineers and covers the setup and management of content inspection features on FortiGate. Candidates must demonstrate an understanding of encrypted traffic inspection using digital certificates, identify and apply FortiGate inspection modes, and configure web filtering policies. The ability to implement application control for monitoring and regulating network application usage, configure antivirus profiles to detect and block malware, and set up Intrusion Prevention Systems (IPS) to shield the network from threats and vulnerabilities is also assessed.</li> </ul>

## New FCP\_FGT\_AD-7.6 Exam Price, Latest FCP\_FGT\_AD-7.6 Training

The clients at home and abroad strive to buy our FCP\_FGT\_AD-7.6 study materials because they think our products are the best study materials which are designed for preparing the test Fortinet certification. They trust our FCP\_FGT\_AD-7.6 study materials deeply not only because the high quality and passing rate of our FCP\_FGT\_AD-7.6 study materials but also because our considerate service system. They treat our FCP\_FGT\_AD-7.6 Study Materials as the magic weapon to get the Fortinet certificate and the meritorious statesman to increase their wages and be promoted. You may be not quite familiar with our FCP\_FGT\_AD-7.6 study materials and we provide the detailed explanation of our FCP\_FGT\_AD-7.6 study materials as follow for you have an understanding before you decide to buy.

## Fortinet FCP - FortiGate 7.6 Administrator Sample Questions (Q31-Q36):

### NEW QUESTION # 31

An administrator wanted to configure an IPS sensor to block traffic that triggers a signature set number of times during a specific time period.

How can the administrator achieve the objective?

- A. Use IPS filter, rate-mode periodical option.
- B. Use IPS packet logging option with periodical filter option.
- C. Use IPS filter, rate-mode periodical option.
- D. Use IPS group signatures, set rate-mode 60.

**Answer: A**

Explanation:

The IPS filter with the rate-mode set to "periodical" allows the administrator to block traffic that triggers a signature a specified number of times within a defined time period, meeting the requirement.

### NEW QUESTION # 32

You are encountering connectivity problems caused by intermediate devices blocking IPsec traffic.

In which two ways can you effectively resolve the problem? (Choose two.)

- A. You should use the protocol IKEv2.
- B. You can use SSL VPN tunnel mode to prevent problems with blocked ESP and UDP ports (500 or 4500).
- C. You can turn on fragmentation to fix large certificate negotiation problems.
- D. You can configure a hub-and-spoke topology with SSL VPN tunnels to bypass blocked UDP ports.

**Answer: B,D**

Explanation:

The training is basically trying to point out the advantage of FortiGate's SSL VPN over IPsec VPN in situation where issues are caused by an intermediate device.

IPsec uses ESP and UDP 500 and 4500, so where these are blocked, SSL VPN tunnel mode shines because it uses HTTPS (443) and TLS by default (both TCP).

Again where UDP ports are blocked, SSL VPN shines (Tunnel mode Hub and Spoke) because it does not use UDP.

## NEW QUESTION # 33

Refer to the exhibits.

### Antivirus profile

#### Edit AntiVirus Profile

Name

Comments  0/255

AntiVirus scan ☒ **Block** **Monitor**

Feature set **Flow-based** **Proxy-based**

Inspected Protocols

HTTP	<input checked="" type="checkbox"/>
SMTP	<input type="checkbox"/>
POP3	<input type="checkbox"/>
IMAP	<input type="checkbox"/>
FTP	<input checked="" type="checkbox"/>
CIFS	<input type="checkbox"/>
MAPI	<input checked="" type="checkbox"/>
SSH	<input checked="" type="checkbox"/>

### Firewall policy

#### Edit Policy

Incoming interface

Outgoing interface

Source & Destination

Source

User/group

Destination

Service ☒ DNS ☒ HTTP ☒ HTTPS

## HTTPS access

You are asked to implement an antivirus profile for files downloaded through FTP, HTTP, and HTTPS. While testing, you are successful with HTTP and FTP protocols, but FortiGate does not block the file download over HTTPS. What could be the cause?

- A. The action on the firewall policy is not set to deny.
- B. Web filter is not enabled on the firewall policy to complement the antivirus profile.
- C. The feature set in the antivirus profile is not set to Flow-based.
- D. The SSL inspection mode in the firewall policy is not deep content inspection.

**Answer: D**

Explanation:

The SSL inspection mode in the firewall policy is set to certificate-inspection, which only examines SSL certificates without

decrypting HTTPS traffic. Because of this, FortiGate cannot inspect or block files downloaded over HTTPS, as the content remains encrypted. To enable antivirus scanning on HTTPS traffic, the SSL inspection mode must be set to deep-inspection, allowing the FortiGate to decrypt, inspect, and re-encrypt the traffic.

#### NEW QUESTION # 34

Refer to the exhibits. An administrator wants to add HQ-ISFW-2 in the Security Fabric. HQ-ISFW-2 is in the same subnet as HQ-ISFW. After configuring the Security Fabric settings on HQ-ISFW-2, the status stays Pending.

**Security Fabric logical topology view**

Interface	port6	port4
Link	10 Gbps Full Duplex	10 Gbps Full Duplex
Port Speed	Auto-Negotiation	Auto-Negotiation
Type	Physical Interface	Physical Interface
IPv4 Addresses	10.0.13.254/24	10.0.11.254/24

**Security Fabric settings on HQ-ISFW-2**

Security Fabric Settings

Security Fabric role: Standalone | Serve as Fabric Root | **Join Existing Fabric**

Allow other Security Fabric devices to join: ☒ port6

Upstream FortiGate IP/FQDN: 10.0.13.254

Allow downstream device REST API access: ☒

Management IP/FQDN: Use WAN IP | Specify | 10.0.11.250

Management port: Use Admin Port | Specify | 443

SAML SSO Settings

SAML Single Sign-On: **Auto** | Manual

Advanced Options

Mode: Pending

What can be the two possible reasons? (Choose two.)

- A. Management IP must be set to 10.0.13.254.
- B. SAML Single Sign-On must be set to Manual.
- C. HQ-ISFW-2 must be authorized on HQ-ISFW.
- D. Upstream FortiGate IP must be set to 10.0.11.254.

Answer: C,D

Explanation:

The Upstream FortiGate IP should match the IP address of the Fabric Root interface, which is 10.0.11.254, not 10.0.13.254.

The new device (HQ-ISFW-2) must be authorized on the Fabric Root (HQ-ISFW) before it can join the Security Fabric, otherwise the status remains pending.

### NEW QUESTION # 35

An administrator notices that some users are unable to establish SSL VPN connections, while others can connect without any issues. What should the administrator check first?

- A. Ensure that the affected users are using the correct port number.
- B. Ensure that forced tunneling is enabled to reroute all traffic through the SSL VPN
- C. Ensure that the HTTPS service is enabled on SSL VPN tunnel interface
- D. Ensure that user traffic is hitting the firewall policy.

**Answer: A**

Explanation:

The key part of the question is some users can connect and some cannot, which strongly suggests a client-side connection issue rather than a firewall-policy issue (policy only applies after the tunnel is established).

For SSL-VPN, the first thing to check when users fail to connect is whether they are using the correct connection settings (especially the port).

### NEW QUESTION # 36

.....

Customers of ExamsLabs will also receive updates for 1 year after purchase. A lot of students have prepared from the for the FCP - FortiGate 7.6 Administrator (FCP\_FGT\_AD-7.6) certification test and passed it in a single try. They have rated the FCP - FortiGate 7.6 Administrator (FCP\_FGT\_AD-7.6) as one of the best in the market to prepare for the FCP\_FGT\_AD-7.6 exam in minimum time. Try a free demo now and start your journey towards your dream certification!
