

Pass Guaranteed AZ-104 - Newest Microsoft Azure Administrator Interactive Testing Engine

P.S. Free & New AZ-104 dumps are available on Google Drive shared by TestsDumps: <https://drive.google.com/open?id=1orwmYZaEu8WkfVzKoulYMWK4VygMTDUF>

TestsDumps field is leaping up day by day and more people are pursuing it as a career than ever. Due to these reasons, candidates find it difficult to land their dream job and often face difficulty in finding the right career opportunities. But to overcome this issue, the AZ-104 Exam is introduced by Microsoft that provides candidates with a sustainable platform to examine their true capabilities and surf through their desired opportunities.

Microsoft AZ-104 exam is an essential certification for IT professionals who want to demonstrate their expertise in Azure administration. AZ-104 exam validates the knowledge and skills required to manage Azure resources effectively, and it is an excellent way to showcase your expertise in cloud computing.

Intended Target Audience for Microsoft AZ-104 Exam

The Microsoft AZ-104 exam is designed for those Azure enthusiasts who want to work with the platform. It is advisable for anyone going for this certification test to have at least 6 months of experience with the Microsoft Azure platform. The individuals should also have a good understanding of all the Azure concepts and workloads as well as have knowledge pertaining to Cloud infrastructure, operating systems, networking, storage structures, and virtualization. Other than that, you should be well-versed with ARM templates, PowerShell, Azure Portal, and Command Line Interface. If you don't fulfill these criteria, you might not be able to get the required score in the AZ-104 Exam.

Microsoft AZ-104 (Microsoft Azure Administrator) Exam is a certification exam designed for IT professionals who want to prove their expertise in managing Azure resources. AZ-104 exam is intended to test the candidate's knowledge in various Azure services such as Azure networking, Azure compute, Azure storage, and more. AZ-104 exam is a great way for IT professionals to validate their skills in managing Azure resources and enhance their career prospects.

Valid AZ-104 Test Cram | AZ-104 Reliable Test Vce

The exam time is coming, while you are not prepared well for AZ-104 real test. Please do not be tense and worried, you can pass your AZ-104 actual exam very simply and easily with TestsDumps AZ-104 free pdf dumps. With the help of Microsoft AZ-104 free pdf practice, you can not only get high score in your actual test, but also can get more technology knowledge and be more professional.

Microsoft Azure Administrator Sample Questions (Q256-Q261):

NEW QUESTION # 256

You have an Azure subscription that contains the resources shown in the following table:

Name	Type	Resource group	Tag
RG6	Resource group	Not applicable	None
VNET1	Virtual network	RG6	Department: D1

You assign a policy to RG6 as shown in the following table:

Section	Setting	Value
Scope	Scope	Subscription1/RG6
	Exclusions	None
Basics	Policy definition	Apply tag and its default value
	Assignment name	Apply tag and its default value
Parameters	Tag name	Label
	Tag value	Value1

To RG6, you apply the tag: RGroup: RG6.

You deploy a virtual network named VNET2 to RG6.

Which tags apply to VNET1 and VNET2? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

VNET1:	<div><div></div><div>Microsoft</div></div> <div><div>None</div><div>Department: D1 only</div><div>Department: D1, and RGroup: RG6 only</div><div>Department: D1, and Label: Value1 only</div><div>Department: D1, RGroup: RG6, and Label: Value1</div></div>
VNET2:	<div><div></div><div>Microsoft</div></div> <div><div>None</div><div>RGroup: RG6 only</div><div>Label: Value1 only</div><div>RGroup: RG6, and Label: Value1</div></div>

Answer:

Explanation:

VNET1:

Microsoft

None

Department: D1 only

Department: D1, and RGroup: RG6 only

Department: D1, and Label: Value1 only

Department: D1, RGroup: RG6, and Label: Value1

VNET2:

None

RGroup: RG6 only

Label: Value1 only

RGroup: RG6, and Label: Value1

Explanation:

Answer Area Microsoft

VNET1: Department: D1, and Label: Value1 only

VNET2: Label: Value1 only

NEW QUESTION # 257

Your company has offices in New York and Los Angeles.

You have an Azure subscription that contains an Azure virtual network named VNet1. Each office has a site-to-site VPN connection to VNet1.

Each network uses the address spaces shown in the following table.

Location	IP address space
VNet1	192.168.0.0/20
New York	10.0.0.0/16
Los Angeles	10.10.0.0/16

You need to ensure that all Internet-bound traffic from VNet1 is routed through the New York office.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

In Azure, run:

Microsoft

New-AzureRmLocalNetworkGateway

New-AzureRmVirtualNetworkGatewayConnection

Set-AzureRmVirtualNetworkGatewayDefaultSite

On a VPN device in the New York office, set the traffic selectors to:

0.0.0.0/0

10.0.0.0/16

192.168.0.0/20

Answer:

Explanation:

In Azure, run:

```
New-AzureRmLocalNetworkGateway
New-AzureRmVirtualNetworkGatewayConnection
Set-AzureRmVirtualNetworkGatewayDefaultSite
```

On a VPN device in the New York office, set the traffic selectors to:

```
0.0.0.0/0
10.0.0.0/16
192.168.0.0/20
```

NEW QUESTION # 258

You implement the planned changes for NSG1 and NSG2.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
From VM1, you can establish a Remote Desktop session to VM2.	<input type="radio"/>	<input type="radio"/>
From VM2, you can ping VM3.	<input type="radio"/>	<input type="radio"/>
From VM2, you can establish a Remote Desktop session to VM3.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Answer Area

Statements	Yes	No
From VM1, you can establish a Remote Desktop session to VM2.	<input checked="" type="radio"/>	<input type="radio"/>
From VM2, you can ping VM3.	<input type="radio"/>	<input checked="" type="radio"/>
From VM2, you can establish a Remote Desktop session to VM3.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION # 259

You need to prepare the environment to meet the authentication requirements.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE Each correct selection is worth one point.

- A. an Azure Storage account and an access policy
- B. an Azure Key Vault and an access policy
- C. a Recovery Services vault and a backup policy
- D. Azure Active Directory (AD) Identity Protection and an Azure policy

Answer: A,C

Explanation:

Explanation

D: Seamless SSO works with any method of cloud authentication - Password Hash Synchronization or Pass-through Authentication, and can be enabled via Azure AD Connect.

B: You can gradually roll out Seamless SSO to your users. You start by adding the following Azure AD URL to all or selected users' Intranet zone settings by using Group Policy in Active Directory:

<https://autologon.microsoftazuread-ssocomb>

Topic 3, Contoso Ltd

Overview

Contoso, Ltd. is a manufacturing company that has offices worldwide. Contoso works with partner organizations to bring products to market.

Contoso products are manufactured by using blueprint files that the company authors and maintains.

Existing Environment

Currently, Contoso uses multiple types of servers for business operations, including the following:

- * File servers
- * Domain controllers
- * Microsoft SQL Server servers

Your network contains an Active Directory forest named contoso.com. All servers and client computers are joined to Active Directory.

You have a public-facing application named App1. App1 is comprised of the following three tiers:

- * A SQL database
- * A web front end
- * A processing middle tier

Each tier is comprised of five virtual machines. Users access the web front end by using HTTPS only.

Requirements

Planned Changes

Contoso plans to implement the following changes to the infrastructure:

Move all the tiers of App1 to Azure.

Move the existing product blueprint files to Azure Blob storage.

Create a hybrid directory to support an upcoming Microsoft Office 365 migration project.

Technical Requirements

Contoso must meet the following technical requirements:

- * Move all the virtual machines for App1 to Azure.
- * Minimize the number of open ports between the App1 tiers.
- * Ensure that all the virtual machines for App1 are protected by backups.
- * Copy the blueprint files to Azure over the Internet.
- * Ensure that the blueprint files are stored in the archive storage tier.
- * Ensure that partner access to the blueprint files is secured and temporary.
- * Prevent user passwords or hashes of passwords from being stored in Azure.
- * Use unmanaged standard storage for the hard disks of the virtual machines.
- * Ensure that when users join devices to Azure Active Directory (Azure AD), the users use a mobile phone to verify their identity.

Minimize administrative effort whenever possible.

User Requirements

Contoso identifies the following requirements for users:

- * Ensure that only users who are part of a group named Pilot can join devices to Azure AD.
- * Designate a new user named Admin1 as the service administrator of the Azure subscription.
- * Admin1 must receive email alerts regarding service outages.
- * Ensure that a new user named User3 can create network objects for the Azure subscription.

NEW QUESTION # 260

Case Study 4 - ADatum

Overview

ADatum Corporation is a financial company that has two main offices in New York and Los Angeles. ADatum has a subsidiary named Fabrikam, Inc. that shares the Los Angeles office.

ADatum is conducting an initial deployment of Azure services to host new line-of-business applications and is preparing to migrate its existing on-premises workloads to Azure.

ADatum uses Microsoft Exchange Online for email.

Existing Environment

On-Premises Environment

The on-premises workloads run on virtual machines hosted in a VMware vSphere 6 infrastructure. All the virtual machines are members of an Active Directory forest named adatum.com and run Windows Server 2016.

The New York office uses an IP address space of 10.0.0.0/16. The Los Angeles office uses an IP address space of 10.10.0.0/16.

The offices connect by using a VPN provided by an ISP. Each office has one Azure ExpressRoute circuit that provides access to

Azure services and Microsoft Online Services.

Routing is implemented by using Microsoft peering.

The New York office has a virtual machine named VM1 that has the vSphere console installed.

Azure Environment

You provision the Azure infrastructure by using the Azure portal. The infrastructure contains the resources shown in the following table.

Name	Type	Azure region
ASRV1	Azure Site Recovery vault	East US
ASRV2	Azure Site Recovery vault	West US
ASE1	Azure App Service Environment	East US
AG1	Azure Application Gateway (internal)	East US
AG2	Azure Application Gateway (Internet-facing)	West US
ER1	ExpressRoute circuit	East US
ER2	ExpressRoute circuit	West US

AG1 has two backend pools named Pool1 and Pool2. AG2 has two backend pools named Pool21 and Pool22.

Requirements

Planned Changes

ADatum plans to migrate the virtual machines from the New York office to the East US Azure region by using Azure Site Recovery.

Infrastructure Requirements

ADatum identifies the following infrastructure requirements:

A new web app named App1 that will access third-parties for credit card processing must be deployed.

A newly developed API must be implemented as an Azure function named App2. App2 will use a blob storage trigger. App2 must process new blobs immediately.

The Azure infrastructure and the on-premises infrastructure must be prepared for the migration of the VMware virtual machines to Azure.

The sizes of the Azure virtual machines that will be used to migrate the on-premises workloads must be identified.

All migrated and newly deployed Azure virtual machines must be joined to the adatum.com domain.

AG1 must load balance incoming traffic in the following manner:

- http://corporate.adatum.com/video/* will be load balanced across Pool1.
- http://corporate.adatum.com/images/* will be load balanced across Pool2.

AG2 must load balance incoming traffic in the following manner:

- http://www.adatum.com will be load balanced across Pool21.
- http://fabrikam.com will be load balanced across Pool22.

ER1 must route traffic between the New York office and platform as a service (PaaS) services in the East US Azure region, as long as ER1 is available.

ER1 must route traffic between the Los Angeles office and the PaaS services in the West US region, as long as ER2 is available.

ER1 and ER2 must be configured to fail over automatically.

Application Requirements

App2 must be available to connect directly to the private IP addresses of the Azure virtual machines. App2 will be deployed directly to an Azure virtual network.

Inbound and outbound communications to App1 must be controlled by using NSGs.

Pricing Requirements

ADatum identifies the following pricing requirements:

The cost of App1 and App2 must be minimized

The transactional charges of Azure Storage accounts must be minimized

Hotspot Question

You need to implement App2 to meet the application requirements.

What should you include in the implementation? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area Microsoft

App Service plan pricing tier:

▼
Isolated
Shared
Standard

Enabled feature:

▼
Always on
Auto Swap
Web Sockets

Answer:

Explanation:

Answer Area

App Service plan pricing tier:

▼
Isolated
Shared
Standard

Enabled feature:

▼
Always on
Auto Swap
Web Sockets

Explanation:

A newly developed API must be implemented as an Azure function named App2.

App2 will use a blob storage trigger. App2 must process new blobs immediately.

This requires "Always On".

The cost of App1 and App2 must be minimized

The Standard pricing tier is the cheapest tier that supports Always On.

NEW QUESTION # 261

.....

Our company is a multinational company which is famous for the AZ-104 training materials in the international market. After nearly ten years' efforts, now our company have become the topnotch one in the field, therefore, if you want to pass the AZ-104 exam as well as getting the related certification at a great ease, I strongly believe that the study materials compiled by our company is your solid choice. To be the best global supplier of electronic study materials for our customers through innovation and enhancement of our customers' satisfaction has always been our common pursuit. The advantages of our AZ-104 Study Guide are as follows.
