Chapter1: Review of Python- Fundamental of Python (Programming questions)

- Q1: Write a program to convert the time inputted in minutes into hours and remaining minutes.
- Q2: Write a program to that accept radius of a circle and print its area.
- Q3: Python program that accepts marks in 5 subject and output average marks.
- Q4: Python program to get area of triangle.
- Q5: Program to input a number and print its five multiples.
- Q6: Write a program to read details like name, class, age of a student and then print the details, firstly in the same line and then in separate line.
- Q7: Write a program to read three numbers in three variables and swap first two variable with the sums of first and second, second and third numbers, respectively.
- Q8: Write a program that takes amount-in-dollars and dollar-to-rupees conversion price; it then returns the amount converted to rupees.
- Q9: Write python expressions to represent the following situations:
- 1) Add remainder of 8/3 to the product of 8 and 3.
 - 2) Find the square root of the sum of 8 and 43.
 - 3) Find the sum of the square roots of 8 and 43.
 - 4) Find the integral part of the quotient when 100 is divided by 32.

What's more, part of that ExamsLabs Foundations-of-Programming-Python dumps now are free: <https://drive.google.com/open?id=1X8d71obVR0g5gWamcpCnD7NwoYWnOPd9>

As is known to us, our company is professional brand established for compiling the Foundations-of-Programming-Python exam materials for all candidates. The Foundations-of-Programming-Python guide files from our company are designed by a lot of experts and professors of our company in the field. We can promise that the Foundations-of-Programming-Python certification preparation materials of our company have the absolute authority in the study materials market. We believe that the study materials designed by our company will be the most suitable choice for you. You can totally depend on the Foundations-of-Programming-Python Guide files of our company when you are preparing for the exam.

Are you still worrying about how to safely pass WGU certification Foundations-of-Programming-Python exams? Do you have thought to select a specific training? Choosing a good training can effectively help you quickly consolidate a lot of IT knowledge, so you can be well ready for WGU certification Foundations-of-Programming-Python exam. ExamsLabs's expert team used their experience and knowledge unremitting efforts to do research of the previous years exam, and finally have developed the best pertinence training program about WGU Certification Foundations-of-Programming-Python Exam. Our training program can effectively help you have a good preparation for WGU certification Foundations-of-Programming-Python exam. ExamsLabs's training program will be your best choice.

Updated Foundations-of-Programming-Python Real Dumps for Real Exam

The first goal of our company is to help all people to pass the Foundations-of-Programming-Python exam and get the related certification in the shortest time. Through years of concentrated efforts of our excellent experts and professors, our company has compiled the best helpful and useful Foundations-of-Programming-Python test training materials to meet all people's demands, and in addition, we can assure to everyone that our study materials have a higher quality than other study materials in the global market, at the same time, these people will be easier to be admitted to the human resources supervisor. The Foundations-of-Programming-Python learn prep from our company has helped thousands of people to pass the exam and get the related certification, and then these people have enjoyed a better job and a better life. It has been generally accepted that the Foundations-of-Programming-Python study questions are of significance for a lot of people to pass the exam and get the related certification.

WGU Foundations of Programming (Python) - E010 JIV1 Sample Questions (Q53-Q58):

NEW QUESTION # 53

Which components are required in every Python while loop?

- A. A counter and a break statement
- B. A variable and a return statement
- C. An iterator and a list
- **D. A condition and an indented code block**

Answer: D

Explanation:

A Python while loop needs a condition and an indented code block.

Example:

```
count = 1
while count <= 3:
    print(count)
    count += 1
```

The condition is `count <= 3`. The indented block contains the code that runs while the condition is true.

Python's compound statement documentation includes while as a control-flow statement.

Therefore, the correct answer is A. A condition and an indented code block.

NEW QUESTION # 54

Which Python data structure contains only unique elements and does not support indexing?

- A. List
- **B. Set**
- C. Tuple
- D. Dictionary

Answer: B

Explanation:

A set is a Python data structure that stores only unique elements. This means duplicate values are automatically removed.

Example:

```
numbers = {1, 2, 2, 3}
print(numbers)
```

Output:

```
{1, 2, 3}
```

The duplicate value 2 appears only once in the set.

Sets are also unordered, so they do not support indexing like lists or tuples do. For example, `numbers[0]` would cause an error because sets are not accessed by position.

The official Python documentation describes sets as unordered collections with no duplicate elements.

Therefore, the correct answer is D. Set.

NEW QUESTION # 55

Which for loop correctly iterates through a list of student names?

- A. for name from [' Alice ', ' Bob ', ' Carol ']:
- B. for name with [' Alice ', ' Bob ', ' Carol ']:
- C. for name in [' Alice ', ' Bob ', ' Carol ']:
- D. for name = [' Alice ', ' Bob ', ' Carol ']

Answer: C

Explanation:

The correct Python for loop syntax uses the keyword in.

Correct code:

```
for name in [ ' Alice ', ' Bob ', ' Carol ' ]:
```

```
print(name)
```

This loop processes each name in the list one at a time. Python's documentation explains that a for statement iterates over the items of a sequence or iterable.

Therefore, the correct answer is A. for name in [' Alice ', ' Bob ', ' Carol ']:

NEW QUESTION # 56

Which Python data structure cannot be modified after creation?

- A. Set
- B. List
- C. Dictionary
- D. Tuple

Answer: D

Explanation:

A tuple is immutable, which means it cannot be changed after it is created.

Example:

```
coordinates = (10, 20)
```

After this tuple is created, its elements cannot be modified directly. Python's data model documentation explains that tuples are immutable, while lists and dictionaries are mutable.

Therefore, the correct answer is C. Tuple.

NEW QUESTION # 57

Which type of loop is designed for iterating a specific number of times?

- A. Infinite loop
- B. while loop
- C. for loop
- D. do-while loop

Answer: C

Explanation:

A for loop is commonly used when a program needs to repeat code for each item in a sequence or for a specific number of times using range().

Example:

```
for number in range(5):
```

```
print(number)
```

This loop runs 5 times. Python's documentation explains that the for statement iterates over items of a sequence or iterable.

Therefore, the correct answer is B. for loop.

NEW QUESTION # 58

.....

Are you planning to pass the Foundations-of-Programming-Python exam and don't know where to start preparation? Many candidates don't find a credible and lose money and time. If you want to save your resources, you are at right place because WGU Foundations-of-Programming-Python offers real exam questions for the students so that they can prepare and pass WGU Foundations-of-Programming-Python.

Foundations-of-Programming-Python Well Prep: <https://www.examslabs.com/WGU/Courses-and-Certificates/best-Foundations-of-Programming-Python-exam-dumps.html>

WGU Foundations-of-Programming-Python Real Dumps The principle of our company is "To live by quality and to develop with creation." we have the lofty ambitions to be the pioneer in this field and will keep innovating constantly, All our behaviors are aiming squarely at improving your chance of success on the Foundations-of-Programming-Python exam and we have the strength to give you success guarantee, WGU Foundations-of-Programming-Python Real Dumps After you use it, you will have a more profound experience.

LaTeX as a document repository for the Internet, Foundations-of-Programming-Python Well Prep She is also chair of the Center for Women's Business Research, The principle of our company is "To live by quality and to develop with creation." Foundations-of-Programming-Python we have the lofty ambitions to be the pioneer in this field and will keep innovating constantly.

Pass Guaranteed Quiz 2026 Foundations-of-Programming-Python: Foundations of Programming (Python) - E010 JIV1 – Professional Real Dumps

All our behaviors are aiming squarely at improving your chance of success on the Foundations-of-Programming-Python exam and we have the strength to give you success guarantee, After you use it, you will have a more profound experience.

With real Foundations-of-Programming-Python PDF Questions of ExamsLabs you can simply prepare for your Foundations-of-Programming-Python exam from home, the office, or your place of work, If you decide to buy the Foundations-of-Programming-Python study materials from our company, we will have special people to advise and support you.
