The best Pass Products NEA-BC Actual Exam Dumps Questions: ANCC - Nurse Executive Advanced Certification (NEA-BC) - PassCollection

The NEA-BC pdf dumps file is the most efficient and time-saving method of preparing for the Nursing NEA-BC exam. Nursing NEA-BC dumps pdf can be used at any time or place. You can use your pc, tablet, smartphone, or any other device to get NEA-BC PDF Question files. And price is affordable.

Nursing ANCC - Nurse Executive Advanced Certification (NEA-BC) Sample Questions (Q255-Q260):

NEW QUESTION # 255

The entity who works with the nurses in formalizing collective bargaining through unionization is called what?

- A. Supervisor.
- B. Strike leader.
- C. National Labor Relations Board.
- D. Collective bargaining agent.

Answer: D

Explanation:

A collective bargaining agent is a designated representative, often a union, chosen by employees to act as the intermediary in negotiations with the management of an organization. This entity is crucial in negotiating the terms of employment, which include wages, work hours, benefits, workplace safety, and other employment conditions. The process they engage in is known as collective bargaining.

In the context of the nursing profession, nurses may join or form unions that serve as their collective bargaining agents. These unions work on behalf of the nurses to negotiate with hospital administrations and other healthcare facilities to secure favorable terms of employment. The role of these agents is particularly critical in healthcare, as they ensure that the working conditions allow nurses to provide the best possible care to patients while also safeguarding the nurses' rights and well-being.

It is important to distinguish a collective bargaining agent from other roles such as supervisors or strike leaders. A supervisor typically manages staff and operations on a day-to-day basis within the workplace but does not negotiate employment terms. A strike leader, on the other hand, may emerge during labor disputes to lead and organize a strike but is not involved in the ongoing negotiation of employment terms like a collective bargaining agent.

The National Labor Relations Board (NLRB) is another related entity but serves a different function. It is a federal agency that enforces US labor law in relation to collective bargaining and unfair labor practices. While the NLRB helps facilitate fair practices in the negotiation processes, it does not act as a collective bargaining agent.

Therefore, in the scenario described in the question where nurses are involved in formalizing collective bargaining through unionization, the correct term to describe the entity working on their behalf is the collective bargaining agent. This agent plays a pivotal role in ensuring that the rights and interests of the nurses are represented and negotiated effectively in the workplace.

NEW QUESTION # 256

Which model allows nurses to collaborate between units and departments?

- A. Matrix.
- B. Team care.
- C. Shared governance.
- D. Primary Care.

Answer: C

Explanation:

The correct answer to the question of which model allows nurses to collaborate between units and departments is "Shared Governance." Shared governance is an organizational model that empowers nurses by involving them in decision-making processes that affect their work and the care of their patients. This model is particularly effective in fostering collaboration across different units and departments within healthcare facilities.

Shared governance operates on the principle of distributive leadership, which means that leadership responsibilities are spread across various levels within the organization, rather than being centralized in a traditional management hierarchy. In a shared governance structure, nurses at all levels have the opportunity to participate in committees and councils that make policy, procedure, and practice decisions.

This inclusive approach ensures that the staff who are directly involved with patient care have a significant voice in how that care is delivered, which can lead to more effective and efficient practices. It also helps to align the goals and actions across different departments, enhancing teamwork and reducing inter-departmental conflicts. By collaborating in such a structured way, nurses from various specialties and units can share insights and innovations, thus improving patient outcomes and staff satisfaction.

Moreover, shared governance models help to foster professional growth and development. Nurses engaged in this model are often more motivated, as they feel their opinions are valued and they have a tangible impact on their work environment and patient care standards. This sense of ownership and accountability can lead to higher job satisfaction and lower turnover rates.

In summary, shared governance is a transformative model for nursing practice. It promotes collaboration, enhances professional

development, and improves the quality of patient care by involving nurses in the decision-making processes that affect their daily work and interactions across different units and departments.

NEW QUESTION # 257

Which of the following is the best brief definition of consensus?

- A. Majority rule
- B. Partial agreement
- C. Unanimous consent
- **D. General agreement**

Answer: D

Explanation:

The term "consensus" refers to a situation where there is a general agreement among the members of a group, though not necessarily a complete agreement by every member on every aspect. This contrasts with "unanimous consent," where every member fully agrees with all aspects of the decision or proposal without any reservations.

In practical terms, achieving absolute unanimity can be exceptionally challenging, especially in diverse groups where people have varying perspectives and interests. Expecting unanimous consent can lead to deadlock and impede progress in decision-making processes. Therefore, consensus is often sought as a more feasible and efficient approach.

Consensus does not mean that every participant must be in complete agreement or that every point needs to meet the approval of all involved. Instead, it signifies that the majority supports the general course of action, while minority viewpoints are sufficiently acknowledged and addressed to the extent that dissenters still feel engaged and respected in the overall process. This level of general agreement is typically adequate to move forward with decisions and maintain harmony within the group.

In summary, "general agreement" accurately captures the essence of consensus. It is an inclusive process that aims to achieve broad agreement and commitment from a group, navigating through individual differences to find a mutually acceptable path forward. This makes it a foundational concept in collaborative environments where cooperation and cohesion are crucial.

NEW QUESTION # 258

Safe harbor laws for nurses:

- A. Exclude requirements for charting.
- B. Hold physicians responsible for clarifying orders.
- **C. Limit the scope of practice for nurses.**
- D. Hold nurses liable for helping in emergency situations.

Answer: C

Explanation:

The question appears to be asking about the function and impact of safe harbor laws specific to the nursing profession. Let's clarify and expand upon the provided answer choices and explanations.

****Hold nurses liable for helping in emergency situations.**** This choice is incorrect. Safe harbor laws do not typically hold nurses liable for providing assistance in emergency situations. In fact, many regions have Good Samaritan laws that protect healthcare professionals, including nurses, from liability when they provide emergency aid, unless there is evidence of gross negligence or willful misconduct.

****Limit the scope of practice for nurses.**** This statement is a partial truth but requires clarification. Safe harbor laws do not inherently limit the scope of practice for nurses as defined by their licensing and regulatory bodies. Instead, these laws are designed to protect nurses when they believe an assignment is unsafe or outside their competency. For instance, if a nurse is trained and works primarily in pediatrics, safe harbor provisions can protect them from being mandated to work in an adult intensive care unit if they believe doing so would be unsafe given their lack of experience in that area.

****Hold physicians responsible for clarifying orders.**** This choice might seem relevant, but it is not directly related to safe harbor laws. While it is crucial in clinical settings for physicians to provide clear orders, safe harbor laws specifically focus on protecting nurses when they raise concerns about patient safety due to assignments that are beyond their competence or when staffing levels are inadequate.

****Exclude requirements for charting.**** This option is incorrect. Safe harbor laws do not exclude nurses from charting or documentation responsibilities. Charting is an essential part of nursing practice, crucial for ensuring continuity of care, and is legally required to accurately reflect the care provided to patients. Safe harbor laws do not impact these obligations.

****Summary.**** Safe harbor laws are essentially protective measures for nurses, allowing them to formally object to certain work assignments without fear of retaliation when they believe those assignments could jeopardize patient safety. These laws provide a

legal framework within which nurses can advocate for their ability to provide safe and competent care, based on their specific training, experience, and existing workload. While safe harbor laws protect nurses, they do not alter the basic responsibilities of nurses nor do they relieve them of their duty to provide care within their scope of practice and according to the standards of their profession.

NEW QUESTION # 259

Research can be categorized in a number of different ways. The type of research that focuses on subjective interpretation of data is which of the following?

- A. historical
- B. longitudinal
- C. qualitative
- D. field

Answer: C

Explanation:

Qualitative research is primarily exploratory research used to gain an understanding of underlying reasons, opinions, and motivations. It provides insights into the problem or helps to develop ideas or hypotheses for potential quantitative research. Qualitative research is also used to uncover trends in thought and opinions, and dive deeper into the problem.

Unlike quantitative research which focuses on numbers and logical, objective data, qualitative research involves the study of data that are descriptive in nature. This type of research often focuses on understanding how individuals or groups perceive, experience, and interpret their social realities. This naturally leads to an emphasis on the subjective interpretation of the data collected.

In qualitative research, data collection methods might include conducting focus groups, individual interviews, or observation. These methods help researchers understand the complexity of human experience in context-specific settings. For instance, instead of measuring how many people feel a certain way as quantitative methods would, qualitative research explores why people feel a certain way.

Qualitative research does not follow the traditional scientific model which seeks to control and predict, using experiments and measurable data. Instead, it embraces a more fluid, open-ended approach, often adapting as the research unfolds. This flexibility can provide a more nuanced understanding of the social context being studied.

Moreover, qualitative research does not rely on hypothesis testing. It is more concerned with understanding how people interpret their experiences, how they construct their worlds, and what meaning they attribute to their experiences. The findings from qualitative research can be valuable in a variety of fields and practices, informing policy-making, education, health, social work, and market research, among others.

Therefore, the type of research that focuses on subjective interpretation of data is qualitative research, which provides depth and detail through direct quotation and careful observation while considering the context of the study.

NEW QUESTION # 260

.....

According to the different demands from customers, the experts and professors designed three different versions for all customers. According to your need, you can choose the most suitable version of our ANCC - Nurse Executive Advanced Certification (NEA-BC) guide torrent for yourself. The three different versions have different functions. If you decide to buy our NEA-BC Test Guide, the online workers of our company will introduce the different function to you. You will have a deep understanding of the three versions of our NEA-BC exam questions. We believe that you will like our products.
