Trustworthy Network Appliance NS0-165 Pdf & NS0-165 Valid Test Prep

Passing the NS0-165 exam requires the ability to manage time effectively. In addition to the NetApp Data ONTAP Administrator Exam (NS0-165) exam study materials, practice is essential to prepare for and pass the Network Appliance NS0-165 exam on the first try. It is critical to do self-assessment and learn time management skills. Because the NS0-165 test has a restricted time constraint, time management must be exercised to get success. Only with enough practice one can answer real Network Appliance NS0-165 exam questions in a given amount of time.

Network Appliance NetApp Data ONTAP Administrator Exam Sample Questions (Q116-Q121):

NEW QUESTION # 116

Which two networking components must be configured to fail over LIFs across subnets? (Choose two.)

- A. BGP
- B. LACP
- C. VLAN
- D. VIP

Answer: A,D

Explanation:

Failing over LIFs across subnets in ONTAP requires the use of virtual IP addresses combined with dynamic routing. BGP is used to advertise and withdraw the VIP routes, allowing client traffic to be redirected automatically to the new network path when a failover occurs.

NEW QUESTION # 117

Which NetApp product runs on VMware ESXi hosts?

- A. Azure NetApp Files
- B. ONTAP Select software
- C. AFF C-Series
- D. Cloud Volumes ONTAP

Answer: B

Explanation:

ONTAP Select is a software-defined version of ONTAP that is deployed as a virtual machine and is designed to run directly on VMware ESXi hosts.

NEW QUESTION # 118

Which two NetApp tools are used to validate the deployment of a NetApp ONTAP cluster?
(Choose two.)

- A. Active IQ Unified Manager
- B. Active IQ Config Advisor
- C. Active IQ website
- D. OnCommand Workflow Automation

Answer: B,C

Explanation:

Active IQ Config Advisor validates cluster configuration, cabling, and best practices immediately after deployment. The Active IQ website analyzes AutoSupport data to validate system health and configuration compliance, helping confirm that the ONTAP cluster is deployed correctly.

NEW QUESTION # 119

A storage administrator wants to guarantee that the performance of critical workloads is not degraded by competing workloads in a NetApp ONTAP cluster. What are the two ways to accomplish this task? (Choose two.)

- A. Set a throughput floor for a critical workload.
- B. Set a throughput floor on a competing workload.
- C. Set a throughput ceiling for a critical workload.
- D. Set a throughput ceiling on a competing workload.

Answer: A,D

Explanation:

A throughput floor guarantees a minimum level of performance for a critical workload so it continues to receive required resources even under contention. A throughput ceiling on a competing workload limits its maximum resource consumption, preventing it from consuming excessive resources that could impact critical workloads.

NEW QUESTION # 120

An administrator has four SVMs within their cluster, and corporate policy dictates a need to physically separate the data within the SVMs. Which vservers modify command would the administrator use on each SVM to keep the data separate?

- A. caching-policy
- B. storage-limit
- C. qos-policy-group
- D. aggr-list

Answer: D

Explanation:

Assigning an aggregate list to an SVM restricts the SVM to using only the specified physical aggregates. This enforces physical separation of data between SVMs by ensuring their volumes reside on different storage resources.

NEW QUESTION # 121

.....

Dare to pursue, we will have a good future. Do you want to be successful people? Do you want to be IT talent? Do you want to pass Network Appliance NS0-165 certification? PrepAwayPDF will provide you with high quality dumps. It includes real questions and answers, which is useful to the candidates. PrepAwayPDF Network Appliance NS0-165 Exam Dumps is ordered, finished, and to the point. Only PrepAwayPDF can perfect to show its high quality, however, not every website has high quality exam dumps. Than cardiac operations a rush to purchase our Network Appliance NS0-165 Oh! The successful rate is 100%.
