Secondly, you can also learn a lot of the specialized knowledge at the same time.

Oracle GoldenGate 19c Implementation Professional Sample Questions (Q69-

Q74):

NEW QUESTION # 69

You need to configure the source database, target database, and Oracle GoldenGate for conflict detection and resolution (CDR). You want the full before image of each record, but your database does not provide a before image in the log record and must be configured to do so with supplemental logging. How should you proceed?

- A. Include the OVERWRITE command.
- B. Include the USEDELTA command.
- C. Include the UPDATAROWEXISTS command.
- **D. Include the ADD TRANDATA command.**

Answer: D

Explanation:

To enable full before images for Conflict Detection and Resolution (CDR), use the ADD TRANDATA command to enable supplemental logging on the source table, ensuring key and changed column data is captured in the redo logs.

NEW QUESTION # 70

How should you specify the data source for a secondary Extract functioning as a Data Pump?

- A. LOCTRILSOURCE
- B. SOURCEISTRIL
- **C. EXTTRILSOURCE**
- D. SOURCEISSTABLE

Answer: C

Explanation:

For a secondary Extract functioning as a Data Pump, you should specify the data source using EXTTRILSOURCE. This parameter tells GoldenGate to use the local trail file (created by the primary Extract) as the source for the data pump.

NEW QUESTION # 71

You find that an Extract's recovery time increases. What caused it?

- A. The oldest open (uncommitted) transaction is small.
- **B. The difference between the start of the oldest open (uncommitted) transaction and current read position in the transaction log stored in the checkpoint file is large.**
- C. There is no oldest open (uncommitted) transaction.
- D. The current read position (RBA) is less than the oldest open (uncommitted) transaction position.

Answer: B

Explanation:

When the difference between the oldest open transaction's start and the current read position is large, Extract must scan more log data, increasing recovery time.

NEW QUESTION # 72

You want to use multiple concurrent Extract process groups. What is the key factor in determining how many can be running at the same time?

- A. Disk space
- B. The number of compound keys on the source tables
- **C. System memory**
- D. The number of concurrent users

Answer: C

Explanation:

System memory is the most critical factor for determining how many Extract processes can run concurrently. Each process consumes memory, and insufficient memory may lead to performance degradation or process failure.

NEW QUESTION # 73

Which Oracle GoldenGate utility helps troubleshoot OGG-02191 Incompatible Record errors?

- A. The CONVCHK utility
- **B. The logdump utility**
- C. The reverse utility

Answer: B

Explanation:

logdump is used to inspect trail file record structure.

NEW QUESTION # 74
