

# Pass Guaranteed Quiz Pass-Sure Oracle - 1z0-071 Exam Actual Tests

## Oracle Database SQL Exam 1Z0-071 Actual Exam Prep 2025 Guaranteed Pass

1. Evaluate the following SQL statement: Correct Answer: ABD

```
SQL> select cust_id, cust_last_name "Last name" FROM
customers
WHERE country_id = 10 UNION
SELECT cust_id CUST_NO, cust_last_name FROM
customers
WHERE country_id = 30
```

–Identify three ORDER BY clauses either one of which can complete the query.

- A. ORDER BY "Last name"
- B. ORDER BY 2, cust\_id
- C. ORDER BY CUST\_NO
- D. ORDER BY 2, 1
- E. ORDER BY "CUST\_NO"

2. Which three statements are true regarding the WHERE and HAVING clauses in a SQL statement? (Choose three.) Correct Answer: BDE

- A. WHERE and HAVING clauses cannot be used together in a SQL statement.
- B. The HAVING clause conditions can have aggregate functions.
- C. The HAVING clause conditions can use aliases for the columns.
- D. The WHERE clause is used to exclude rows before the grouping of data.

What's more, part of that Exams4Collection 1z0-071 dumps now are free: [https://drive.google.com/open?id=11fNZ-t8Pwm\\_oovwxt0e1xMrtIRJ2\\_ego](https://drive.google.com/open?id=11fNZ-t8Pwm_oovwxt0e1xMrtIRJ2_ego)

Since different people have different preferences, we have prepared three kinds of different versions of our 1z0-071 practice test: PDF, Online App and software. Last but not least, our customers can accumulate exam experience as well as improving their exam skills in the mock exam. And your success is 100% guaranteed for our pass rate of 1z0-071 Exam Questions is as high as 99% to 100%. And We have put substantial amount of money and effort into upgrading the quality of our 1z0-071 Exam Preparation materials.

Oracle 1z0-071 certification exam is an essential step for individuals who want to demonstrate their proficiency in SQL programming for Oracle databases. Passing 1z0-071 exam is a requirement for obtaining the Oracle Database SQL certification, which is highly valued in the database management industry. With the right preparation and dedication, candidates can successfully pass 1z0-071 exam and advance their careers in database management.

Oracle 1z1-071 exam is an essential certification for IT professionals seeking to validate their expertise in SQL database management using Oracle technologies. Oracle Database SQL certification provides many opportunities for career advancement and can lead to highly rewarding job positions in the IT industry. Therefore, individuals who want to enhance their knowledge and skills in Oracle Database SQL should consider taking 1z0-071 Exam to validate their proficiency in the field.

Oracle 1z1-071 exam is a valuable certification for database professionals who want to demonstrate their expertise in SQL and Oracle Database administration. 1z0-071 exam covers a range of topics, including SQL functions, data manipulation, data retrieval,

and data control. Oracle certified professionals are in high demand and can command high salaries in the industry, making this certification an excellent investment for your career.

## Some Best Features of Oracle 1z0-071 Exam Questions

If you are going to take a 1z0-071 Exam, nothing can be more helpful than our 1z0-071 actual exam. Compared with other exam materials, you will definitely check out that our 1z0-071 real test can bring you the most valid and integrated content to ensure that what you study with is totally in accordance with the Real 1z0-071 Exam. And we give sincere and suitable after-sales service to all our customers to provide you a 100% success guarantee to pass your exams on your first attempt.

## Oracle Database SQL Sample Questions (Q235-Q240):

### NEW QUESTION # 235

Examine the structure of the members table:

Name	Null?	Type
MEMBER_ID	NOT NULL	VARCHAR2 (6)
FIRST_NAME		VARCHAR2 (50)
LAST_NAME	NOT NULL	VARCHAR2 (50)
ADDRESS		VARCHAR2 (50)
CITY		VARCHAR2 (25)
STATE		VARCHAR2 (3)

You want to display details of all members who reside in states starting with the letter A followed by exactly one character. Which SQL statement must you execute?

- A. `SELECT * FROM MEMBERS WHERE state LIKE 'A%';`
- B. `SELECT * FROM MEMBERS WHERE state LIKE 'A_%';`
- C. `SELECT * FROM MEMBERS WHERE state LIKE 'A_*';`
- **D. `SELECT * FROM MEMBERS WHERE state LIKE '%A_*';`**

Answer: D

### NEW QUESTION # 236

Examine the description of the EMPLOYEES table:

Name	Null?	Type
EMP_ID	NOT NULL	NUMBER
EMP_NAME		VARCHAR2 (40)
DEPT_ID		NUMBER (2)
SALARY		NUMBER (8, 2)
HIRE_DATE		DATE

NLS\_DATE\_FORMAT is DD-MON-RR.

Which two queries will execute successfully?

- **A. `SELECT dept_id, sum(salary) FROM employees WHERE hire_date > '01-JAN-9' GROUP BY dept_id;`**
- B. `SELECT dept_id, AVG (MAX(salary)) FROM employees GROUP By dept_id HAVING hire_date > '01-JAN-19';`
- C. `SELECT dept_id, AVG(MAX(salary)) FROM employees GROUP BY dept_id, salary;`
- D. `SELECT AVG(MAX(salary)) FROM employees GROUP BY salary;`
- E. `SELECT dept id, MAX (SUM(salary)) FROM employees GROUP BY dept_id;`

Answer: A

Explanation:

In Oracle SQL, aggregation functions such as AVG and MAX cannot be nested directly inside each other and must be used in conjunction with GROUP BY on the column(s) that are not included in the aggregate function.

Also, the HAVING clause filters groups after aggregation is applied.

- A). This query will not execute successfully because it improperly nests MAX inside AVG. Oracle SQL does not allow this type of nested aggregation without a subquery.
- B). This query will not execute successfully for the same reason as A, it improperly nests MAX inside AVG.
- C). Similar to A and B, this query improperly nests SUM inside MAX, which is not allowed without a subquery.
- D). This query will execute successfully. It filters rows based on the HIRE\_DATE using a correct date format (assuming '9' refers to '09' or '1999' due to the NLS\_DATE\_FORMAT being 'DD-MON-RR'), then groups the remaining rows by DEPT\_ID and calculates the sum of SALARY for each department.
- E). This query will not execute successfully because it improperly nests MAX inside AVG without a subquery, and it incorrectly attempts to GROUP BY SALARY, which is already being aggregated.

#### NEW QUESTION # 237

Examine the structure proposed for the TRANSACTIONS table:

Which two statements are true regarding the storage of data in the above table structure?

(Choose two.)

- A. The TRANS\_DATE column would allow storage of dates only in the dd-mon-yyyy format.
- B. The CUST\_CREDIT\_VALUE column would allow storage of positive and negative integers.
- C. The TRANS\_VALIDITY column would allow storage of a time interval in days, hours, minutes, and seconds.
- D. The CUST\_STATUS column would allow storage of data up to the maximum VARCHAR2 size of 4,000 characters.

**Answer: B,C**

#### NEW QUESTION # 238

You must create a table for a banking application. (Choose the best answer.) One of the columns in the table has these requirements:

1: A column to store the duration of a short term loan

2: The data should be stored in a format supporting DATE arithmetic with DATE datatypes without using conversion functions.

3: The maximum loan period is 30 days.

4: Interest must be calculated based on the number of days for which the loan remains unpaid.

Which data type would you use?

- A. Interval year to month
- B. Date
- C. Interval day to second
- D. Timestamp
- E. Number

**Answer: C**

#### NEW QUESTION # 239

Evaluate the following statement.

```

INSERT ALL
  WHEN order_total < 10000 THEN
    INTO small_orders
  WHEN order_total > 10000 AND order_total < 20000 THEN
    INTO medium_orders
  WHEN order_total > 20000 AND order_total < 20000 THEN
    INTO large_orders
SELECT order_id, order_total, customer_id
FROM orders;

```

Which statement is true regarding the evaluation of rows returned by the subquery in the INSERT statement?

- A. They are evaluated by the first WHEN clause. If the condition is false, then the row would be evaluated by the subsequent WHEN clauses.
- B. The insert statement would give an error because the ELSE clause is not present for support in case none of WHEN clauses are true.
- C. They are evaluated by the first WHEN clause. If the condition is true, then the row would be evaluated by the subsequent WHEN clauses.
- D. They are evaluated by all the three WHEN clauses regardless of the results of the evaluation of any other WHEN clause.

**Answer: D**
