

Pass 3V0-24.25 Exam | Reliable 3V0-24.25 Guide Files

DOWNLOAD the newest ExamBoosts 3V0-24.25 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1zu7TltwWFYobc6uWddifnuMGIXJq-Ro1>

ExamBoosts is not only a website but as a professional study tool for candidates. Last but not least, we have advanced operation system of 3V0-24.25 training materials which not only can ensure our customers the fastest delivery speed but also can protect the personal information of our customers automatically. In addition, our professional after sale stuffs will provide considerate online after sale service on the 3V0-24.25 Exam Questions 24/7 for all of our customers. And our pass rate of 3V0-24.25 studying guide is as high as 99% to 100%. You will get your certification with our 3V0-24.25 practice prep.

Our 3V0-24.25 exam materials are formally designed for the exam. With its help, you don't have to worry about the exam any more for it almost guarantees you get what you want. If you think i'm exaggerating, you might as well take a look at our 3V0-24.25 Actual Exam. With a high pass rate as 98% to 100%, you will be bound to pass the exam. And our 3V0-24.25 training questions are popular in the market. We believe you will make the right choice.

>> Pass 3V0-24.25 Exam <<

With Our Information-Packed PDF, Prepare for VMware 3V0-24.25 Exam Questions

Experts at ExamBoosts strive to provide applicants with valid and updated VMware 3V0-24.25 exam questions to prepare from, as well as increased learning experiences. We are confident in the quality of the VMware 3V0-24.25 preparational material we provide and back it up with a money-back guarantee. ExamBoosts provides VMware 3V0-24.25 desktop-based practice software for you to test your knowledge and abilities. The 3V0-24.25 desktop-based practice software has an easy-to-use interface.

VMware Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service Sample Questions (Q28-Q33):

NEW QUESTION # 28

An administrator has been tasked to temporarily scale the Control Plane of a VKS cluster with no service disruption. How should the administrator accomplish this task?

- A. Edit the cluster.yaml file to change the number of Control Plane replicas.
- B. Delete and redeploy the cluster with the desired number of Control Plane nodes.
- C. Create a new namespace with the desired number of Control Plane nodes.
- D. Create a new cluster in the namespace with the requested number of nodes.

Answer: A

Explanation:

VKS cluster lifecycle is managed using a declarative API: you use kubectl with a YAML file to specify the desired state of the cluster (for example: "how many nodes," Kubernetes version, sizing, and storage). After the cluster is created, you update the YAML to update the cluster. This is why the correct operational approach is to modify the cluster manifest (cluster.yaml) rather than deleting and redeploying.

Additionally, VKS uses multiple controller layers, where Cluster API and the Virtual Machine Service are responsible for provisioning and managing the lifecycle of the control plane and worker node VMs that make up the VKS cluster. In other words, when you change the declared state for control plane sizing/replica count in the cluster YAML, the platform reconciles to that new state by adjusting the underlying control plane VMs through the supported controllers, instead of requiring disruptive "tear down and rebuild" operations.

So, editing the cluster.yaml to adjust the control plane replica count is the method that matches the documented VKS declarative operations model and controller-driven reconciliation.

NEW QUESTION # 29

A Cloud Administrator is troubleshooting a "Configuring" hang during the enabling of Workload Management on a cluster using the NSX Advanced Load Balancer (Avi) with VDS networking.

The Supervisor Control Plane VMs have powered on, but the process does not advance. The administrator checks the Avi Controller dashboard and notices that no Virtual Services (VS) have been created for the Supervisor VIP.

Review the following log snippet from the Supervisor's wcpvc.log:

```
E1125 14:00:05.123 [avi_controller_client] Failed to authenticate to Avi Controller '192.168.20.10':
```

```
401 Unauthorized. Invalid credentials.
```

What is the corrective action? (Choose 2.)

- A. Verify that the username and password specified for the Avi Controller in the Workload Management wizard are correct and have not expired.
- B. Ensure the Avi Controller certificate provided during setup matches the current certificate on the Avi Controller (check for thumbprint mismatch).
- C. Restart the Avi Service Engines.
- D. Update the credentials in the Supervisor configuration via the vSphere Client.
- E. Re-deploy the Supervisor Control Plane VMs.

Answer: A,D

NEW QUESTION # 30

A Security Operations Analyst needs to configure access for an external OIDC provider (e.g., Okta) to allow developers to authenticate to TKG clusters.

Review the available configuration interfaces:

1. vSphere Client > Administration > Single Sign-On > Configuration > Identity Provider
2. Supervisor Control Plane VM (via SSH) > /etc/pam.d/
3. NSX Manager > System > Users > External
4. Tanzu Mission Control > Identity

Where must the analyst configure the upstream OIDC Identity Provider trust relationship so that it applies to the Supervisor Cluster and its Namespaces?

- A. Interface 1
- B. Interface 3
- C. Interface 2
- D. Interface 4

Answer: A

NEW QUESTION # 31

What role does Contour play in a VMware vSphere Kubernetes Service (VKS) architecture?

- A. Contour provides load balancing for ingress traffic.
- B. Contour provides encryption services for pod to pod network traffic.
- **C. Contour provides ingress management at the application layer.**
- D. Contour provides egress management at the application layer.

Answer: C

Explanation:

Contour is a high-performance Ingress controller for Kubernetes that serves as the control plane for the Envoy edge and service proxy. Within the VMware Cloud Foundation (VCF) 9.0 and vSphere Kubernetes Service (VKS) architecture, Contour is a critical component used to manage how external traffic reaches services running inside a cluster. It functions specifically at the application layer (Layer 7 of the OSI model), enabling sophisticated routing based on HTTP paths, hostnames, and headers.

By utilizing the Envoy proxy, Contour provides a scalable and maintainable way to handle standard Kubernetes Ingress resources as well as the more advanced HTTPProxy custom resource definitions (CRDs).

In a VKS environment, once the Supervisor is configured and a workload cluster is deployed, Contour is typically installed as a managed package to provide ingress services. It handles essential tasks such as SSL

/TLS termination, which offloads the encryption overhead from individual application pods, and supports advanced traffic management patterns like canary deployments or blue-green updates. Unlike traditional load balancers that may operate only at Layer 4, Contour's deep integration with the Kubernetes API allows it to dynamically update routing rules as pods scale or fail, ensuring high availability and fine-grained control for containerized applications. This makes it the standard solution for application-layer ingress management across the VMware Tanzu and VKS ecosystem.

NEW QUESTION # 32

An administrator is updating a VMware vSphere Kubernetes Service (VKS) cluster by editing the cluster manifest. When saving, there is no indication that the edit was successful.

Based on the scenario, what action should the administrator take to edit and apply changes to the manifest?

- A. Restart the VKS services and edit the file again.
- B. Verify the account editing the cluster manifest has appropriate permissions.
- **C. Define the KUBE_EDITOR or EDITOR environment variable.**
- D. Ensure the file permissions are set to read-write.

Answer: C

NEW QUESTION # 33

.....

As we all know, Selecting high quality, respected study material will help develop the required skills to pass your 3V0-24.25 exam test. While, where to find the best valid 3V0-24.25 practice dumps is an important question. VMware 3V0-24.25 study material will be your good guide. 3V0-24.25 Questions cover almost all the main topic, which can make you clear about the actual test. I believe, with the confident and our 3V0-24.25 valid dumps, you will get your 3V0-24.25 certification with ease.

Reliable 3V0-24.25 Guide Files: <https://www.examboosts.com/VMware/3V0-24.25-practice-exam-dumps.html>

VMware Pass 3V0-24.25 Exam Our most convenient service is waiting for you to experience, VMware Pass 3V0-24.25 Exam As qualification exams are difficult to pass, many people may fail many times or give up half way, VMware Pass 3V0-24.25 Exam If you buy our product, we will offer one year free update of the questions for you, Especially for those students who are headaches when reading a book, 3V0-24.25 study tool is their gospel.

Visualization: surfacing insights from huge 3V0-24.25 data sets, Graphic Design Sins and Virtues, Our most convenient service is waiting for you to experience, As qualification Reliable 3V0-24.25 Guide Files exams are difficult to pass, many people may fail many times or give up half way.

2026 Perfect 100% Free 3V0-24.25 – 100% Free Pass Exam | Reliable 3V0-24.25 Guide Files

If you buy our product, we will offer one year free update of the questions for you, Especially for those students who are headaches when reading a book, 3V0-24.25 Study Tool is their gospel.

So as IT excellent talent elites you have to obey your heart and try your best to pass exams and obtain this certificate (with 3V0-24.25 dumps pdf).
