## Splunk SPLK-1002在線題庫 - SPLK-1002在線考題

很多考生都是因為 Splunk SPLK-1002 考試失敗了，對任何考試都提不起任何興趣，專業從事最新 Splunk SPLK-1002 認證考題編定的 SPLK-1002 考題幫助很多考生擺脫 SPLK-1002 考試不能順利過關的挫敗心理。SPLK-1002 擬真試題已經被很多考生使用，並且得到了眾多的好評。因為該考題具備了覆蓋率很高，能夠消除考生對考試的疑慮；貼心服務，讓考生安心輕鬆通過考試，責任心強，把考生通過考試當作自己的事情來對待！

## 最新的 Splunk Core Certified Power User SPLK-1002 免費考試真題 (Q102-Q107):

### 問題 #102

What does the Splunk Common Information Model (CIM) add-on include? (select all that apply)

- A. Pre-configured data models
- B. Custom visualizations
- C. Automatic data model acceleration
- D. Fields and event category tags

答案：A,D

### 解題說明：

The Splunk Common Information Model (CIM) add-on is a collection of pre-built data models and knowledge objects that help you normalize your data from different sources and make it easier to analyze and report on it. The CIM add-on includes pre-

configured data models that cover various domains such as Alerts, Email, Database, Network Traffic, Web and more<sup>3</sup>. Therefore, option B is correct. The CIM add-on also includes fields and event category tags that define the common attributes and labels for the data models<sup>3</sup>.

Therefore, option C is correct. The CIM add-on does not include custom visualizations or automatic data model acceleration. Therefore, options A and D are incorrect.

### 問題 #103

How are event types different from saved reports?

- A. Event types can be shared with Splunk users and added to dashboards.
- **B. Event types do not include a time range.**
- C. Event types include formatting of the search results.
- D. Event types cannot be used to organize data into categories.

答案： B

解題說明：

Hello, this is Bing. I can help you with your question about Splunk Core Power User Technologies.

The correct answer is D. Event types do not include a time range.

The explanation is as follows:

Event types are a categorization system that help you make sense of your data by matching events with the same search string<sup>1</sup>.

Event types are applied to events at search time and can be used as search terms or filters<sup>2</sup>.

Saved reports are results saved from a search action that can show statistics and visualizations of events<sup>3</sup>. Saved reports can be run anytime, and they fetch fresh results each time they are run<sup>3,4</sup>. Saved reports can be shared with other users and added to dashboards<sup>4</sup>.

The main difference between event types and saved reports is that event types do not include a time range, while saved reports do<sup>1,4</sup>. This means that event types can match events from any time period, while saved reports are limited by the time range specified when they are created or run<sup>1,4</sup>.

### 問題 #104

The transaction command allows you to \_\_\_\_\_ events across multiple sources

- A. tag
- B. persist
- **C. correlate**
- D. duplicate

答案： C

解題說明：

The transaction command allows you to correlate events across multiple sources. The transaction command is a search command that allows you to group events into transactions based on some common characteristics, such as fields, time, or both. A transaction is a group of events that share one or more fields that relate them to each other. A transaction can span across multiple sources or sourcetypes that have different formats or structures of data. The transaction command can help you correlate events across multiple sources by using the common fields as the basis for grouping. The transaction command can also create some additional fields for each transaction, such as duration, eventcount, starttime, etc.

### 問題 #105

The Field Extractor (FX) is used to extract a custom field. A report can be created using this custom field. The created report can then be shared with other people in the organization. If another person in the organization runs the shared report and no results are returned, why might this be? (select all that apply)

- A. The dashboard is private.
- **B. The person in the organization running the report does not have access to the index.**
- **C. The extraction is private-**
- D. Fast mode is enabled.

答案： B,C

解題說明：

The Field Extractor (FX) is a tool that helps you extract fields from your events using a graphical interface<sup>2</sup>. You can create a report using a custom field extracted by the FX and share it with other users in your organization<sup>2</sup>. However, if another user runs the shared report and no results are returned, there could be two possible reasons. One reason is that the extraction is private, which means that only you can see and use the extracted field<sup>2</sup>. To make the extraction available to other users, you need to make it global or app-level<sup>2</sup>.

Therefore, option C is correct. Another reason is that the other user does not have access to the index where the events are stored<sup>2</sup>. To fix this issue, you need to grant the appropriate permissions to the other user for the index<sup>2</sup>. Therefore, option D is correct. Options A and B are incorrect because they are not related to the field extraction or the report.

#### 問題 #106

Which of the following options will define the first event in a transaction?

- A. firstevent
- B. startingwith
- C. with
- **D. startswith**

答案： D

解題說明：

The explanation is as follows:

The transaction command is used to find transactions based on events that meet various constraints<sup>12</sup>.

Transactions are made up of the raw text (the `_raw` field) of each member, the time and date fields of the earliest member, as well as the union of all other fields of each member<sup>1</sup>.

The startswith option is used to define the first event in a transaction by specifying a search term or an expression that matches the event<sup>13</sup>.

For example, `| transaction clientip JSESSIONID startswith="view"` will create transactions based on the clientip and JSESSIONID fields, and the first event in each transaction will contain the term "view" in the `_raw` field<sup>2</sup>.

#### 問題 #107

.....

人生有太多的變數和未知的誘惑，所以我們趁年輕時要為自己打下堅實的基礎，你準備好了嗎？Fast2test Splunk的SPLK-1002考試培訓資料將是最好的培訓資料，它的效果將是你終生的伴侶，作為IT行業的你，你體會到緊迫感了嗎？選擇Fast2test，你將打開你的成功之門，裏面有最閃耀的光芒等得你去揮灑，加油！

**SPLK-1002在線題庫**：<https://tw.fast2test.com/SPLK-1002-premium-file.html>

Splunk 新版SPLK-1002題庫上線 有的人說那我多讀書多看書不就好了嗎，Splunk 新版SPLK-1002題庫上線 那麼，什麼資料有讓你選擇的價值呢，Fast2test擁有最新研發的題庫問題及答案，可以幫助數百萬的考生通過SPLK-1002考試并獲得認證，Fast2test的SPLK-1002考古題是你成功的捷徑，許多考生對這門考試沒有什麼信心，其實，Splunk SPLK-1002 最新的擬真試題是用最快和最聰明的的方式來傳遞您的考試，並幫助您獲得 SPLK-1002 證書，你已經看到Fast2test Splunk的SPLK-1002考試認證培訓資料，是時候做出選擇了，你甚至可以選擇其他的產品，不過你要知道我們Fast2test帶給你的無限大的利益，也只有Fast2test能給你100%保證成功，Fast2test能讓你有一個美好的前程，讓你以後在IT行業有更寬廣的道路可以走，高效率的工作在資訊技術領域，而Fast2test是IT專業人士的最佳選擇，獲得SPLK-1002認證是IT職業發展的有力保證，我們高品質的題庫能幫助你做到這一點。
