NEW QUESTION # 121

Universal Containers (UC) is using Salesforce for their sales organization. The sales users have created several dashboards using multiple running users. The admins have also added a few workflow rules that send email notifications to some sales users. What should an Architect consider while planning the deployment of such components? Choose 2 answers

- A. User fields are ignored during metadata deployments and all such users need to be manually created in the target org before starting the deployment.
- B. If the username in the source org doesn't exist in the target org, the deployment will continue and Salesforce will automatically create the username in the target org.
- C. User Fields are preserved during metadata deployments and Salesforce attempts to locate a matching user in the target org during deployment.
- D. If the username in the source org doesn't exist in the target org, the deployment will stop until the usernames are resolved or removed.

Answer: C,D
