NEW QUESTION # 46

Which two activities should an Architect encourage the replication team to follow based on S2C Commerce best practices?
Choose 2 answers

- A. Replicate the latest data to Production during periods of increased site use to ensure freshness.
- B. Wait 15 minutes after the recreation process completes for the cache to clear automatically.
- C. Use the undo replication process to roll back to the previous replication if necessary.
- D. Use the undo replication process to roll back code replications only, not data replications.

Answer: C,D

Explanation:

Option A (Use the undo replication process to roll back to the previous replication if necessary): This best practice ensures that if a replication introduces errors or issues, there is a way to quickly revert to a previous state without impacting the ongoing operations of the commerce site.

Option C (Use the undo replication process to roll back code replications only, not data replications): Focusing undo operations on code replication rather than data ensures that functional issues caused by code changes can be quickly addressed without affecting the integrity or consistency of the data within the system.

These practices help maintain the stability and reliability of the production environment by providing mechanisms to manage and mitigate risks associated with updates and changes.
