Eligibility Criteria For Isaca COBIT 2019 Exam

The eligibility criteria for COBIT 2019 Exam are given as below:

It should be noted that there is no pre-defined age limit for taking the examination. However, there is a rule that a candidate must be at least 18 years old on the day he/she takes the exam. As per the certification body, ISACA, candidates who have not attained 21 years of age by December 31st of the year in which the examination is held are not allowed to attempt the certification examination.

Understand the Isaca COBIT 2019 Exam

The Isaca COBIT Foundation exam is the first of two certification exams from the ISACA (Information Systems Audit and Control Association) that you need to take to become a COBIT Certified Associate. It's also the easiest of the two exams with a passing grade of only 65%. The exam is designed to let you demonstrate fundamental knowledge in key areas of governance, risk, compliance, and IT service management. **COBIT 2019 Dumps** PDF is a self-explanatory exam. It is designed to assess your knowledge of COBIT 2019. The test goes over information systems governance concepts and how they relate to enterprise risk management. You'll also learn about the role of IT in supporting the enterprise and how IT service management fits into the organization.

ISACA COBIT 2019 Foundation Sample Questions (Q168-Q173):

NEW QUESTION # 168

Which of the following is the PRIMARY benefit or output derived from setting targeted capability levels and performing a capability-level gap analysis for selected processes?

- A. Identification and mitigation of all identified risks
- B. Development of a business case outline
- C. Identification of process improvement opportunities
- D. Development of enterprise goals that align to established targets

Answer: C

Explanation:

The primary benefit or output derived from setting targeted capability levels and performing a capability-level gap analysis for selected processes is the identification of process improvement opportunities, according to the official COBIT 2019 Study Manual from ISACA. This gap analysis can help to identify areas where processes are not meeting their desired capability levels and can provide insight into how processes can be improved to meet their desired levels. This can help to increase efficiency and reduce costs.

NEW QUESTION # 169

Which of the following should be scheduled for completion FIRST when prioritizing improvement initiatives?

- A. Initiatives that are easiest to achieve and will garner business benefits
- B. Initiatives that are the least expensive in order to lower risk due to failure
- C. Initiatives with the lowest cost regardless of expected business value

Answer: A

Explanation:

Explanation

The initiatives that should be scheduled for completion first when prioritizing improvement initiatives are the ones that are easiest to achieve and will garner business benefits. This approach helps to create quick wins and demonstrate value to the stakeholders, as well as to build momentum and confidence for further improvement efforts. The initiatives should also be aligned with the enterprise's strategic objectives, risk appetite, and resource constraints. The approach is based on the COBIT 2019 Implementation Guide2, page 37. NEW QUESTION # 170

Which of the following is an important component for an enterprise strategy archetype of growth/acquisition as defined by COBIT 2019?

- A. Support for the portfolio management role with an investment office
- B. Services, infrastructure, and applications component
- C. Important influence of culture and behavior component for innovation
- D. Skills and competencies

Answer: A

Explanation:

Explanation

The enterprise strategy archetype is a design factor that describes how an enterprise uses information and technology to achieve its goals and objectives. There are six enterprise strategy archetypes defined in COBIT 2019: growth/acquisition; operational excellence; customer intimacy; product leadership; data-driven; innovation-driven. Each archetype has different implications for the governance and management of information and technology in terms of focus areas, processes, practices, roles, structures, and metrics. One of the important components for an enterprise strategy archetype of growth/acquisition is support for the portfolio management role with an investment office. Growth/acquisition is a strategy archetype

that emphasizes expanding market share, revenue, customer base, or product range through organic growth or acquisition of other businesses or assets. This strategy archetype requires effective portfolio management of information and technology investments and initiatives that support business growth or acquisition objectives. Portfolio management involves selecting, prioritizing, balancing, monitoring, evaluating, and optimizing information and technology investments and initiatives based on their alignment with business strategy, value delivery potential, risk exposure, resource availability, interdependencies, etc. Portfolio management also involves ensuring that information and technology investments and initiatives are integrated with business processes, systems, structures, culture, etc., especially in case of mergers or acquisitions. Support for the portfolio management role with an investment office means providing a dedicated function or unit that assists the portfolio manager in performing portfolio management activities such as planning, analysis, decision making, reporting, etc., as well as providing guidance, tools, methods, frameworks, standards, best practices etc., for portfolio management. NEW QUESTION # 171

Which of the following enterprise goals is within the Customer dimension of the IT balanced scorecard?

- A. Product and business innovation
- **B. Quality of management information**
- C. Delivery of programs on time and on budget

Answer: B

Explanation:

The enterprise goal titled quality of management information is within the customer dimension of the IT balanced scorecard. The customer dimension focuses on how well the enterprise meets the needs and expectations of its customers and stakeholders. Quality of management information is one of the 17 generic enterprise goals defined by COBIT that supports the customer dimension. It describes the desired outcome of providing accurate, timely, relevant, and reliable information to support decision making and performance management.
