# C-ACDET-2506 Exam Guide - Realistic SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Exam Sims Free PDF

We have authoritative production team made up by thousands of experts helping you get hang of our C-ACDET-2506 study question and enjoy the high quality study experience. We will update the content of C-ACDET-2506 test guide from time to time according to recent changes of examination outline and current policies. Besides, our C-ACDET-2506 Exam Questions can help you optimize your learning method by simplifying obscure concepts so that you can master better. One more to mention, with our C-ACDET-2506 test guide, there is no doubt that you can cut down your preparing time in 20-30 hours of practice before you take the exam.

SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	• Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

Topic 2	• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.
Topic 3	• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.

C-ACDET-2506 Exam Sims | Pdf C-ACDET-2506 Exam Dump

Nowadays the test C-ACDET-2506 certificate is more and more important because if you pass C-ACDET-2506 exam you will improve your abilities and your stocks of knowledge in some certain area and find a good job with high pay. If you buy our C-ACDET-2506 exam materials you can pass the C-ACDET-2506 Exam easily and successfully. We have data proved that our C-ACDET-2506 exam material has the high pass rate of 99% to 100%, if you study with our C-ACDET-2506 training questions, you will pass the C-ACDET-2506 exam for sure.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q49-Q54):

NEW QUESTION # 49
The customer wants to have a field to hold Contract Storage Locations and the address. Those locations are loaded from an external system, and the user should be able to search for storage locations. What should be used to hold the valid storage locations?

- A. Create a new field of type Text, with a custom Validation where the available Storage Locations are listed.
- B. Create a new field of type Date, where each date entry is tied to a unique Storage Location and its corresponding address, allowing users to select locations based on historical data entries.
- C. You should create a new Flex Master Data (FMD) Template with appropriate attributes and call it Storage Location. Once the template is published and sample data loaded, you can create a custom field and select the type Storage Location.
- D. You should load a new Enumeration Type and call it Storage Location and load the location addresses. Create a new field of type Enumeration with a custom filter to only Enumerations of type show Storage Locations.

Answer: C

Explanation:
For managing searchable lists of storage locations with associated attributes like addresses, the best SAP Ariba practice is to use a Flex Master Data (FMD) Template. This allows you to model the storage locations and related information dynamically. After creating the FMD template and loading the data (e.g., from CSV imports), you can create a custom field referencing the FMD type. This approach enables users to search, filter, and select valid locations efficiently, while also allowing the underlying data to be maintained separately and updated independently of the configuration.
Using text fields with validation or enumerations is insufficient for large or dynamic datasets and doesn't scale well. Date fields are unrelated to this scenario.
FMD provides a scalable and flexible solution for complex master data requirements like storage locations.

NEW QUESTION # 50
A standard field is not available in reporting A Greenfield customer needs to be able to report on the data that will be captured in that standard field. How can this be achieved?

- A. All standard fields are reportable by default.

- B. The system makes all fields reportable after a system refresh.
- C. Under Field Configurations,, search for the field in the appropriate class, mark the field Reportable, Save and Publish.
- D. Create a custom field that can be marked Reportable, default the custom field to the standard field value, publish, and then pull the field into reporting

Answer: D

NEW QUESTION # 51

What does the "?" represent in the Ariba expression below?
HierarchicalType=="SubAgreement" ? false : true

- A. if
- B. else
- C. replace
- D. then

Answer: D

Explanation:
The"?" symbol in Ariba expressions functions as the equivalent of "then" in conditional logic. The expression is a shorthand form of a ternary operator common in programming:
* The condition HierarchicalType=="SubAgreement" is evaluated first.
* Iftrue, the expression returns the value immediately after the "?" - in this case,false.
* The ":" symbol separates the "then" and "else" parts, so if the condition is false, the expression returns the value after the colon - true.Hence, "?" corresponds to the "then" clause of the if-then-else logic, making option C the correct answer.This syntax allows concise inline conditionals within Ariba's expression language.

NEW QUESTION # 52

A customer requests a dynamic list from CSV.
Which field type supports that?

- A. Single-Select Enum
- B. Hyperlink
- C. Computed Field
- D. Flex Master Data-based field

Answer: D

NEW QUESTION # 53

You can choose multiple field configurations and migrate them to the production site by creating a package in your test site.
Which of the following steps should be included? Note: There are 3 correct answers to this question.

- A. If you are migrating fields that are associated with enumerations, you should load those enumerations in the production site before migrating the fields.
- B. The Flex Master Data (FMD) templates must be defined and their data should be loaded in the production site before migrating FMD custom fields.
- C. Make sure you update the string resource files in the production site before migrating the corresponding field configurations from test to production site.
- D. Publish the form template within the test site in order to add the form fields in the package.
- E. Discard any other packages that appear in My Action Items.

Answer: A,B,C

NEW QUESTION # 54
