NEW QUESTION # 41
Which option from the Task Mining interface allows the business analyst to change the order of the identified steps within a trace?

- A. Most frequent path
- B. Export trace
- C. Edit step
- D. Recompute

Answer: C

Explanation:
In the UiPath Task Mining interface, the option that allows a business analyst to change the order of the identified steps within a trace is 'Edit step'. This feature enables the analyst to modify the sequence of actions or steps captured during the task mining process. By selecting 'Edit step', the analyst can rearrange the steps to reflect the correct order of the process as it should be executed1.
References: The explanation is based on the UiPath Documentation Portal's guide on Task Mining, which details the steps and actions, including editing and rearranging steps within a trace1.
