Salesforce Certified Platform Sharing and Visibility Architect Sample Questions (Q28-Q33):

NEW QUESTION # 28
Universal Containers (UC) has created a custom Invoice object. Standard sales users at UC can see the records in search layout, but when they click to view the detail, only record name, created date, and last modified date are shown. When the system admin

accesses it, he or she sees the full record detail with many more data fields.
What is the likely cause of this issue?

- A. The Sales Users profile does not have access to the remaining fields.
- B. A role-based sharing rule is missing and should be added for the sales user's role to grant access to the fields.
- C. The page layout assigned to Sales User profile has only Read-Only access to the fields.

Answer: A

NEW QUESTION # 29
Universal Containers (UC) has a custom object to track the internal net promoter score (NPS) for all of its employees. The manager is in the role above the owner and there are no sharing rules on the object.
How should UC ensure that NPS records cannot be accessed by the owner's manager?

- A. Use Apex sharing to remove NPS object share records for Manager profiles.
- B. Remove Create, Read, Edit, and Delete from Manager profiles and permission sets.
- C. Set organization-wide default to Private and uncheck the Access Using Hierarchies option for the NPS object.

Answer: C

NEW QUESTION # 30
Universal Containers (UC) sales managers are complaining that they cannot access their teams' Shipment records (a custom object). Initially, the admin suggested that this is happening due to a misconfigured Role Hierarchy (Shipment organization-wide default is Private). After investigation, they determined the Role Hierarchy for these users is correct.
What is the reason why UC sales managers are unable to see shipment records?

- A. The Ownership-based sharing rule for Shipment was incorrectly disabled by the admin.
- B. The Grant Access Using Hierarchies option on Shipment Sharing Settings was incorrectly disabled by the admin.
- C. The Role Hierarchy implicit sharing was incorrectly disabled by the admin.

Answer: B

NEW QUESTION # 31
The finance team at Universal Containers usually does not have access to account and contact records. A finance analyst was temporarily given opportunity access for a big deal to help with tax calculation. However, she can now also access account and contact records.
What is causing this issue?

- A. Contact records can be accessed due to implicit sharing from Opportunity.
- B. Account records can be accessed due to implicit sharing from Opportunity.
- C. Account records can be accessed due to Role Hierarchy.

Answer: B

NEW QUESTION # 32
Universal Containers (UC) would like to store an encryption key within Salesforce for use in Apex code, but it does not want users to be able to see this confidential key. Users require the view setup permission.
How can UC securely store the confidential key?

- A. Create a protected custom metadata type that stores the encryption key. Package the protected custom metadata type with its associated records in an unlocked package. Install the package in the production org.
- B. Create a protected custom metadata type that stores the encryption key. Package the protected custom metadata type with its associated records in a managed package. Install the package in the production org.
- C. Create a custom metadata type that stores the encryption key. Make sure that only the admin profile has access to the custom metadata type so that end users cannot access the encryption key.

Answer: B
