## Microsoft Power Platform Solution Architect Sample Questions (Q62-Q67):

### NEW QUESTION # 62

You need to conduct discovery meetings to gather information for each job role.

Which type of meeting should you use for each department?

To answer, move the appropriate meeting types to the correct departments. You may use each meeting type once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

The screenshot shows a Microsoft Power Platform interface with two main panes. The left pane, titled 'Meeting types', contains three items: 'job shadowing', 'surveys', and 'workshops'. The right pane, titled 'Meeting type for each department', has a table with three columns: 'Department', 'Meeting type', and an empty column. The departments listed are 'construction', 'sales', and 'warranty'. The 'Meeting type' column is currently empty for all departments.

**Answer:**

Explanation:

The screenshot shows the same interface as before, but with the meeting types assigned to the departments. In the 'Meeting type' column, 'workshops' is assigned to 'construction', 'surveys' is assigned to 'sales', and 'job shadowing' is assigned to 'warranty'.

Explanation:

The screenshot shows the same interface as before, but with the meeting types assigned to the departments. In the 'Meeting type' column, 'workshops' is assigned to 'construction', 'surveys' is assigned to 'sales', and 'job shadowing' is assigned to 'warranty'.

### NEW QUESTION # 63

A company uses Microsoft Power Platform. The company has a database that has two tables: Department and Employee.

The company plans to define a data model to meet the following requirements:

- \* Each row in the Department table can be linked to more than one row in the Employee table.
- \* Each row in the Employee table can be linked to only one row in the Department table,
- \* Action taken on one table will not affect the other table.

You need to define the relationship between the tables. Which relationship type should you use?

- A. many-to-many relationship and custom relationship behavior
- B. many-to-one relationship and Referential, Restrict Delete
- C. many-to-many relationship and parental relationship behavior
- **D. many-to-one relationship and Referential, Remove Link**

**Answer: D**

### NEW QUESTION # 64

You are a Microsoft Power Platform solution architect working on a project. API calls are being sent between external applications and a Microsoft Power Platform solution.

The number of requests per user within a given time frame varies. Some users may be exceeding the service protection API limits.

You need to ensure that the API conforms to service protection limits.

Which three metrics should you review? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. The number of concurrent requests that a user can make.
- B. The combined execution time required to process requests from a user.
- C. The total execution time for requests by all users.
- D. The number of requests that a user can make each day.
- E. The total number of requests that can be processed each day.

**Answer: A,B,D**

Explanation:

Explanation

Three types of service protection API limit errors that can be returned:

Number of requests This limit counts the total number of requests during the preceding 300 second period.

Execution time This limit tracks the combined execution time of incoming requests during the preceding 300 second period.

Concurrent requests This limit tracks the number of concurrent requests.

#### NEW QUESTION # 65

A company offers continuing education courses for medical professionals. Each time a course is offered, the company tracks that the session has taken place in an Excel workbook.

The company maintains a list of required qualifications for an educator to teach a course. Educator qualifications range from languages spoken to advanced degrees.

The company needs the following custom table relationships defined:

Associate educators with a list of their professional qualifications.

Assign a primary educator to each course that is held.

Collect information about every course that is held.

You need to determine the type of relationship that best fits the requirement.

Which type of table relationship should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Relationship
ducators must be associated with their alifications.	<div>▼</div> <div>Many-to-many relationship that uses a system generated table</div> <div>Many-to-many relationship that uses a custom table</div> <div>One-to-many relationship</div>
hen a course is held there must be primary educator assigned.	<div>▼</div> <div>Many-to-many relationship that uses a system generated table</div> <div>Many-to-many relationship that uses a custom table</div> <div>One-to-many relationship</div>
hen a course is held, the company needs collect information on that session.	<div>▼</div> <div>Many-to-many relationship that uses a system generated table</div> <div>Many-to-many relationship that uses a custom table</div> <div>One-to-many relationship</div>

**Answer:**

Explanation:

Requirement	Relationship
Educators must be associated with their qualifications.	<div>▼</div> Many-to-many relationship that uses a system generated table Many-to-many relationship that uses a custom table One-to-many relationship
When a course is held there must be a primary educator assigned.	<div>▼</div> Many-to-many relationship that uses a system generated table Many-to-many relationship that uses a custom table One-to-many relationship
When a course is held, the company needs to collect information on that session.	<div>▼</div> Many-to-many relationship that uses a system generated table Many-to-many relationship that uses a custom table One-to-many relationship

Explanation

Requirement	Relationship
Educators must be associated with their qualifications.	<div>▼</div> Many-to-many relationship that uses a system generated table Many-to-many relationship that uses a custom table One-to-many relationship
When a course is held there must be a primary educator assigned.	<div>▼</div> Many-to-many relationship that uses a system generated table Many-to-many relationship that uses a custom table One-to-many relationship
When a course is held, the company needs to collect information on that session.	<div>▼</div> Many-to-many relationship that uses a system generated table Many-to-many relationship that uses a custom table One-to-many relationship

Reference:

Box 1: One-to-many relationship

Each educator can have 0, 1, or many qualifications

Box 2: One-to-many relationship

Each educator can be the primary educator for 0, 1 or many courses.

Box 3: Many-to-many relationship that uses a custom table.

Note: N:N (Many-to-Many): A table relationship that depends on a special Relationship table, sometimes called an Intersect table, so that many rows of one table can be related to many rows of another table.
