

# 3V0-23.25 Reliable Dumps Free & 3V0-23.25 Study Demo

Many people are difficult in getting the 3V0-23.25 certification successfully. If you also have trouble in passing your exam and getting your certification, we think it is time for you to use our Professional Level Exams quiz prep. If you choose our study materials and use our products well, we can promise that you can pass the exam and get the 3V0-23.25 Certification. Then you will find you have so many chances to advance in stages to a great level of social influence and success. Our 3V0-23.25 dumps torrent can also provide all candidates with our free demo, in order to exclude your concerns that you can check our products.

Students are worried about whether the 3V0-23.25 practice materials they have purchased can help them pass the exam and obtain a certificate. They often encounter situations in which the materials do not match the contents of the exam that make them waste a lot of time and effort. But with 3V0-23.25 exam dump, you do not need to worry about similar problems. Because our study material is prepared strictly according to the exam outline by industry experts, whose purpose is to help students pass the exam smoothly. As the authoritative provider of 3V0-23.25 Test Guide, we always pursue high passing rates compared with our peers to gain more attention from potential customers. In order to gain the trust of new customers, 3V0-23.25 practice materials provide 100% pass rate guarantee for all purchasers. We have full confidence that you can successfully pass the exam as long as you practice according to the content provided by 3V0-23.25 exam dump. Of course, if you fail to pass the exam, we will give you a 100% full refund.

## 3V0-23.25 Study Demo - Latest 3V0-23.25 Study Plan

The VMware 3V0-23.25 exam questions are the ideal and recommended study material for quick and easiest Advanced VMware Cloud Foundation 9.0 Storage (3V0-23.25) exam dumps preparation. The Advanced VMware Cloud Foundation 9.0 Storage (3V0-23.25) practice questions are designed and verified by qualified and renowned VMware Certification Exams trainers. They work closely and check all 3V0-23.25 Exam Dumps step by step. They also ensure the best possible answer for all 3V0-23.25 exam questions and strive hard to maintain the top standard of Advanced VMware Cloud Foundation 9.0 Storage (3V0-23.25) exam dumps all the time.

## VMware Advanced VMware Cloud Foundation 9.0 Storage Sample Questions (Q99-Q104):

NEW QUESTION # 99

An Operations Engineer is diagnosing a failure in the VCF "Add Host" workflow for an HCI Workload Domain. The workflow successfully added the ESXi host to the vSphere cluster but failed during the storage claiming phase.

The engineer queries the vSAN disk configuration status on the target host via RVC:

...

[RVC Output: vsan.host\_info ~host]

Host: esx-10.corp.local

vSAN Node UUID: 5e6a9...

Cluster State: Enabled

Disks:

naa.500... (Type: Flash, Capacity: 3.84 TB, State: In-Use [Cache])

naa.500... (Type: Flash, Capacity: 7.68 TB, State: In-Use [Capacity])

naa.500... (Type: HDD, Capacity: 12.0 TB, State: Unclaimed)

...

The VCF Workload Domain was defined at creation as "HCI - All-Flash vSAN".

How does the deep integration of SDDC Manager lifecycle automation with HCI architectural standards explain why this host expansion failed, and what is the underlying characteristic of VCF HCI? (Select all that apply.)

- A. The engineer must manually SSH into the host and force-claim the HDD as an All-Flash capacity drive to bypass the VCF safety check.
- B. SDDC Manager automatically rejected the disk claiming step because it detected an asymmetrical capacity footprint compared to existing hosts, which is forbidden in HCI.
- C. The host has effectively partitioned the HCI cluster because traditional SAN storage cannot be mixed with HCI storage within the same VCF cluster.
- D. HCI collapses storage management into the hypervisor, but VCF enforces strict homogeneous Validated Design templates. The presence of a spinning HDD disk in a host targeted for an "All-Flash" cluster violates the architectural constraint.
- E. The core benefit of HCI in VCF is automated Day-2 operations; however, this requires hardware to perfectly match the defined storage topology. The workflow aborted to prevent degrading the cluster into a Hybrid state.

**Answer: D,E**

#### NEW QUESTION # 100

A Compliance Auditor is investigating a VCF 9.0 Stretched Cluster failover event. The cluster uses vSAN Data-at-Rest Encryption (D@RE) tied to an external Key Management Server (KMS) cluster.

...

[Log Snippet: vpxd.log - Site A Failure]

2026-11-20T10:00:00Z FATAL hostd [Site A] - Power lost.

2026-11-20T10:00:05Z INFO vpxd - Quorum maintained via Witness + Site B.

2026-11-20T10:00:10Z INFO vpxd - Initiating HA Restart on Site B hosts.

2026-11-20T10:00:15Z WARN vpxd - KMS Server 'KMS-SiteA-01' unreachable.

...

How do the deep architectural dependencies between vSAN Encryption, vSphere HA, and KMS topology ensure the encrypted VMs successfully restart on Site B despite the loss of the Site A KMS? (Select all that apply.)

- A. The Witness Appliance automatically functions as a backup Key Provider when the primary KMS server fails.
- B. VCF automatically replicates the cleartext encryption keys across the vSAN Inter-Site Link to prevent lockouts.
- C. Site B hosts must independently retrieve the Key Encryption Key (KEK) from the surviving KMS instance in the KMS cluster (KMS-SiteB-02) to unwrap the local Disk Encryption Keys (DEKs).
- D. If the Site B ESXi hosts were cold-rebooted during the power outage, they would require active communication with the surviving KMS to mount the vSAN datastore.
- E. vSAN maintains standard storage accessibility because the ESXi hosts on Site B hold the KEKs in their local secure memory cache; they do not need to query the KMS to continue standard I/O during a failover.

**Answer: C,D,E**

#### NEW QUESTION # 101

A CTO is auditing the billing and licensing model for a new VCF 9.0 environment. The environment consists of a standard vSAN ESA cluster (hyper-converged) and a centralized vSAN Max cluster (Disaggregated storage-only).

...

[UI - vSAN Performance View > Licensing Status]

Cluster A (vSAN ESA - HCI): 16 Hosts, 512 Cores, 200 TiB

Cluster B (vSAN Max - Storage Only): 8 Hosts, 256 Cores, 1 PiB

...

Which statement accurately defines the fundamental difference in how these two VCF architectures consume vSAN license entitlements?

- A. The compute nodes mounting the vSAN Max cluster must double their VCF license consumption to cover the remote storage array connectivity.
- B. Both clusters consume the exact same "per-core" VMware Cloud Foundation (VCF) subscription license model, meaning the 1 PiB of storage in Cluster B incurs no additional capacity costs.
- C. vSAN Max requires a specialized hardware DPU license for the Top-of-Rack switches, whereas ESA uses software-only keys.
- **D. Cluster A (HCI) is licensed traditionally per CPU core (VCF Subscription), whereas Cluster B (vSAN Max) abandons the core metric and is licensed strictly on a "per-TiB of raw capacity" subscription model.**

**Answer: D**

### NEW QUESTION # 102

An L3 Support Engineer is analyzing the state of a VM scheduled for imminent SRM migration. The VM uses both Local Protection (vSAN FTT=1) and Remote Protection (vSphere Replication).

The engineer runs an esxcli query on the local host to check the object health.

...

```
[root@esx-03:~] esxcli vsan debug object list -u 554350...
```

```
Object UUID: 554350... (SRM-Web-01)
```

```
Policy: FTT=1 (RAID-1)
```

```
Component 1: ACTIVE (esx-03)
```

```
Component 2: ABSENT (esx-05 - Host Unreachable)
```

```
Witness: ACTIVE (esx-06)
```

```
vSphere Replication State: OK (RPO 15m)
```

...

Based on the intersection of the local vSAN state and the remote vSphere Replication mechanics, which TWO operational behaviors are accurate for this degraded object? (Choose 2.)

- A. The SRM failover is blocked because the local "ABSENT" flag prevents the vCenter database from un-registering the VM.
- B. The ESXi host must wait for the ABSENT component to finish rebuilding (60-minute CLOM timer) before standard I/O resumes.
- **C. The VM remains fully operational on the primary site because the local vSAN object maintains quorum (2 of 3 votes are ACTIVE).**
- D. vSphere Replication is automatically suspended because the replication agent cannot read from degraded FTT=1 components.
- **E. SRM can still successfully failover this VM to the remote site, because the asynchronous vSphere Replication engine continues copying data from the ACTIVE Component 1.**

**Answer: C,E**

### NEW QUESTION # 103

An L3 Support Engineer is auditing the Storage Policy Based Management (SPBM) overhead for a highly transactional database running on the new log-structured vSAN Express Storage Architecture (ESA).

The customer wants to apply inline compression alongside the fault tolerance rules to minimize capacity overhead.

...

```
[Storage Policy Rule View]
```

```
Policy: DB-Max-Efficiency
```

```
FailuresToTolerate: 2 (RAID-6)
```

```
Compression: Enabled
```

...

How does the vSAN ESA architectural pipeline process compression and FTT overhead, and what is the net impact on cluster capacity? (Select all that apply.)

- A. In vSAN ESA, compression occurs at the DOM Client layer (top of the stack) \*before\* the data is duplicated or erasure-coded across the network; this means the FTT multiplier (1.5x for RAID-6) is applied to the already reduced, compressed data payload.
- B. Activating compression natively disables the Operations Reserve because the compressed blocks are too variable to accurately track.
- C. In ESA, FTT calculations reserve physical disk space based on the uncompressed VMDK size, meaning enabling compression provides network benefits but no local disk space savings.
- D. Highly compressible data combined with RAID-6 provides the maximum effective storage capacity in ESA, often exceeding standard NAS utilization rates.
- E. The compression engine in ESA strictly analyzes 4KB blocks; highly uncompressible encrypted database files may see zero space reduction, meaning the FTT overhead relies purely on raw math.

Answer: A,D,E

## NEW QUESTION # 104

.....

To ensure a more comfortable experience for users of 3V0-23.25 test material, we offer a thoughtful package. Not only do we offer free demo services before purchase, we also provide three learning modes of 3V0-23.25 learning guide for users. With easy payment and thoughtful, intimate after-sales service, believe that our 3V0-23.25 Exam Guide Materials will not disappoint users. Last but not least, our worldwide service after-sale staffs will provide the most considerable and comfortable suggestion on 3V0-23.25 study prep for you in twenty -four hours a day, as well as seven days a week incessantly.

**3V0-23.25 Study Demo:** [https://www.actual4test.com/3V0-23.25\\_examcollection.html](https://www.actual4test.com/3V0-23.25_examcollection.html)

VMware 3V0-23.25 Reliable Dumps Free All of these will bring a brighter future for you, VMware 3V0-23.25 Reliable Dumps Free You can trust us because our professional staff has checked for many times, VMware 3V0-23.25 Reliable Dumps Free Many people may lose their jobs due to the invention of robots, VMware 3V0-23.25 Reliable Dumps Free Of course, you can also experience it yourself, VMware 3V0-23.25 Reliable Dumps Free All your questions will be treated and answered fully and promptly.

Open the Brush panel, and modify the brush so the Opacity varies with pressure, 3V0-23.25 How and when do you relax, All of these will bring a brighter future for you, You can trust us because our professional staff has checked for many times.
