## HPE7-A11 Braindumps Pdf - New HPE7-A11 Test Blueprint

Our HPE7-A11 exam questions are highly praised for their good performance. Customers often value the functionality of the product. After a long period of research and development, our HPE7-A11 learning materials have been greatly optimized. We can promise you that all of our HPE7-A11 practice materials are completely flexible. In addition, we have experts who specialize in research optimization, constantly update and improve our learning materials, and then send them to our customers. We take client's advice on HPE7-A11 training prep seriously and develop it with the advices.

## HPE Network Campus Access Professional Architect Exam Sample Questions (Q94-Q99):

### NEW QUESTION # 94

Drag and Drop Question

You are going with a 3-tier design and need to calculate the oversubscription ratio on the Access, Distribution, Core, and ToR Layer. What is a suitable oversubscription ratio for each layer?

Answer:

Explanation:

### NEW QUESTION # 95

You are responding to the customer's RFP and are at the point of documenting design decisions that were not specified in the RFP or the RFP questions. What are valid examples of assumptions made that should be presented to the customer during the response? (Select three)

- A. Vendor equipment availability will meet customer project timelines.
- B. The customer budget is sufficient to afford the proposed solution.
- C. The customer has technical staff that is capable of implementing the proposed equipment.

- D. Sufficient space and power exist to rack and turn up the proposed equipment.
- E. Adequate virtual machine resources exist to successfully install required or optional management systems.
- F. Optional monitoring systems (syslog, How collectors) exist.

**Answer: C,D,E**

#### NEW QUESTION # 96

ACME retail has 38 locations spread out across Ave US states and two provinces in Canada.

They are looking to grow 20% over the next two years. They have an HO with a staff of 200 employees. The organization has eight Regional Managers and two VPs who work from home and the road. Stores typically have 17 employees on average per location. The two warehouses have a remote loading system and 20 employees each to load the trucks and fulfill the online orders. The warehouse has 40-foot ceilings and large metal racks to store inventory. The main location is 240K sq ft (22300 st) m) and the Canadian warehouse is 130K sq ft (12100 sq ml. The forklifts on the loading docks are equipped with a wireless tablet on board. A typical store is reportedly about 60,000 sq ft (5575 sqm) and smaller stores are planned at 25,000 sq ft '2320 sq mi. The locations need to expand the abilities to vendors that need to add setup displays or Interactive kiosks in the stores. The current Infrastructure was installed in 2015 and used wireless N technology in a coverage model. The wiring is Cat5, and they are unsure of the fiber connections. The inventory is all placed on the floor when it is delivered to the local store. Inventory control is handled through Zebra barcode scanners, and they have had a lot of issues in getting signals throughout the stores and this makes monthly inventory difficult. The organization has a small help desk to troubleshoot issues that happen at the retail locations and PC support for the office. The company is looking to upgrade away from the current pbx system later this year. With the need to grow and cut costs, they are interested in moving the data to the cloud but need to get almost real-time inventory control for the online service to function.

The network has all been wired over the last ten years, but with the new systems being all wireless, they have seen the trend to offer wireless to all the vendors for their needs but also would like to allow employees, guests, and contractors all to use it. With the new IT director starting next week, the project has been set by the CTO of the company. The marketing group has asked how they can interact with the customers and get more info, while the IT support desk needs to cut staff in half. The office has an MDF and two IDF's located on floors one and two.

The HOF is in the basement, and you have multiple WAN circuits for the HO links. Each store has a local handoff from the cable company (ethernet) in the middle of the store in the office, so distance for the wiring is not an issue. The customer has budget concerns but does want something that could last 7+ years. What are two primary concerns of the Stakeholder' (Select two.)

- A. expansion
- B. cost of solution
- C. ease of access
- D. future proof

**Answer: B,D**

Explanation:

For the stakeholders at ACME Retail, the primary concerns include the cost of the solution and ensuring that the solution is future-proof. Given the company's budget concerns, it is crucial that the chosen network infrastructure offers a good return on investment and aligns with their financial constraints. At the same time, considering the company's growth plans and the rapid evolution of technology, the solution must be scalable and adaptable to future needs. This involves selecting networking equipment and technologies that can support emerging trends, such as increased wireless device usage, cloud computing, and advanced security requirements, without necessitating frequent, costly upgrades. Balancing these concerns will help ACME Retail achieve its operational goals while positioning itself for sustainable growth and innovation.

#### NEW QUESTION # 97

What are two concerns for C-level executives and managerial stakeholders? (Choose two.)

- A. What management tool would enable simplified access to network resources?
- B. What is the projected growth for the company and how will this affect critical business requirements?
- C. Which CX supported routing protocols can scale the network during an upcoming building addition to the campus?
- D. How to address admin support staff concerns with the additional training required for a non-homogeneous vendor approach?
- E. How to minimize the total cost of ownership which considering proposals for network expansion?

**Answer: B,E**

Explanation:

C-level and managerial stakeholders focus on strategic and financial considerations, such as anticipated business growth and how it impacts requirements, as well as minimizing total cost of ownership when evaluating solutions.

### NEW QUESTION # 98

The client's existing network is experiencing trouble with voice occasionally dropping out on phone calls between office locations. It is determined that no packet loss is occurring and QoS is likely the cause. With what phenomenon is the client currently experiencing issues?

- A.
- B.
- C.

**Answer: A**

Explanation:

The client is experiencing issues with Jitter, as depicted in Option B. Jitter refers to the variation in time between packets arriving, caused by network congestion, timing drift, or route changes. In voice communications, jitter can manifest as the occasional dropping out of voice on phone calls because the variable delay can affect the steady stream of voice packets needed for a clear conversation. Even when there is no packet loss, high levels of jitter can significantly impact the quality of Voice over IP (VoIP) calls. Quality of Service (QoS) settings are essential in managing jitter, as they can prioritize voice traffic over other types of data, ensuring that voice packets are delivered consistently and in the correct order to minimize delays and prevent call quality degradation. Aruba Campus Access solutions would typically include QoS features to manage and mitigate jitter on the network.

### NEW QUESTION # 99

.....

There is always a fear of losing HPE7-A11 exam and this causes you loss of money and waste time. There is no such scene with DumpTorrent. Your money and exam attempt is bound to award you a sure and definite success with 100% money back guarantee. You can claim for the refund of money if you do not succeed and achieve your target.
