## Practice Exam Questions for: Nokia Data Center Fabric Fundamentals (exam number: 4A0-D01)

The following questions will test your knowledge and prepare you for the Nokia Data Center Fabric Fundamentals exam. Compare your responses with the Answer key at the end of the document.

1. A static route is configured in two steps in Nokia SR Linux. Which of the following items CAN NOT be configured in the static-routes container?
  - a. A blackhole option
  - b. An IPv4 destination prefix
  - c. A preference value
  - d. A next-hop-group
2. Which of the following about the leaf-spine topology (Clos network) is FALSE?
  - a. Every leaf router is connected to all spine routers.
  - b. Scaling can be achieved by adding an additional spine layer.
  - c. Layer 2 is typically used at the aggregation and access layers.
  - d. The leaf-spine topology uses ECMP to distribute traffic across duplicate links.
3. Which of the following is one of the recommendations for AS-number assignment in a leaf-spine network?
  - a. Assign the same AS number to all spine routers in a cluster
  - b. Assign public AS numbers to all leaf and spine routers
  - c. Assign a distinct AS number to all super spine routers
  - d. Assign the same AS number to all leaf routers
4. Which of the following is NOT a characteristic of Nokia's SR Linux?
  - a. YANG model defines the configuration and state information for each application
  - b. Each individual Linux application uses a distinct IP-VRF
  - c. Applications can be accessed through JSON-RPCs
  - d. Third-party defined applications can access the SR Linux applications

Learn the importance of self-evident, and the stand or fall of learning outcome measure, in reality of hiring process, for the most part through your grades of high and low, as well as you acquire the qualification of how much remains. Therefore, the 4A0-D01 practice materials can give users more advantages in the future job search, so that users can stand out in the fierce competition and become the best. Actually, just think of our 4A0-D01 Test Prep as the best way to pass the exam is myopic. They can not only achieve this, but ingeniously help you remember more content at the same time.

## Nokia 4A0-D01 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• SR Linux Logging, Monitoring, and Filtering: This section of the exam measures skills of a Data Center Network Engineer and addresses how to implement logging, monitoring, and traffic filtering in SR Linux. It explains log file usage, ACL types, CPM filtering, and packet capture filters. Configuration tasks involve applying ACLs and monitoring network activity using capture tools.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>SR Linux User and System Management: This section of the exam measures skills of a Network Automation Specialist and includes managing user roles, TLS configurations for secure communication, and automation features like Zero-Touch Provisioning (ZTP). It covers ZTP setup, configuration processes, and common issues that may arise during deployment.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Module 5 – EDA (Event Driven Automation) Introduction</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>SR Linux Configuration and Routing: This section of the exam measures skills of a Network Automation Specialist and focuses on configuring and managing SR Linux systems. It examines the YANG-driven CLI, JSON output, environment variables, and static and dynamic routing. Learners also explore BGP, ECMP, IP-VRF, MAC-VRF, and the use of VXLAN with EVPN to implement both Layer 2 and Layer 3 overlays, including symmetric and asymmetric models.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Nokia DC Fabric Solution: This section of the exam measures skills of a Data Center Network Engineer and covers the architecture and benefits of modern Layer 3 data center networks. It includes an overview of BGP-based routing, VXLAN and EVPN overlays for multi-tenant environments, and key features of the SR Linux operating system. The section also explains how APIs are used for external configuration and introduces the Fabric Services System's management capabilities.</li> </ul>

## Download 4A0-D01 Fee - Valid Test 4A0-D01 Tips

Generally speaking, the clients will pass the test if they have finished learning our 4A0-D01 test guide with no doubts. The odds to fail in the test are approximate to zero. But to guarantee that our clients won't suffer the loss we will refund the clients at once if they fail in the test unexpectedly. The procedures are very simple and the clients only need to send us their proofs to fail in the 4A0-D01 test and the screenshot or the scanning copies of the clients' failure scores. The clients can consult our online customer staff about how to refund, when will the money be returned backed to them and if they can get the full refund or they can send us mails to consult these issues.

## Nokia Data Center Fabric Fundamentals Exam Sample Questions (Q14-Q19):

### NEW QUESTION # 14

Based on the exhibit output, which of the following is NOT the reason the user runs the "baseline diff" command?

- A. User admin notices that "!" appears in the CLI prompt.
- B. Another user has committed changes.
- C. User admin is not able to commit their changes.**
- D. User admin wants to check if there are differences between the current running config and their baseline datastore.

**Answer: C**

Explanation:

The "baseline diff" command is used to compare the candidate configuration against the baseline datastore to see changes or conflicts, especially when multiple users are involved or to verify differences. It does not indicate that the user is unable to commit changes.

### NEW QUESTION # 15

Which of the following is NOT a function of Nokia's SR Linux application manager?

- A. It manages the SR Linux and customer-defined applications.
- B. It translates the application's YANG model into protobufs for the IDB.**
- C. It reads the application's configuration information and starts each application.
- D. It monitors the health of all applications.

**Answer: B**

Explanation:

The SR Linux application manager does not perform the function of translating an application's YANG model into protobufs for the Interface DataBase (IDB). Its primary roles are managing applications, reading their configuration, and monitoring their health.

**NEW QUESTION # 16**

Which of the following statements about a CPM-filter policer is FALSE?

- A. CPM-filter entries can use both a distributed-policer and a system-cpu-policer.
- **B. The system-cpu-policer is hardware-based.**
- C. Hierarchical policing of control plane traffic is supported.
- D. The system-cpu-policer acts on the aggregate traffic from all line cards.

**Answer: B**

Explanation:

The system-cpu-policer in Nokia SR Linux is software-based, not hardware-based. It acts on aggregate control plane traffic and supports hierarchical policing with CPM-filter entries using both distributed and system-cpu-policers.

**NEW QUESTION # 17**

Which of the following statements about a MAC-VRF is FALSE?

- A. Bridge table entries contain an exit interface for each destination address.
- B. A MAC-VRF is a Layer 2 network instance.
- **C. Packets received in a MAC-VRF are forwarded based on destination IP address.**
- D. Multiple devices can be connected to the same IP subnet using a MAC-VRF.

**Answer: C**

Explanation:

In a MAC-VRF, packets are forwarded based on Layer 2 information such as destination MAC addresses, not on destination IP addresses.

**NEW QUESTION # 18**

When autoboot flag is set in grub.cfg, which of the following is NOT performed as part of the Zero Touch Provisioning (ZTP) autoboot process?

- A. Uses the Web or FTP server to provide the RPM packages and any necessary images
- **B. Uses Nokia's Fabric Services System to deploy the digital sandbox automatically**
- C. Uses the DHCP server to provide the IP address and default gateway
- D. Downloads and executes provisioning scripts

**Answer: B**

Explanation:

The ZTP autoboot process does not automatically use Nokia's Fabric Services System to deploy the digital sandbox; it focuses on network boot, DHCP IP assignment, and downloading/executing provisioning scripts from web or FTP servers.

**NEW QUESTION # 19**

.....

Our 4A0-D01 free demo provides you with the free renewal in one year so that you can keep track of the latest points happening in the world. As the questions of our 4A0-D01 exam dumps are involved with heated issues and customers who prepare for the 4A0-D01 Exams must haven't enough time to keep trace of 4A0-D01 exams all day long. In this way, there is no need for you to worry about that something important have been left behind. Therefore, you will have more confidence in passing the exam.
