- D. Define a storage type for a yard in each warehouse number and connect the two storage types with a parking space

Answer: B

Explanation:
Comprehensive and Detailed In-Depth Explanation:
Yard management in SAP EWM manages vehicle movements. Option B ("Define a storage type for a yard in one of the warehouse numbers, and connect the yard with doors to the other warehouse number") iscorrect because a single yard storage type (e.g., "YARD") is defined in one warehouse number, and doors link it to the other, configured in SPRO: SCM Extended Warehouse Management > Yard Management > Define Yard Storage Type. Options A, C, and D overcomplicate the setup with unnecessary duplication or incorrect connections (e.g., checkpoints, parking spaces).
