NEW QUESTION # 32

You are trying to initiate an authorization request from FortiGate to FortiAnalyzer, but the Security Fabric window does not open when you click Authorize.

Which two reasons can cause this to happen? (Choose two.)

- A. A pre-shared key needs to be established on both sides.
- B. The Security Fabric root is unauthorized and needs to be added as a trusted host.
- **C. The management computer does not have connectivity to the authorization IP address and port combination.**
- **D. The fabric authorization settings on FortiAnalyzer are misconfigured.**

Answer: C,D

Explanation:

B. The management computer does not have connectivity to the authorization IP address and port combination. If the FortiGate cannot reach the FortiAnalyzer on the configured IP address and port (typically HTTPS), the authorization request will fail.
