Efficient Study C-BCBAI-2502 Center to Obtain SAP Certification

There are three versions C-BCBAI-2502 exam bootcamp, you can choose one according to your preference. C-BCBAI-2502 PDF version can both practice in the electronic device and in the paper, if you like to practice on paper, and you just need to print them. C-BCBAI-2502 Soft exam engine can simulate the real exam environment, and this version will help you to know the process of the exam, so that you can relieve your nerves. C-BCBAI-2502 Online Exam engine supports all web browsers, and it can also have a performance review, therefore you can have a review of about what you have learned.

SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q49-Q54):

NEW QUESTION # 49

If a company implements SAP's Business AI offerings comprehensively, all things being equal, which bottom-line benefits could they expect? Note: There are 2 correct answers to this question.

- A. Revenue increase: up to 1.4%
- B. Revenue increase: up to 3.5%
- C. Gross profit increase: up to 3.5%
- D. Gross profit increase: up to 1.4%

Answer: B,D

Explanation:

Implementing SAP Business AI comprehensively can lead to significant financial benefits. According to SAP's official documentation, businesses can expect:

- * An estimated 1.4% increase in gross profits.
- * An estimated 3.5% increase in revenue.

These figures are based on SAP's analysis of the impact of AI-driven efficiencies and enhancements across various business processes. For instance, a company with €10 billion in revenue could see an annual bottom-line benefit of €141 million and a revenue impact of €352 million.

NEW QUESTION # 50

A logistics company is looking to reduce delivery delays and improve inventory management. Which SAP AI-powered solutions should they implement?

There are 3 correct answers to this question.

Response:

- A. SAP Digital Manufacturing Cloud
- B. SAP BusinessObjects Planning
- C. SAP Cloud ERP
- D. SAP Predictive Analytics
- E. SAP AI Business Service

Answer: A,D,E

NEW QUESTION # 51

(What is Machine Learning?)

- A. AI systems that use self-supervised learning on vast data to perform a variety of tasks, such as writing documents or creating images.

- **B. A subset of AI that focuses on enabling computer systems to learn and improve from experience or data, incorporating elements from fields like computer science, statistics, and psychology.**
- C. A form of deep learning that utilizes foundation models, like large language models, to create new content, including text, images, sound, and videos, based on the data it was trained on.
- D. A technology that equips machines with human-like capabilities such as problem-solving, visual perception, speech recognition, decision-making, and language translation.

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: Machine Learning is defined as a subset of AI that enables computer systems to learn and improve from experience or data, incorporating elements from fields like computer science, statistics, and psychology. This distinguishes it from general AI, generative AI, or foundation models, focusing on data-driven learning without explicit programming.

Exact extracts supporting this:

"Machine learning is a subset of artificial intelligence (AI) in which computers learn from data and improve with experience without being explicitly programmed."sap.com

"Machine learning (ML) is a subset of AI that enables computer systems to learn and improve from experience or data, and incorporates elements from fields like computer science, statistics, and psychology."sap.com

"Machine learning is a subset of artificial intelligence (AI). It is focused on teaching computers to learn from data and to improve with experience - instead of..."learning.sap.com Other options are incorrect because:

Option A: This describes foundation models or generative AI systems that use self-supervised learning for multi-task performance, not specifically machine learning.

Option C: This refers to generative AI, a specific application of deep learning using foundation models for content creation.

Option D: This defines artificial intelligence in general, encompassing human-like capabilities beyond just learning from data.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Drawn from the SAP product page "What is Machine Learning?" and the SAP Learning course "Discovering SAP Business AI," which positions machine learning as a foundational subset of AI within SAP Business AI solutions integrated into the SAP Business Suite. Supported by SAP Help Portal glossaries and community blogs, as aligned with C_BCBAI_2502 certification for explaining AI concepts.

NEW QUESTION # 52

Which SAP AI-powered tool enhances financial forecasting accuracy? Please choose the correct answer.

- A. SAP AI Business Services
- **B. SAP Predictive Analytics**
- C. SAP SuccessFactors
- D. SAP Intelligent Robotic Process Automation

Answer: B

Explanation:

SAP Predictive Analytics is the primary AI-powered tool for enhancing financial forecasting accuracy, leveraging advanced analytics to predict financial trends. The correct answer is SAP Predictive Analytics, as it is explicitly designed for this purpose.

SAP documentation states: "SAP Predictive Analytics, embedded in solutions like SAP S/4HANA, enables organizations to enhance financial forecasting accuracy by analyzing historical and real-time data to predict trends and outcomes." For example, it supports "forecasting expected incoming payments" and "predicting financial risks" in SAP Collections Management, allowing organizations to optimize cash flow and make data-driven decisions. The solution uses machine learning to "improve the accuracy of financial forecasts" by identifying patterns and anomalies in financial data.

The incorrect options are not focused on financial forecasting. SAP AI Business Services provide broader AI capabilities, such as document processing, but are not specific to forecasting. SAP Intelligent Robotic Process Automation automates repetitive tasks, not predictive analytics. SAP SuccessFactors focuses on HR processes, not financial forecasting. SAP Predictive Analytics' role in financial solutions, as seen in SAP S

/4HANA, confirms its suitability for this purpose.

NEW QUESTION # 53

Which of the following are features of the clean core dashboard? Note: There are 2 correct answers to this question.

- A. It can be used in all SAP S/4HANA Cloud editions
- **B. Customers can grant access to the dashboard to partners**
