

Test NSE6_FNC_AD-7.6 Sample Questions, Reliable NSE6_FNC_AD-7.6 Exam Papers

Maybe now you are leading a quite comfortable life. But you also need to plan for your future. Getting the NSE6_FNC_AD-7.6 training guide will enhance your ability. Also, various good jobs are waiting for you choose. Your life will become wonderful if you accept our guidance on NSE6_FNC_AD-7.6 study questions. We warmly welcome you to try our free demo of the NSE6_FNC_AD-7.6 preparation materials before you decide to purchase.

Fortinet NSE6_FNC_AD-7.6 Exam Syllabus Topics:

Section	Objectives
Concepts and Initial Configuration	- Explain isolation networks and the configuration wizard - Model and organize infrastructure devices
Integration	- Configure and use FortiNAC-F Manager - Integrate with third-party devices using Syslog and SNMP traps - Configure mobile device management (MDM) integration
Network Visibility and Monitoring	- Manage guests and contractors - Troubleshoot network devices and device status - Use logging options - Configure device profiling
Deployment and Provisioning	- Configure and monitor high availability (HA) - Configure FortiNAC-F security policies - Configure access control on FortiNAC-F - Configure security automation

Reliable NSE6_FNC_AD-7.6 Exam Papers | Real NSE6_FNC_AD-7.6 Dumps

The first goal of our company is to help all people to pass the NSE6_FNC_AD-7.6 exam and get the related certification in the shortest time. Through years of concentrated efforts of our excellent experts and professors, our company has compiled the best helpful and useful NSE6_FNC_AD-7.6 test training materials, and in addition, we can assure to everyone that our NSE6_FNC_AD-7.6 Study Materials have a higher quality than other study materials in the global market. The NSE6_FNC_AD-7.6 learn prep from our company has helped thousands of people to pass the exam and get the related certification.

Fortinet NSE 6 - FortiNAC-F 7.6 Administrator Sample Questions (Q43-Q48):

NEW QUESTION # 43

In a wireless integration, what method does FortiNAC use to obtain connecting MAC address information?

- **A. RADIUS**
- B. Endstation traffic monitoring
- C. SNMP traps
- D. Link traps

Answer: A

NEW QUESTION # 44

An administrator wants to continually monitor endpoints for the existence of a specific registry key and the status of a required security service.

Which two requirements must be in place for the administrator to use FortiNAC-F compliance monitors? (Choose two.)

- A. Remediation admin scan
- B. MDM integration
- **C. Persistent agent**
- **D. Custom scan**

Answer: C,D

Explanation:

Compliance monitors require the persistent agent to continuously evaluate endpoint conditions such as registry keys and service status. A custom scan must be defined to specify the exact registry key and security service checks that the monitor will assess on the endpoint.

NEW QUESTION # 45

An administrator wants FortiNAC-F to return a group of user-defined RADIUS attributes in RADIUS responses.

Which condition must be true to achieve this?

- A. The device models in the inventory view must be configured for proxy-based authentication.
- **B. Inbound RADIUS requests must contain the Calling-Station-ID attribute.**
- C. RADIUS accounting must be enabled on the FortiNAC-F RADIUS server configuration.
- D. The requesting device must support RFC 5176.

Answer: B

NEW QUESTION # 46

Refer to the exhibit. If a host is connected to a port in the Building 1 First Floor Ports group, what must also be true to match this user/host profile?

User/Host profile configuration

Name: Contractor Access

Who/What: ☒

Attributes (Satisfy Any of the Following)

Where:	Host	Role	Contractor	X	+
OR	Host	Persistent Agent	Yes	X	
AND	Host	Security Access Value	Contractor	X	+

RADIUS Attributes (Satisfy Any of the Following)

Groups: ☒ Any ☐ Any Of ☐ All Of ☐ None Of

Where: ☒

Locations: ☒ Any Of ☐ All Of ☐ None Of

Building 1 First Floor Ports X X

When: Mon, Tue, Wed, Thu, Fri 6:00 AM - 5:00 PM

Notes:

- A. The host must have a role value of contractor, an installed persistent agent or a security access value of contractor, and be connected between 6 AM and 5 PM.
- **B. The host must have a role value of contractor or an installed persistent agent and a security access value of contractor, and be connected between 6 AM and 5 PM.**
- C. The host must have a role value of contractor or an installed persistent agent, a security access value of contractor, and be connected between 9 AM and 5 PM.
- D. The host must have a role value of contractor or an installed persistent agent or a security access value of contractor, and be connected between 6 AM and 5 PM.

Answer: B

Explanation:

The User/Host Profile in FortiNAC-F is the fundamental logic engine used to categorize endpoints for policy assignment. As seen in the exhibit, the configuration uses a combination of Boolean logic operators (OR and AND) to define the "Who/What" attributes. According to the FortiNAC-F Administrator Guide, attributes grouped together within the same bracket or connected by an OR operator require only one of those conditions to be met. In the exhibit, the first two attributes are "Host Role = Contractor" OR "Host Persistent Agent = Yes".

This forms a single logical block. This block is then joined to the third attribute ("Host Security Access Value = Contractor") by an AND operator. Consequently, a host must satisfy at least one of the first two conditions AND satisfy the third condition to match the "Who/What" section.

Furthermore, the profile includes Location and When (time) constraints. The exhibit shows the location is restricted to the "Building 1 First Floor Ports" group. The "When" schedule is explicitly set to Mon-Fri 6:00 AM - 5:00 PM. For a profile to match, all enabled sections (Who/What, Locations, and When) must be satisfied simultaneously. Therefore, the host must meet the conditional contractor/agent criteria, possess the specific security access value, and connect during the defined 6 AM to 5 PM window.

"User/Host Profiles use a combination of attributes to identify a match. Attributes joined by OR require any one to be true, while attributes joined by AND must all be true. If a Schedule (When) is applied, the host must also connect within the specified timeframe for the profile to be considered a match. All criteria in the Who/What, Where, and When sections are cumulative."

NEW QUESTION # 47

Where should you configure MAC notification traps on a supported switch?

- A. On all ports except uplink ports
- B. Only on ports defined as learned uplinks
- **C. On all ports on the switch**
- D. Only on ports that generate linkup and linkdown traps

Answer: C

Explanation:

MAC notification traps must be enabled on all ports of a supported switch so FortiNAC-F can receive MAC address learning and movement events regardless of where endpoints connect.

This comprehensive coverage ensures accurate device discovery, tracking, and enforcement across the entire switch.

NEW QUESTION # 48

.....

NSE6_FNC_AD-7.6 certification training of our website is a tool to help students reflect their own strength. In recent years, too many graduates of elite schools are unable to find jobs. College students face unemployment when they graduate. This is unexpected when college students have just entered the campus. NSE6_FNC_AD-7.6 Exam Torrent also helps students enter famous enterprises. With the increasing numbers of university graduates, the prestigious school diploma is no longer a passport for entering a good company. In recruiting, the company pays more attention to the students' ability.
