

Exam Fortinet FCSS_SASE_AD-25 Actual Tests - Detail FCSS_SASE_AD-25 Explanation

BONUS!!! Download part of ExamCost FCSS_SASE_AD-25 dumps for free: <https://drive.google.com/open?id=12E5EBnj3WejgoOthInLNPYCDonbTbYx>

As an old saying goes: Practice makes perfect. Facts prove that learning through practice is more beneficial for you to learn and test at the same time as well as find self-ability shortage in FCSS_SASE_AD-25 test prep. The PC test engine of our FCSS_SASE_AD-25 exam torrent is designed for such kind of condition, when the system of the FCSS_SASE_AD-25 Exam Torrent has renovation of production techniques by actually simulating the test environment. Until then, you will have more practical experience and get improvement rapidly through our FCSS_SASE_AD-25 quiz guide.

Using FCSS_SASE_AD-25 exam guide allows you to learn without any obstacles anytime and anywhere. All FCSS_SASE_AD-25 exam materials in the platform include PDF, PC test engine, and APP test engine three modes. Among them, the PDF version of learning materials is easy to download and print into a paper version for practice and easy to take notes; PC version of FCSS_SASE_AD-25 training torrent can imitate real test environment and conduct time-limited testing, and the system will automatically score for you after the test; and APP version of FCSS_SASE_AD-25 exam guide supports any electronic device.

Detail FCSS_SASE_AD-25 Explanation - Study FCSS_SASE_AD-25 Test

Evaluate your own mistakes each time you attempt the desktop FCSS - FortiSASE 25 Administrator (FCSS_SASE_AD-25) practice exam. It expertly is designed FCSS_SASE_AD-25 practice test software supervised by a team of professionals. There is 24/7 customer service to help you in any situation. You can customize your desired FCSS_SASE_AD-25 Exam conditions like

exam length and the number of questions.

Fortinet FCSS - FortiSASE 25 Administrator Sample Questions (Q40-Q45):

NEW QUESTION # 40

Which statement best describes the Digital Experience Monitor (DEM) feature on FortiSASE?

- A. It can be used to request a detailed analysis of the endpoint from the FortiGuard team.
- **B. It provides end-to-end network visibility from all the FortiSASE security PoPs to a specific SaaS application.**
- C. It requires a separate DEM agent to be downloaded from the FortiSASE portal and installed on the endpoint.
- D. It can help IT and security teams ensure consistent security monitoring for remote users.

Answer: B

Explanation:

The Digital Experience Monitor (DEM) feature in FortiSASE is designed to provide end-to-end network visibility by monitoring the performance and health of connections between FortiSASE security Points of Presence (PoPs) and specific SaaS applications. This ensures that administrators can identify and troubleshoot issues related to latency, jitter, packet loss, and other network performance metrics that could impact user experience when accessing cloud-based services.

Here's why the other options are incorrect:

B . It can be used to request a detailed analysis of the endpoint from the FortiGuard team: This is incorrect because DEM focuses on network performance monitoring, not endpoint analysis. Endpoint analysis would typically involve tools like FortiClient or FortiEDR, not DEM.

C . It requires a separate DEM agent to be downloaded from the FortiSASE portal and installed on the endpoint: This is incorrect because DEM operates at the network level and does not require an additional agent to be installed on endpoints.

D . It can help IT and security teams ensure consistent security monitoring for remote users: While DEM indirectly supports security by ensuring optimal network performance, its primary purpose is to monitor and improve the digital experience rather than enforce security policies.

Fortinet FCSS FortiSASE Documentation - Digital Experience Monitoring Overview FortiSASE Administration Guide - Configuring DEM

NEW QUESTION # 41

Which two are required to enable central management on FortiSASE? (Choose two.)

- **A. FortiSASE central management entitlement applied to FortiManager.**
- **B. FortiManager and FortiSASE registered under the same FortiCloud account.**
- C. FortiSASE connector configured on FortiManager.
- D. The FortiManager IP address in the FortiSASE central management configuration.

Answer: A,B

Explanation:

According to the FortiOS Administration Guide, when configuring central management, a FortiManager Cloud entitlement must be present and the devices must share the same FortiCloud account for registration.

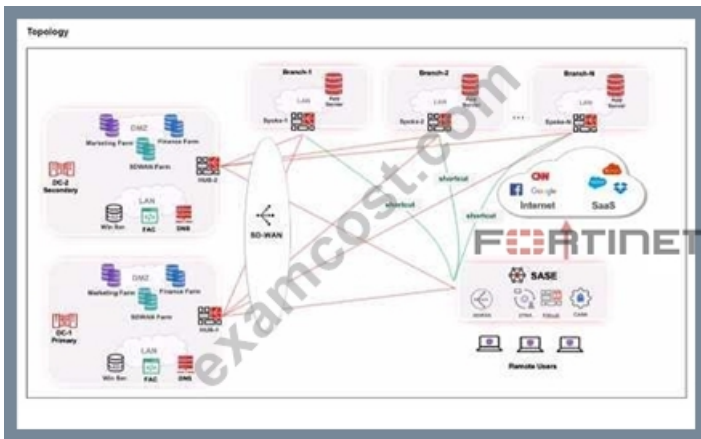

Specifically:

* "The FortiManager Cloud button can only be selected if you have a FortiManager Cloud product entitlement."

* "The FortiGate and FortiCloud license are registered to the same account." Thus, the two verified requirements are: B (entitlement) and D (same FortiCloud account).

NEW QUESTION # 42

Refer to the exhibits.

Priority settings

Set Priority		Ashburn - Virginia - USA	
<input type="checkbox"/>	Name	Priority	
<input type="checkbox"/>	HUB-1	P1	(Highest Priority)
<input type="checkbox"/>	HUB-2	P2	

When remote users connected to FortiSASE require access to internal resources on Branch-2, how will traffic be routed?

- A. FortiSASE will use the SD-WAN capability and determine that traffic will be directed to HUB-2, which will then route traffic to Branch-2.
- B. FortiSASE will use the AD VPN protocol and determine that traffic will be directed to Branch-2 directly, using a dynamic route
- C. FortiSASE will use the SD-WAN capability and determine that traffic will be directed to HUB-1, which will then route traffic to Branch-2.
- D. FortiSASE will use the AD VPN protocol and determine that traffic will be directed to Branch-2 directly, using a static route

Answer: B

NEW QUESTION # 43

What are two advantages of using zero-trust tags? (Choose two.)

- A. Zero-trust tags can be used to allow or deny access to network resources
- B. Zero-trust tags can determine the security posture of an endpoint.
- C. Zero-trust tags can be used to allow secure web gateway (SWG) access
- D. Zero-trust tags can be used to create multiple endpoint profiles which can be applied to different endpoints

Answer: A,B

NEW QUESTION # 44

Which statement describes the FortiGuard forensics analysis feature on FortiSASE?

- A. It can help customers identify and mitigate potential risks to their network.
- B. It can monitor endpoint resources in real-time.
- C. It can help troubleshoot user-to-application performance issues.
- D. It is a 24x7x365 monitoring service of your FortiSASE environment.

Answer: A

Explanation:

The FortiGuard forensics analysis feature on FortiSASE is designed to help customers identify and mitigate potential risks to their network. This feature provides detailed insights into suspicious activities, threats, and anomalies detected by FortiSASE. By analyzing logs, traffic patterns, and threat intelligence, FortiGuard forensics enables administrators to investigate incidents, understand their root causes, and take proactive measures to secure the network.

Here's why the other options are incorrect:

A . It can help troubleshoot user-to-application performance issues: Performance troubleshooting is typically handled by features like Digital Experience Monitoring (DEM) or application performance monitoring tools, not forensics analysis.

C . It can monitor endpoint resources in real-time: Real-time endpoint monitoring is a function of endpoint security solutions like FortiClient or FortiEDR, not FortiGuard forensics analysis.

D . It is a 24x7x365 monitoring service of your FortiSASE environment: While Fortinet offers managed services for continuous monitoring, FortiGuard forensics analysis is not a dedicated monitoring service. Instead, it focuses on post-incident investigation and risk mitigation.
