

CDCP Training Pdf Material & CDCP Latest Study Material & CDCP Test Practice Vce

Delivery Structure and Methods

The CDCP® course is lectured by an EPI Certified Instructor using a combination of lectures and question-and-answer sessions to discuss participants' specific needs and challenges experienced in their own data centre environments. Participants are able to tap into the extensive experience of the trainer enabling them to validate and improve their own environments thus adding tremendous business value.

CDCP® course is available in the following delivery methods:

- ILT – Instructor Led Training
- VILT – Virtual ILT
- TOD – Training On Demand

The classes are available on public schedule as well as private group training.

Examination

Certification exam is administered at the end of the last training day by an authorised training partner, either using paper-based or online format. The exam is a 60-minute closed book exam, with 40 multiple-choice questions. The candidate requires a minimum of 27 correct answers to pass the exam. Online exam results are known immediately and paper-based exam results will be known within one week.

Certification

Candidates who successfully pass the exam will receive the official 'Certified Data Centre Professional' certificate. The certification is valid for three years after which the student needs to re-certify. More information is available on the EPI corporate website at www.epi-ap.com.

Global Accreditation & Recognition

The CDCP® course material and exam are globally accredited by EXIN.

EXIN is a world leading provider of independent certification and accreditation in the IT and data centre sectors. EXIN is ISO-certified (ISO 9001:2008). Operating according to ISO 17024, ISO 27001 and EN 45011, EXIN continuously monitor the quality of exams and accreditations. More than 2 million professionals have been certified by EXIN worldwide. Candidates can take an EXIN exam in more than 125 countries and in more than 20 languages.

BICSI recognises CDCP® – Certified Data Centre Professional

training for BICSI Continuing Education Credits (CECs). CDCP® certificate holder will gain 13 CECs for all BICSI credentials.

Recommended Next Course

To further extend your skills, we recommend the CDFOM® and CDCS® courses. CDFOM® addresses the full operational aspect of running a high-available data centre. In CDCS®, participants will gain advanced knowledge to review designs of existing and/or future data centres. CDCS® is a 'must have' course for those who are expected to manage or be involved in a data centre build or renovation project. For full course outlines, visit the EPI website, www.epi-ap.com.

Course Schedule

Our courses are available in over 60 countries across all continents. For a comprehensive course schedule, visit the EPI corporate website at www.epi-ap.com or contact your local authorised reseller/partner.

EPI IT & Data Centre Framework®

The 'EPI IT & Data Centre Framework' provides IT & Data Centre Investors/Owners/Operators with a framework addressing all disciplines of a structured and fully managed IT & Data Centre environment. The framework addresses not only the site selection, design and outfitting of its physical facilities but also includes the IT & Data Centre strategy, governance and all processes required to organize and operate an IT & Data Centre environment which meets the business requirements of its customers. For more information visit www.epi-ap.com.

Keep making progress is a very good thing for all people. If you try your best to improve yourself continuously, you will that you will harvest a lot, including money, happiness and a good job and so on. The CDCP preparation exam from our company will help you keep making progress. Choosing our CDCP Study Material, you will find that it will be very easy for you to overcome your shortcomings and become a persistent person. Just come and buy our CDCP learning guide!

The study system of our company will provide all customers with the best study materials. If you buy the CDCP latest questions of our company, you will have the right to enjoy all the CDCP certification training materials from our company. More importantly, there are a lot of experts in our company; the first duty of these experts is to update the study system of our company day and night for all customers. By updating the study system of the CDCP Training Materials, we can guarantee that our company can provide the newest information about the CDCP exam for all people.

>> Online CDCP Tests <<

Choose The Right EXIN CDCP and Get Certified Today!

EXIN CDCP certification can guarantee you have good job prospects, because EXIN certification CDCP exam is a difficult test of

IT knowledge, passing EXIN Certification CDCP Exam proves that your IT expertise is strong and you can be qualified for a good job.

EXIN CDCP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Equipment Racks: It discusses power railstrip options, security considerations, and rack standards, properties and selection criteria.
Topic 2	<ul style="list-style-type: none">Fire SafetyProtection: This topic gives an understanding of standards for fire suppression, detection systems, total flooding fire suppression techniques, and handheld extinguishers. Additionally, it covers Signage and safety.
Topic 3	<ul style="list-style-type: none">Light: This topic covers light fixture types and placement, emergency lighting, and emergency Power Supply (EPS).
Topic 4	<ul style="list-style-type: none">Raised FloorSuspended Ceiling: The topic discusses applicable standards, signal reference grid, and disability act and regulations.
Topic 5	<ul style="list-style-type: none">Auxiliary Systems: The topic covers water leak detection systems, data centre monitoring requirements, EMS, BMS and DCIM.
Topic 6	<ul style="list-style-type: none">Physical Security and Safety: Sub-topics are about physical security considerations and physical safety considerations.
Topic 7	<ul style="list-style-type: none">Electro Magnetic Fields: The topic deals with effects of EMF on human health and equipment (H)EMP, standards, and EMF shielding solutions.
Topic 8	<ul style="list-style-type: none">Water Supply: This topic is all about water supply techniques and application areas.
Topic 9	<ul style="list-style-type: none">Power Infrastructure: It focuses ATS and STS systems, redundancy levels and techniques, static and dynamic UPS systems, battery types, thermo-graphics, and renewable energy factor (REF).
Topic 10	<ul style="list-style-type: none">Designing a Scalable Network Infrastructure: It covers ANSITIA-942 cabling hierarchy, network redundancy, structured Cabling System, and planning considerations.

EXIN Certified Data Centre Professional (CDCP) Sample Questions (Q54-Q59):

NEW QUESTION # 54

When dealing with glass door racks, cool air is injected into the rack from:

- A. The front door in a downflow direction.
- B. The rear door in a downflow direction.
- C. The top of the rack through the fans and vents mounted inside the rack.
- D. The bottom of the rack.

Answer: B

Explanation:

Glass door racks are a type of rack that have solid glass front doors and rear door heat exchangers (RDHx).

RDHx are devices that use facility coolant to absorb heat from the exhaust air of the IT equipment and return cool air to the room. RDHx can be either passive or active, depending on the fan configuration. In general, IT hardware within the rack is air-cooled and the door heat exchanger uses facility coolant to absorb heat from exhaust air to return air to the facility at or near inlet air temperature to the rack. This rear door heat exchanger can either be a passive or active solution. When dealing with glass door racks, cool air is injected into the rack from the rear door in a downflow direction. This means that the cool air flows from the top to the bottom of the rack, following the natural convection of the hot air rising. This way, the cool air can reach all the IT equipment in the rack and

prevent hot spots or overheating.

NEW QUESTION # 55

Which type of Humidifier is composed of water-filled canister containing electrodes?

- A. Ultrasonic Humidifier
- B. Infrared Humidifiers
- C. Water Canister Humidifier
- D. Steam Canister Humidifier

Answer: D

Explanation:

A steam canister humidifier is a type of humidifier that uses electricity to heat water in a canister containing electrodes. The water conductivity and the water level determine the amount of current and steam production.

The steam canister humidifier is also known as an electrode boiler humidifier or an electrode steam humidifier¹²³.

References: 1: EPI Data Centre Professional (CDCP) Reference Materials, page 192: Electrode and resistive type humidifiers compared | steamovap technologies inc³: Know-How | Electrode Steam Humidifier - Condair Group.

NEW QUESTION # 56

How many monitoring points should be used in Temperature Measurement?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

According to the EPI Data Centre Professional (CDCP) Reference Materials, the recommended number of monitoring points for temperature measurement in a data centre is 3 per rack: one at the top, one at the middle, and one at the bottom¹. This is to ensure that the temperature distribution within the rack is uniform and within the acceptable range for the equipment. The temperature sensors should be placed at the front of the rack, where the air enters the equipment, and not at the back, where the hot air exits¹.

References: 1: EPI Data Centre Professional (CDCP) Reference Materials, page 23.

NEW QUESTION # 57

A UPS has an internal battery tester, do you still need to separately test the batteries at block level?

- A. Testing batteries using the built-in battery tester or resting the batteries at block level does not increase the battery lifetime, therefore it is not recommended.
- B. No, as mentioned the battery tester is already built-in the UPS.
- C. Yes, the UPS will only test the batteries at string level which only gives an indication on the overall status of the battery string. Measurements at block level will provide more detailed information on the status and remaining lifetime of the batteries itself.
- D. No, the UPS will automatically generate and alarm when the battery voltage is too low to operate.

Answer: C

Explanation:

Block-level testing identifies weak or failing individual batteries that may not show up in string-level tests, enhancing overall system reliability.

NEW QUESTION # 58

Which type of copper wire is used for grounding the racks to the SRG?

- A. Thick copper cable to create better grounding.
- B. Copper cable with plastic insulation (isolation).
- C. Thin copper cable to keep the cost low for grounding.
- **D. Braided copper wire or flat copper strip.**

Answer: D

Explanation:

The type of copper wire that is used for grounding the racks to the SRG (signal reference grid) in a data centre is braided copper wire or flat copper strip, according to the CDCP Preparation Guide¹ and various web sources^{2,3,4}. Braided copper wire or flat copper strip are preferred over thin or thick copper cable for grounding purposes, because they have lower impedance and higher surface area, which allow better dissipation of electrical noise and interference. Moreover, braided copper wire or flat copper strip are more flexible and durable than copper cable, which make them easier to install and maintain. Braided copper wire or flat copper strip should be connected to the SRG using exothermic welding or other code-compliant methods, and should follow the relevant standards and codes, such as ANSI/TIA/EIA-607 and NFPA 70.
