How does the Demand Fulfillment view prioritize at-risk demands?

- A. Based on the number of associated recommendations required to make the demand no longer at risk
- B. Based on order value weighted by the number of compression days required to make the demand no longer at risk
- C. Based on the order value per customer weighted by the number of associated recommendations required to make the demand no longer at risk
- D. Based on order value weighted by the number of associated recommendations required to make the demand no longer at risk

答案：**D**

解題說明：
Review and Improve Your Demand Fulfillment
To improve the demand fulfillment of your plan, use the Demand Fulfillment table to review the at-risk demands in your plan and their related recommendations. You can take actions to accept recommendations from this page.
In the Demand Fulfillment UI, you can:
* View prioritized at-risk demands based on order values weighted by the number of associated recommendations.
* Take actions to accept or mark recommendations as complete.
* Review summary information provided for the current demand fulfillment position of your plan to analyze the potential for improvement based on selected at-risk demands. The information also provides an understanding of the expected demand fulfillment position based on accepted and completed recommendations.
To review and improve your demand fulfillment:
* In a Supply Planning, Planning Central, or Demand and Supply work area, select the Manage Plans task.
* On the Manage Plans page, search for and open your plan.
* In the Page Layout list, select Plan Summary.
Note that the tiles in the Plan Summary layout include a Demand at Risk in thousands tile.
* In the Demand at Risk in thousands tile, click the Select Tile bar to review the Demand at Risk Summary data.
You can review the demand at risk data through a treemap view or a table view, the treemap view is the default. To switch to the table view, click the Show Table icon.
* To review the demand at risk data:
* Using the treemap: Click an area in the treemap. Typically, you want to start with the area that has the highest demand at risk value. From the Drill To actions, click Demand Fulfillment.
* Using the table: Click the Show Table icon. In the Demand at Risk Summary table, click a cell.
Typically, you want to start with the cell that has the highest demand at risk value. From the Drill To actions, click Demand Fulfillment.
* The Demand Fulfillment UI shows the individual orders that are at-risk and their related recommendations.
Tip: You can open the Demand Fulfillment table directly without drilling from the Plan Summary. After you open a plan, click the Open button at the page level. In the Open Table, Graph, or Tile Set dialog box, search for and select the Demand Fulfillment table.
In the Demand Fulfillment UI, you can search for at-risk demands by using the filter fields in the search panel.
