Pass Guaranteed Quiz 2026 Newest Nutanix New NCM-MCI-6.10 Exam Vce

The industry experts hired by NCM-MCI-6.10 exam materials are those who have been engaged in the research of NCM-MCI-6.10 exam for many years. They have a keen sense of smell in the direction of the exam. Therefore, they can make accurate predictions on the exam questions. Therefore, our study materials specifically introduce a mock examination function. With NCM-MCI-6.10 exam materials, you can not only feel the real exam environment, but also experience the difficulty of the exam. You can test your true level through simulated exams. At the same time, after repeated practice of NCM-MCI-6.10 study braindumps, I believe that you will feel familiar with these questions during the exam and you will feel that taking the exam is as easy as doing exercises in peace.

The PassCollection is a leading and reliable platform that has been offering real, valid, and updated Nutanix Certified Master - Multicloud Infrastructure (NCM-MCI) (NCM-MCI-6.10) exam practice test questions for many years. Over this long time period thousands of candidates have passed their dream Nutanix Certified Master - Multicloud Infrastructure (NCM-MCI) (NCM-MCI-6.10) certification exam. And the one thing has come in their success that was the usage of top-notch NCM-MCI-6.10 Exam Practice test questions. So you can also get help from PassCollection practice test questions and make the Nutanix NCM-MCI-6.10 exam preparation simple, smart and quick.

New New NCM-MCI-6.10 Exam Vce | High-quality New NCM-MCI-6.10 Exam Test: Nutanix Certified Master - Multicloud Infrastructure (NCM-MCI)

In general, we can say that the NCM-MCI-6.10 certification can be a valuable investment in your career that will put your career on the right track and you can achieve your career objectives in a short time period. These are some important benefits that you can gain after passing the Nutanix NCM-MCI-6.10 Certification Exam. Are you ready to pass the NCM-MCI-6.10 exam? Looking for a simple, quick, and proven way to pass the Nutanix NCM-MCI-6.10 Exam Questions? If your answer is yes then download PassCollection exam questions and start this journey today.

Nutanix Certified Master - Multicloud Infrastructure (NCM-MCI) Sample Questions (Q18-Q23):

NEW QUESTION # 18
An administrator is experiencing an unidentified issue which is causing inode exhaustion on CVMs in Cluster
1. The time between receiving alerts and exhaustion is too short; the administrator needs to lower the alert thresholds to allow more

time to clean up inodes until the issue has been identified and resolution implemented.

From Prism Element, modify the appropriate alert policy setting critical threshold for Cluster 1 to 60% and warning threshold to 45%. Ensure the check runs every minute and is not resolved without administrator action.

Answer:

Explanation:

See the Explanation below for detailed answer.

Explanation:

Here is the step-by-step solution to modify the alert policy from the Prism Element (PE) interface for Cluster 1.

1. Access Cluster 1 Prism Element

* From the main Prism Central dashboard, navigate to Hardware > Clusters.

* Find Cluster 1 in the list and click its name. This will open the specific Prism Element login page for that cluster.

* Log in to Cluster 1's Prism Element interface.

2. Modify the Alert Policy

* In the Cluster 1 PE interface, click the gear icon (Settings) in the top-right corner.

* From the left-hand menu, select Alert Policies.

* In the search bar, type inode to find the correct policy.

* Select the checkbox for the policy named cvm_inode_usage_high.

* Click the Update button.

* In the "Update Alert Policy" dialog, configure the following settings:

* Warning Threshold (%): Change the value to 45.

* Critical Threshold (%): Change the value to 60.

* Check Interval (Secs): Change the value to 60 (to run the check every minute).

* Auto Resolve: Uncheck this box (to ensure the alert is not resolved without administrator action).

* Click Save.

NEW QUESTION # 19
TASK 1

A newly created Windows VM "SQL02" is experiencing poor storage performance when compared to "SQL01" running within the same cluster, on the same storage container.

The cluster is in a healthy state.

Create a new session named Monitor SQL02 with meaningful metrics. Right click on the session page and click Select All then paste this into Notepad and save it as Task 1.txt on the desktop.

Also, save the analysis as a report named MonitorSQL02 and send the report as a PDF on a daily basis to perf_group@ACME.org. Reports should not be retained. If any new objects need to be created, use monitovm2 in the name.

Finally, correct the issue within "SQL02".

Notes:

* Do not power on the VMs.

* While you will be creating a session, you will need to examine the VM configurations to determine the issue.

* Do not delete the VM to resolve the issue, any other destructive change is acceptable.

Answer:

Explanation:

See the Explanation below for detailed answer.

Explanation:

Here is the step-by-step solution to all three tasks, performed within the Nutanix Prism interface.

Task 1: Create Monitoring Session & Save Metrics

* From the Prism Central dashboard, navigate to Operations > Analysis.

* Click the + New Session button.

* Name the session Monitor SQL02.

* In the "Entities" search box, type SQL01 and select VM: SQL01.

* In the "Entities" search box, type SQL02 and select VM: SQL02.

* Click Add Charts > New Chart.

* Title: Storage IOPS

* Metric: Storage Controller IOPS

* Click Add.

* Click Add Charts > New Chart.

* Title: Storage Latency

* Metric: Storage Controller Latency
* Click Add.
* Click Add Charts > New Chart.
* Title: Storage Bandwidth
* Metric: Storage Controller Bandwidth
* Click Add.
* Click Save Session.
* With the "Monitor SQL02" session open, right-click anywhere on the page and click Select All.
* Right-click again and select Copy.
* Open Notepad, paste the content, and save the file to the desktop as Task 1.txt.
(The content pasted into Task 1.txt would be the session's chart configurations, showing metrics for SQL01 and SQL02.)
Task 2: Create and Schedule the Report
* While still in the "Monitor SQL02" analysis session, click the Save as Report button (it looks like a bookmark icon).
* Name the report MonitorSQL02 and click Save.
* Navigate to Operations > Reports.
* Find the MonitorSQL02 report in the list. Select its checkbox.
* Click the Actions dropdown and select Schedule.
* Configure the schedule with the following settings:
* Schedule Name: monitovm2_daily_report
* Recurrence: Daily
* Start Time: (Set to a time, e.g., 8:00 AM)
* Repeat every: 1 day(s)
* Retention Policy: Uncheck the "Retain a copy of the report" box. (This ensures reports are not retained).
* Email Report: Check this box.
* Format: PDF
* Recipients: perf_group@ACME.org
* Click Save.
Task 3: Identify and Correct the Performance Issue
This task is performed without powering on the VMs, indicating a configuration error.
Investigation
* Navigate to VMs > Table view.
* Click on the SQL01 (the good VM) and select the Configuration tab.
* Expand the Disks section. Observe that the primary disk is attached to a SCSI bus (e.g., scsi.0). This is the high-performance standard.
* Return to the VM list and click on SQL02 (the problem VM).
* Expand the Disks section.
Root Cause
You discover that the primary disk for SQL02 is attached to an IDE bus. The IDE bus has significant performance limitations and is not suitable for a database server, causing the poor storage performance.
Correction
* With the SQL02 VM selected, click the Update button.
* In the "Update VM" dialog, scroll down to the Disks section.
* Find the disk attached to the IDE bus. Click the Edit (pencil) icon for that disk.
* Change the Bus Type dropdown from IDE to SCSI.
* The Device Index will automatically populate (e.g., scsi.0).
* Click Save in the "Update Disk" dialog.
* (Note: A "VirtIO SCSI Controller" will be automatically added to the VM configuration if one was not already present.)
* Click Save in the "Update VM" dialog.
The VM SQL02 is now configured to use the high-performance VirtIO-SCSI controller, which will resolve the storage performance discrepancy once the VM is powered on.

NEW QUESTION # 20
The Infosec team has requested that all operational tasks performed within Cluster 1 be properly logged to include the top 4 severity levels and pushed to their syslog system using highest reliability possible for analysis. This is to include any Virtual Machine changes only.
The Infosec team has also requested that monitor logs for the given RSyslog Server Module be included for now. No extra logs should be included.
No other clusters should connect to this syslog server.
Syslog configuration:

* Syslog Name: Corp_Syslog
* Syslog IP: 34.142.155.231
* Port: TCP/514
Ensure only Cluster 1 is configured to meet these requirements.

Answer:

Explanation:
See the Explanation below for detailed answer.
Explanation:
Here is the step-by-step solution to configure syslog for Cluster 1.
1. Access Cluster 1 Prism Element
Since the requirement is to only configure Cluster 1 and not other clusters, this task must be performed in the Prism Element (PE) interface for Cluster 1.
* From the main Prism Central dashboard, navigate to Hardware > Clusters.
* Find Cluster 1 in the list and click its name. This will open the specific Prism Element login page for that cluster.
* Log in to Cluster 1's Prism Element interface.
2. Add the Syslog Server
* In the Cluster 1 PE interface, click the gear icon (Settings) in the top-right corner.
* From the left-hand menu, select Syslog.
* In the "Remote Syslog Server" section, click the + Add Syslog Server button.
* Fill in the server details as required:
* Name: Corp_Syslog
* IP Address: 34.142.155.231
* Port: 514
* Protocol: TCP (This provides the highest reliability, as requested).
* Click Save.
3. Configure Log Modules and Severities
Now, we must specify which logs to send to the new server.
* On the same Syslog settings page, find the "Syslog Configuration" section and click the Configure button (or Modify if a default is present).
* A dialog box "Select Modules and Levels" will appear.
* Uncheck all modules to ensure no extra logs are sent.
* Check the box for the RSyslog Server Module (or rsyslog_forwarder).
* For this module, check the boxes for the severities: Critical, Warning, and Info.
* Check the box for the ApiServer module.
* This module logs all operational tasks and audit trails, which includes all Virtual Machine changes.
* For this module, check the boxes for the top severity levels: Critical, Warning, and Info.
* Ensure no other modules (like Stargate, Cerebro, Zookeeper, etc.) are checked.
* Click Save.
Cluster 1 is now configured to send its audit logs (including VM changes) and its own syslog monitoring logs to the Corp_Syslog server via TCP, fulfilling all security requirements.
Topic 2, Performance Based Questions Set 2
Environment
You have been provisioned a dedicated environment for your assessment which includes the following:
Workstation
* windows Server 2019
* All software/tools/etc to perform the required tasks
* Nutanix Documentation and whitepapers can be found in desktop\files\Documentation
* Note that the workstation is the system you are currently togged into Nutanix Cluster
* There are three clusters provided. The connection information for the relevant cluster will be displayed to the high of the question Please make sure you are working on the correct cluster for each item Please ignore any licensing violations
* Cluster A is a 3-node cluster with Prism Central 2022.6 where most questions will be performed
* Cluster B is a one-node cluster and has one syslog item and one security item to perform
* Cluster D is a one-node duster with Prism Central 5.17 and has a security policy item to perform Important Notes
* If the text is too small and hard to read, or you cannot see an of the GUI. you can increase/decrease the zoom of the browser with CTRL + ,and CTRL + (the plus and minus keys) You will be given 3 hours to complete the scenarios for Nutanix NCMMCI Once you click the start button below, you will be provided with:
- A Windows desktop A browser page with the scenarios and credentials (Desktop\instructions) Notes for this exam delivery:
The browser can be scaled lo Improve visibility and fit all the content on the screen.
- Copy and paste hot-keys will not work Use your mouse for copy and paste.

- The Notes and Feedback tabs for each scenario are to leave notes for yourself or feedback for
- Make sure you are performing tasks on the correct components.
- Changing security or network settings on the wrong component may result in a falling grade.
- Do not change credentials on an component unless you are instructed to.
- All necessary documentation is contained in the Desktop\Files\Documentation directory

NEW QUESTION # 21

Your security team is working on automation to manage Security Policies.

They have exported some of the existing rules to the file "Security Policy.txt" located on the desktop. This file needs to be modified for the test environment.

* All rules except the quarantine rule should be logged.
* Only the Quarantine rule should be enforced, the other rules will only be logged.
* The quarantine rule should affect the SecOps environment.
* The SMB rule should only affect VMs with the "smbhost" and "smbclient" tags.
* The "DN test" policy should allow ipv6 and should not restrict any protocols between the included tiers.

There are three rules in the file, do not delete, add or copy lines. Only replace xxxx with the correct value as appropriate. It is possible that not all "xxxxx" will be replaced.

Save the file with the same name.

Possible values to replace the "xxxxx":

8080
ALL
APPLY
false
MONITOR
Non-Prod
SecOps
smbhost
smbclient
TCP
True

Answer:

Explanation:
See the Explanation below for detailed answer.
Explanation:
Here is the step-by-step solution to modify the security policy file as required.
Navigate to the desktop and open the file Security Policy.txt (which corresponds to the provided Security Policy.bak content) using a text editor like Notepad.
Modify the file content by replacing the xxxxx and xxxx placeholders according to the security requirements.
Modifications by Rule
Here are the specific changes to make within the file:
1. Quarantine Rule
Requirement 1 (No Logging): The quarantine rule should not be logged.
Change "is_policy_hitlog_enabled": "xxxxx" to "is_policy_hitlog_enabled": "false" Requirement 2 (Enforce): This rule must be enforced.
Change "action": "xxxxx" (under quarantine_rule) to "action": "APPLY"
Requirement 3 (Environment): The rule must affect the "SecOps" environment.
Change "Environment": ["xxxxx"] to "Environment": ["SecOps"]
2. SMB-block Rule
Requirement 1 (Logging): This rule must be logged.
Change "is_policy_hitlog_enabled": "xxxxx" to "is_policy_hitlog_enabled": "True" Requirement 2 (Monitor): This rule must not be enforced, only logged.
Change "action": "xxxxx" (under isolation_rule) to "action": "MONITOR"
Requirement 4 (Tags): The rule must affect the "smbhost" and "smbclient" tags.
Change "SMBv1": ["xxxxx"] to "SMBv1": ["smbhost"]
Change "SMRv1": ["xxxxx"] to "SMRv1": ["smbclient"]
3. DN test (dn-policy1) Rule
Requirement 2 (Monitor): This rule must not be enforced, only logged.
Change "action": "xxxx" (under app_rule) to "action": "MONITOR"

Requirement 5 (Allow IPv6): This policy must allow IPv6 traffic.
Change "allow_ipv6_traffic": "xxxx" to "allow_ipv6_traffic": "True"
Final Step
After making all the replacements, Save the file, overwriting the original Security Policy.txt on the desktop.
Example of completed rules (replace xxxxx accordingly):
Rule Name: Quarantine Rule
Logged: false
Action: APPLY
Environment: SecOps
Protocols: TCP
Ports: 8080
Rule Name: SMB Rule
Logged: True
Action: MONITOR
Tags: smbhost, smbclient
Protocols: TCP
Ports: 8080
Rule Name: DN Test Policy
Logged: True
Action: MONITOR
Environment: Non-Prod
Protocols: ALL
Ports: 8080

NEW QUESTION # 22
Use Prism Element for this question.
The Application team has a 3 tier application (App Server, Web Server, and Database Server) that is mission critical and requires as close to 0 RPO and RTO as possible with their current license level.
The organization has 2 clusters, with one cluster (Cluster 1) being production and the other cluster (Cluster 2) being remote/DR.
Cluster 2 should be able to fail back to Cluster 1.
The connectivity between the two sites is >5ms and replication traffic should not use more than 10Mbps of bandwidth. The Application team requests a plan that includes the ability to go back 2 days locally, and 2 days remotely.
The team also requests that all 3 VMs be treated as a single group and backed up collectively in a snapshot.
The three VMs are:
* Web-Prod
* App-Prod
* DB-Prod
Use Task3 as part of the name for any objects created for this task.
Note: VMs do NOT need to be powered on. You will need to use the 172.30.0.x IP addresses when configuring DR.

Answer:

Explanation:
See the Explanation below for detailed answer.
Explanation:
Here is the step-by-step solution to configure Disaster Recovery from the Cluster 1 Prism Element interface.
1. Add Cluster 2 as a Remote Site
First, you must register Cluster 2 as a DR target for Cluster 1.
* From the Cluster 1 Prism Element dashboard, navigate to Data Protection from the main dropdown menu.
* Click the Remote Site tab.
* Click the + Remote Site button and select Physical Cluster.
* In the "Name" field, enter Cluster2_DR_Task3.
* In the "Address" field, enter the 172.30.0.x Virtual IP address of Cluster 2.
* Click Save. The clusters will exchange credentials and connect.
2. Throttle Replication Bandwidth
Next, apply the 10 Mbps bandwidth limit for traffic going to Cluster 2.
* On the same Remote Site tab, select the newly created Cluster2_DR_Task3.
* Click the Update button.
* In the dialog, set the Bandwidth Limit to 10 Mbps.

* Click Save.
3. Create the Protection Domain
A Protection Domain (PD) is the top-level object that will manage the VMs and replication schedules.
* In the Data Protection dashboard, click the Table tab.
* Click the + Protection Domain button and select Async DR.
* For the Name, enter App_PD_Task3.
* Click Create.
4. Protect VMs in a Consistency Group
Now you will add the three application VMs to the new Protection Domain as a single Consistency Group (CG).
* You will be taken to the dashboard for the new App_PD_Task3. In the Entities panel, click the Protect Entities button.
* In the "Protect Entities" dialog, search for and select the three VMs:
* Web-Prod
* App-Prod
* DB-Prod
* Click Next.
* Select Create new consistency group and name it App_CG_Task3.
* Click Protect.
5. Create the Replication Schedule
Finally, configure the schedule to meet the RPO and retention requirements.
* In the App_PD_Task3 dashboard, click the Schedules tab.
* Click the + New Schedule button.
* Remote Site: Select Cluster2_DR_Task3.
* RPO (Repeat every): Select NearSync. Set the RPO to 1 minute.
* Note: This is the lowest possible RPO for an Async (>5ms latency) connection, fulfilling the "as close to 0" requirement.
* Local Retention: Set to 2 Days.
* Remote Retention: Set to 2 Days.
* Ensure the "Store snapshots for 2-way replication" checkbox is enabled to allow failback from Cluster 2.
* Click Create Schedule.

NEW QUESTION # 23

......

Our NCM-MCI-6.10 preparation questions deserve you to have a try. As long as you free download the demos on our website, then you will love our NCM-MCI-6.10 praparation braindumps for its high quality and efficiency. All you have learned on our NCM-MCI-6.10 Study Materials will play an important role in your practice. We really want to help you solve all your troubles about learning the NCM-MCI-6.10 exam. Please give us a chance to prove.

New NCM-MCI-6.10 Exam Test: https://www.passcollection.com/NCM-MCI-6.10_real-exams.html

If you on the subway or wait for the bus, you can open your files, and take a look at the New NCM-MCI-6.10 Exam Test - Nutanix Certified Master - Multicloud Infrastructure (NCM-MCI) pdf torrent, Nutanix New NCM-MCI-6.10 Exam Vce These professionals must be proficient with Agile practices in software development, Majority of candidates have the complaints that they spend lots of time and money on the NCM-MCI-6.10 test learning but it doesn't work at all, they still fail in the Nutanix NCM-MCI-6.10 test, Our exam materials can boost your confidence for the real exams and will help you remember NCM-MCI-6.10 exam questions and answers that you will take part in.

The first case study is built on a real one New NCM-MCI-6.10 Exam Vce that involves a company that is seeking to improve productivity via an aggressive process improvement program, This chapter has been NCM-MCI-6.10 Study Test added specifically to help those who are seeking professional paid support for Samba.

Reliable New NCM-MCI-6.10 Exam Vce & Pass-Sure New NCM-MCI-6.10 Exam Test & Accurate New NCM-MCI-6.10 Test Pass4sure

If you on the subway or wait for the bus, you can open your files, NCM-MCI-6.10 and take a look at the Nutanix Certified Master - Multicloud Infrastructure (NCM-MCI) pdf torrent, These professionals must be proficient with Agile practices in software development.

Majority of candidates have the complaints that they spend lots of time and money on the NCM-MCI-6.10 test learning but it doesn't work at all, they still fail in the Nutanix NCM-MCI-6.10 test.

Our exam materials can boost your confidence for the real exams and will help you remember NCM-MCI-6.10 exam questions and answers that you will take part in, We will never carry out the NCM-MCI-6.10 real exam dumps that are under researching.
