- D. To Identify bad actors that are seeking to misuse the smart contract

**Answer: A**

The primary purpose of a security audit for smart contracts is to protect investors' funds by identifying vulnerabilities, coding errors, and weaknesses in the smart contract or underlying protocol that could be exploited. This proactive approach helps prevent hacks, exploits, and financial loss.

While performance issues (B) may be noted, the critical concern is security. Identifying bad actors (C) is not within the scope of a code audit but is a broader operational issue. Copyright concerns (A) are unrelated.

AML and crypto governance frameworks underline the importance of security audits to mitigate operational risks in DeFi and other smart contract-based applications.
