

Reliable UiPath-TAEPv1 Exam Labs, Questions UiPath-TAEPv1 Exam

BONUS!!! Download part of ExamTorrent UiPath-TAEPv1 dumps for free: <https://drive.google.com/open?id=1cJRw5qAGXGkvbSYnwX0UXA2j1YGaWICw>

For the convenience of the Exams candidates, the difficult portions of the syllabus have been explained with the help of experts to be simplified. One remarkable feature of UiPath-TAEPv1 actual dumps questions and answers is their similarity with the real exam scenario. They not only give you understanding of the UiPath-TAEPv1 Exams but also impart you an opportunity to master it. To enhance further your exam ability and strengthen your learning, you can benefit yourself getting practice UiPath real dumps.

UiPath UiPath-TAEPv1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">UiPath Studio - Test Activities and Workflow Best Practices: This section of the exam measures the skills of Test Automation Engineers and evaluates knowledge of using verification activities and test-specific functions within UiPath Studio. It involves working with test data generation, document attachments in test cases, and applying workflow analyzer rules for stable collaboration. It also includes mock testing to isolate test case components and ensure focused validations.
Topic 2	<ul style="list-style-type: none">UiPath Test Suite Architecture and API Integrations: This section of the exam measures the skills of Test Automation Engineers and covers the fundamental capabilities of UiPath Test Suite in automating different types of testing such as UI, API, and data-driven testing. It includes an overview of Test Suite tools and how they integrate with each other, as well as with third-party application lifecycle management (ALM) tools through APIs. Candidates are expected to understand API testing concepts and how external tools can be connected for requirement synchronization, defect management, and test case tracking.
Topic 3	<ul style="list-style-type: none">UiPath Studio - Testing Panels and Templates: This section of the exam measures the skills of RPA Developers and focuses on how to work with testing panels in UiPath Studio. It includes how to create, import, and manage test cases, along with the use of Test Explorer for analyzing test outcomes. It also covers Descriptor and Activity Coverage panels used for examining object recognition and checking redundancy in test cases. The section further explains testing project templates, the Test Automation Framework, and how to customize execution and test case templates.

Topic 4	<ul style="list-style-type: none"> UiPath Test Suite – Orchestrator: This section of the exam measures the skills of Test Automation Engineers and covers how to manage test sets in UiPath Orchestrator. It includes creating, executing, scheduling, and deleting test sets, using test data queues, and analyzing results from the Test Execution page. It also discusses re-executing tests and linking test sets for better orchestration of test activities.
Topic 5	<ul style="list-style-type: none"> CI CD Implementation: This section of the exam measures the skills of RPA Developers and introduces the concepts of Continuous Integration and Continuous Delivery (CI) CD). It covers how to implement pipelines and perform tasks using the UiPath Command Line Interface (CLI) for streamlined and automated deployments of test workflows and processes.
Topic 6	<ul style="list-style-type: none"> Environments, Applications, and or Tools: This section of the exam measures the skills of RPA Developers and evaluates comfort with various tools and environments commonly used with UiPath. These include Microsoft Excel, JSON, XML, ERPs, web elements, browsers, virtual machines, version control systems, and UiPath components such as Studio, Orchestrator, and Robots.
Topic 7	<ul style="list-style-type: none"> UiPath Studio - Data-driven Testing: This section of the exam measures the skills of RPA Developers and centers around managing test data variations using data-driven testing approaches. It explains how to add test data through queues, activities, or data sources, and how to create reusable test cases based on this data. The section also highlights connecting UiPath Studio projects to Test Manager to enhance traceability and visibility of test progress.

Questions UiPath-TAEPv1 Exam, UiPath-TAEPv1 Free Exam

There is a succession of anecdotes, and there are specialized courses. Experts call them experts, and they must have their advantages. They are professionals in every particular field. The UiPath-TAEPv1 test material, in order to enhance the scientific nature of the learning platform, specifically hired a large number of qualification exam experts, composed of product high IQ team, these experts by combining his many years teaching experience of UiPath-TAEPv1 quiz guide and research achievements in the field of the test, to exam the popularization was very complicated content of UiPath Test Automation Engineer Professional v1.0 exam dumps, better meet the needs of users of various kinds of cultural level. Expert team not only provides the high quality for the UiPath-TAEPv1 Quiz guide consulting, also help users solve problems at the same time, leak fill a vacancy, and finally to deepen the user's impression, to solve the problem of UiPath test material and no longer make the same mistake.

UiPath Test Automation Engineer Professional v1.0 Sample Questions (Q109-Q114):

NEW QUESTION # 109

What is the BDD test case template used for in UiPath?

- A. To handle Global Exception Handlers in behaviour driven development approach.
- B. To create test cases based on If-Then-Else containers.
- C. To structure the test around Given-When-Then containers.**
- D. To structure the test around If-Then-Else statements.

Answer: C

Explanation:

The BDD (Behavior-Driven Development) test case template in UiPath is used to structure tests using the Given-When-Then format, which clearly separates setup, action, and expected outcome. This makes test cases more readable and aligned with business scenarios.

NEW QUESTION # 110

What is the output format of the UiPath Testing Activities.TestData.Address activity?

- A. Dictionary (String, Object) with the fields: Country, PostalCode, StreetNumber, State
- B. Dictionary (String, String) with the fields: Country, PostalCode, StreetNumber, State
- C. Dictionary (String, Object) with the fields: Country, PostalCode, StreetNumber, StreetName, City, State
- D. Dictionary (String, String) with the fields: **Country PostalCode, StreetNumber, StreetName, City, State**

Answer: D

Explanation:

The output format of the UiPath.Testing.Activities.TestData.Address activity is a Dictionary<String, String> containing the fields: Country, PostalCode, StreetNumber, StreetName, City, and State. This structured data is useful for generating realistic test addresses.

NEW QUESTION # 111

What UiPath Studio tool is used to record and perform actions on real or simulated mobile devices?

- A. Mobile Device Manager
- B. Mobile Device Connection
- C. Mobile Testing Template
- D. Mobile Automation Activities

Answer: A

Explanation:

The Mobile Device Manager in UiPath Studio is the tool used to record and perform actions on real or simulated mobile devices. It facilitates mobile UI automation by connecting Studio to mobile environments.

NEW QUESTION # 112

What type of data can be added to the Tester Comment field?

- A. Text and documents
- B. Only text
- C. Text and Video recording
- D. Text and Screenshot

Answer: B

Explanation:

The Tester Comment field in UiPath Test Manager supports only text input. It is used to provide notes, observations, or explanations related to a test case execution.

NEW QUESTION # 113

What is the purpose of the RunTest block in the Test Automation Framework?

- A. RunTest block is where the Test Case should be invoked. The RunTest should be replaced at design time with an Invoke Workflow activity referencing the Test Case at the execution time. At the execution time, the Test Case will run instead of the RunTest block.
- B. RunTest block is where workflows specific to the Test Case should be invoked. If an Application Exception occurs, the current transaction is being retried. If a Business Rule Exception occurs, the block will skip the transaction.
- C. RunTest block is where the Test Case should be created. The RunTest should contain the actions specific to the Test Case.
- D. RunTest block is where the Test Case is executed. The Placeholder activity changes at runtime into an Invoke Workflow File activity.

Answer: D

Explanation:

The RunTest block in the Test Automation Framework is where the Test Case is executed. At runtime, the Placeholder activity within the block dynamically changes into an Invoke Workflow File activity that points to the actual test case implementation. This

allows for a flexible and modular test execution design.

NEW QUESTION # 114

ExamTorrent offers verified, authentic UiPath UiPath-TAEPv1 Real Questions and answers, which are essential for passing the UiPath Test Automation Engineer Professional v1.0 (UiPath-TAEPv1). These questions and answers have been designed by Sitecore experts and can be easily downloaded on a PC, MacBook, or smartphone for comfortable and convenient learning.
