Free PDF Quiz Microsoft - Reliable MB-700 Reliable Braindumps Files

Answer Area

Requirement	Action
Implement localization	Create a new cloud-based instance of Dynamics 365 Finance in Mexico.
	Select Mexico for the localized functionality region field.
	Select United States for the localized functionality region field.
	Create a new on-premises instance of Dynamics 365 Finance in Mexico.
Configure company	Create a new legal entity with MEX as the country code.
	Create a new site in the existing legal entity with an address in Mexico.
	Create a new warehouse in the existing legal entity with an address in Mexico.
	Copy the current legal entity into a new legal entity and change the site address to Mexico.
Identify gaps	Identify the reporting format requirement and analyze Dynamics 365 for supporting functionality.
	Recommend using current reporting methods.
	Recommend using out-of-the-box sales invoice report and send in the required format.
	Identify fields in the localization that are relevant and remove the rest to simplify the report.

Our MB-700 study quiz boosts many advantages and it is your best choice to prepare for the test. Our MB-700 learning prep is compiled by our first-rate expert team and linked closely with the real exam. And our MB-700 training materials provide three versions and multiple functions to make the learners have no learning obstacles. The passing rate of our MB-700 Guide materials is high and you don't need to worry that you have spent money but can't pass the test.

Section 1. Identify Solution Requirements (30-35%)

Defining Business Requirements

- Describing an enterprise, including divisions, companies, and other entities.
- Visualizing and mapping a structure of an enterprise, defining the reporting requirements, such as externally, analytical, and operational facing reports.

Earning the Microsoft MB-700 certification is an excellent way to demonstrate your expertise in designing and implementing solutions that are based on Microsoft Dynamics 365 Finance and Operations Apps. Microsoft Dynamics 365: Finance and Operations Apps Solution Architect certification can help you stand out from other candidates when applying for jobs in this field. It can also help you advance your career by opening up new opportunities for you. With the Microsoft MB-700 Certification, you can demonstrate to potential employers that you have the skills and knowledge needed to design and implement effective solutions that meet their business needs.

Microsoft MB-700 Dumps Get Success Microsoft MB-700 Minimal Effort

RealExamFree offers you a free demo version of the Microsoft MB-700 dumps. This way candidates can easily check the validity and reliability of the MB-700 exam products without having to spend time. This relieves any sort of anxiety in the candidate's mind before the purchase of Microsoft Dynamics 365: Finance and Operations Apps Solution Architect certification exam preparation material. This MB-700 Exam study material is offered to you at a very low price. We also offer up to 1 year of free updates on Microsoft MB-700 dumps after the date of purchase. Going through our Microsoft Dynamics 365: Finance and Operations Apps Solution Architect exam prep material there remains no chance of failure in the Microsoft MB-700 exam.

Microsoft Dynamics 365: Finance and Operations Apps Solution Architect Sample Questions (Q306-Q311):

NEW QUESTION # 306
A company is implementing Dynamics 365 Supply Chain Management. The company has 11 legal entities.
Each entity uses a separate enterprise resource planning (ERP) system. A customer may have a unique customer number in each system because the systems are disconnected. One of the customer numbers will be used as the master number in Dynamics 365.
The company plans to add entities to Supply Chain Management over time. Customer records will continue to be added to the ERP systems throughout the implementation lifecycle and must be kept up to date. The ERP systems will be decommissioned after go-

live.

You need to create a strategy to migrate the customer data and ensure that new records are automatically mapped.

Which solution should you implement for each requirement? To answer, drag the appropriate solutions to the correct requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Solutions	Requirement	Solution
Existing ERP system	Consolidate on the single master customer number.	
Azure Data Lake	Store historical data.	
Data Migration Framework	Import customer data.	
F&O Data Feeds		

Answer:

Explanation:

Solutions	Requirement	Solution
Existing ERP system	Consolidate on the single master customer number.	Data Migration Framework
Azure Data Lake	Store historical data.	Azure Data Lake
Data Migration Framework	Import customer data.	Data Migration Framework
F&O Data Feeds		

Explanation:

Requirement	Solution
Consolidate on the single master customer number.	Data Migration Framework
Store historical data.	Azure Data Lake
Import customer data.	Data Migration Framework

NEW QUESTION # 307

A telecom provider uses Microsoft SharePoint to track and manage mobile phones that are issued to employees.

All information about employee-issued mobile phones be visible in Dynamics 365. Managers must be able to issue new phones directly from the system.

You need to design an integration solution using Dynamics 365 and SharePoint.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer area
Create a blank Power Apps and connect to the SharePoint list.	
Embed the Power Apps into the Dynamics 365 Employee form.	
Use the standard formula and filter function of Power Apps.	
Embed the Power Apps into the SharePoint site.	
Create a SharePoint notification workflow.	
Establish the relationship between Dynamics 365, Power Apps, and the SharePoint list.	

Answer:

Explanation:

Actions	Answer area
Create a blank Power Apps and connect to the SharePoint list.	Create a SharePoint notification workflow.
Embed the Power Apps into the Dynamics 365 Employee form.	Embed the Power Apps into the SharePoint site.
Use the standard formula and filter function of Power Apps.	Use the standard formula and filter function of Power Apps.
Embed the Power Apps into the SharePoint site.	Establish the relationship between Dynamics 365, Power Apps, and the SharePoint list.
Create a SharePoint notification workflow.	
Establish the relationship between Dynamics 365, Power Apps, and the SharePoint list.	

Explanation:

	Answer area
1	Create a SharePoint notification workflow.
2	Embed the Power Apps into the SharePoint site.
3	Use the standard formula and filter function of Power Apps.
4	Establish the relationship between Dynamics 365, Power Apps, and the SharePoint list.

NEW QUESTION # 308

A multinational organization is evaluating Dynamics 365 Supply Chain Management.

Each regional office uses processes and procedures developed internally without input from the other offices.

The organization wants to perform a gap analysis to understand redundancies and additional requirements in their system.

You need to recommend a solution.

Which tool should you recommend? To answer, select the appropriate options in the answer area.

NOTE; Each correct selection is worth one point.

Answer Area

Scenario	Tool
Identify differences between regional office processes and procedures.	Business process modeler Configuration manager Regression suite automation tool (RSAT)
Track the progress of the implementation project and its alignment to documented processes and procedures.	Business process modeler Microsoft Azure DevOps Regression suite automation tool (RSAT)
Identify differences between standard company processes and how the system works.	Business process modeler Configuration manager Regression suite automation tool (RSAT)

Answer:

Explanation:

Answer Area

Scenario	Tool
Identify differences between regional office processes and procedures.	Business process modeler Configuration manager Regression suite automation tool (RSAT)
Track the progress of the implementation project and its alignment to documented processes and procedures.	Business process modeler Microsoft Azure DevOps Regression suite automation tool (RSAT)
Identify differences between standard company processes and how the system works.	Business process modeler Configuration manager Regression suite automation tool (RSAT)

Explanation:

Scenario	Tool
Identify differences between regional office processes and procedures.	**Business process modeler** ▼ Configuration manager Regression suite automation tool (RSAT)
Track the progress of the implementation project and its alignment to documented processes and procedures.	▼ Business process modeler **Microsoft Azure DevOps** Regression suite automation tool (RSAT)
Identify differences between standard company processes and how the system works.	▼ **Business process modeler** Configuration manager Regression suite automation tool (RSAT)

NEW QUESTION # 309
A company implements Dynamics 365 Finance.
A sales order confirmation report does not meet the company's branding standards. The report must include header notes and a colorful logo.
You must enable modern design for additional reports created by users in the future.
You need to meet the branding standards and enable additional forms and reports to be created by users.
What should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Solution
Add colorful logo and header notes.	Modern reports branding details Print management configuration Business document management
Enable forms by users.	Modern reports branding details SQL Server Reporting Services (SSRS) report design Print management configuration Business document management

Answer:

Explanation:

Requirement	Solution
Add colorful logo and header notes.	**Modern reports branding details** Print management configuration Business document management
Enable forms by users.	Modern reports branding details SQL Server Reporting Services (SSRS) report design Print management configuration **Business document management**

Explanation
Box 1: Modern reports branding details
Modern report designs in Microsoft Dynamics 365 for Finance and Operations .' The logos, color schemes, and notes are setup in "Organization administration"->"Setup"->"Document branding"->"Branding details".
Box 2: Business document management
Business document management is built on top of the ER framework and enables business users to edit business document templates by using Microsoft 365 service or appropriate Microsoft Office desktop application. Edits to the documents might include changing business document designs and adding placeholders for additional data without source code changes and new deployments. No knowledge of the ER framework is required to update templates of business documents.
Note:
Business users use the Electronic reporting (ER) framework to configure formats for outbound documents in accordance with the legal requirements of various countries/regions. Users can also define the dataflow to specify what application data is placed in generated documents. The ER framework generates outbound documents in Microsoft Office formats (Excel workbooks or Word documents) by using predefined templates.
