

SAP C-IBP-2502 Prüfung Übungen und Antworten

Übrigens, Sie können die vollständige Version der Zertpruefung C-IBP-2502 Prüfungsfragen aus dem Cloud-Speicher herunterladen: <https://drive.google.com/open?id=1b-3W4FRZwpZJTYIUMH7Al-Or1NdWY8qg>

Das Zertifikat für SAP C-IBP-2502 bedeutet einen neuen Meilenstein im Leben. Mit dem bekommt man mehr berufliche Aufstiegschancen und bessere Arbeitsaussichten. Daher träumt jeder IT-Fachmann davon. Es ist allen bekannt, dass solche SAP C-IBP-2502 Prüfung schwer zu bestehen ist. In der Tat ist es auch so, zahlreiche Prüflinge fallen in der Prüfung durch. Wenn man sich gar nicht um die Prüfung bemüht, fällt einem noch schwerer. Die SAP C-IBP-2502 Zertifizierungsprüfung verlangt jedoch umfangreiche Fachkenntnisse. Unser Zertpruefung bitet Ihnen einen kürzeren Weg zu der SAP C-IBP-2502 Zertifizierung. Auf unserer Website gibt es viele Prüfungsmaterialien für die SAP C-IBP-2502 Zertifizierung, die Ihnen zum Bestehen der Prüfung unter Garantie helfen. Außerdem können Sie dabei viel Zeit ersparen. So ist es Ihnen ganz preisgünstig, dass man per Zertpruefung mit weniger Zeit und Geld ein wertvolles Zertifikat bekommt.

SAP C-IBP-2502 Prüfungsplan:

Thema	Einzelheiten
Thema 1	• Demand Planning: This section measures the skills of demand planners and focuses on the core concepts of demand planning. It includes understanding forecasting techniques, demand sensing, and demand propagation. Candidates are tested on their ability to manage demand signals and align planning with business objectives.
Thema 2	• Model Supply Processes: This section assesses the expertise of supply chain planners in designing and managing supply processes. It includes setting up sourcing, inventory management, and supply constraints. Candidates will be evaluated on their ability to model supply networks and optimize resource allocation.
Thema 3	• Master Data: This section is relevant to master data specialists and focuses on managing essential data for planning activities. It includes an understanding of product, location, and resource master data within SAP. Candidates will be tested on how to maintain accurate and consistent data to support planning functions.
Thema 4	• Planning Operators & Application: JobsThis section is designed for demand planners and focuses on the configuration and execution of planning operators and application jobs. It includes an understanding of how these tools automate planning processes and improve system performance. Candidates will be tested on their ability to configure and execute jobs that support various planning functions.
Thema 5	• Analytics and Reporting: his section evaluates the expertise of reporting specialists in generating and interpreting reports within SAP. It covers key analytical tools and reporting functions that provide insights into planning performance. Candidates will be assessed on their ability to extract, analyze, and present data effectively to support business decisions.

C-IBP-2502 Mit Hilfe von uns können Sie bedeutendes Zertifikat der C-IBP-2502 einfach erhalten!

Es gibt mehrere Methode, mit dem Sie die SAP C-IBP-2502 Prüfung bestehen können. Trotzdem ist die Methode von uns Zertprüfung am effizientesten. Wenn Sie Simulierte-Software der SAP C-IBP-2502 von unsere IT-Profis benutzen, werden Sie sofort die Verbesserung Ihrer Fähigkeit empfinden. SAP C-IBP-2502 Prüfung werden ab und zu aktualisiert. Um Ihnen die neueste Unterlagen zu versichern, bieten wir Ihnen einjährigen kostenlosen Aktualisierungsdienst. Lassen Sie getrost benutzen!

SAP Certified Associate - SAP IBP for Supply Chain C-IBP-2502 Prüfungsfragen mit Lösungen (Q32-Q37):

32. Frage

What are some of the capabilities of the Planner Workspaces app? Note: There are 2 correct answers to this question.

- A. It supports sharing with other users or user groups
- **B. It supports favorites created in SAP IBP, add-in for Microsoft Excel**
- **C. It supports embedding analytic stories as a workspace component**
- D. It supports simulating the effect of the changes

Antwort: B,C

Begründung:

The Planner Workspaces app in SAP IBP is a Fiori-based UI that integrates planning tools, analytics, and collaboration features for supply chain planners.

* Option A: It supports simulating the effect of the changes This is incorrect. While simulation is a feature in SAP IBP (e.g., via versions or scenarios in Excel), Planner Workspaces focuses on visualization and navigation, not direct simulation execution. Simulation occurs in other apps like Excel or Manage Scenarios.

* Option B: It supports favorites created in SAP IBP, add-in for Microsoft Excel This is correct.

Planner Workspaces integrates with the Excel add-in, allowing users to access their Excel favorites (e.g., planning views) directly within the workspace. This enhances usability by linking preferred tools, as per SAP IBP's documentation on Planner Workspaces.

* Option C: It supports embedding analytic stories as a workspace component This is correct.

Analytic stories (created in the Manage Analytics Stories app) can be embedded in Planner Workspaces, providing charts and insights alongside planning data. This is a key visualization feature, per SAP IBP's UI capabilities.

* Option D: It supports sharing with other users or user groups This is incorrect. Sharing is available in Excel (e.g., templates) or analytics apps, but Planner Workspaces doesn't have a native sharing function for workspaces themselves. Collaboration occurs via other mechanisms.

Thus, B and C are accurate capabilities of Planner Workspaces, aligning with SAP IBP's official feature set.

33. Frage

You have set up a planning area, and data is now available. You adjust the necessary time profile settings and run a consistency check. Which settings can you change and still run a successful consistency check? Note:

There are 2 correct answers to this question.

- A. Add a new time profile level to the time profile
- B. Change the numbering hierarchy of the period IDs in the time profile
- **C. Change the description of an attribute in the time profile**
- **D. Change the past and future horizon of the level in the time profile**

Antwort: C,D

Begründung:

The consistency check in SAP IBP ensures the planning area's configuration (e.g., time profile, key figures) is valid. Changes to the time profile must maintain structural integrity, as per SAP IBP's configuration rules.

* Option A: Add a new time profile level to the time profile This is incorrect. Adding a new level (e.g., quarter) requires updating key figure planning levels and data, potentially breaking consistency until fully aligned.

* Option B: Change the numbering hierarchy of the period IDs in the time profile This is incorrect.

Altering period ID numbering (e.g., PERIODID0 to PERIODID1) disrupts existing data mappings, causing consistency check failures.

* Option C: Change the past and future horizon of the level in the time profile This is correct.

Adjusting the horizon (e.g., extending from 12 to 24 months) affects data visibility but not structural consistency, allowing a successful check, per SAP IBP's time profile documentation.

* Option D: Change the description of an attribute in the time profile This is correct. The description (e.g., "Week" to "Weekly") is metadata and doesn't impact data integrity, ensuring a successful consistency check, per SAP IBP's configuration flexibility. Thus, C and D are safe changes, per SAP IBP's official consistency check behavior.

34. Frage

Which planning operators can be executed in a time-series-based planning area? Note: There are 2 correct answers to this question.

- A. Deployment Optimizer
- **B. Finite Heuristics**
- C. Shelf Life Heuristics
- **D. Constrained Forecast Run**

Antwort: B,D

35. Frage

Which of these conditions must be met to create a Local Member key figure? Note: There are 2 correct answers to this question.

- A. Use Excel Cell reference in the Report Editor option is selected
- B. A key figure is selected in the Key Figures tab in the SAP IBP, add-in for Microsoft Excel
- **C. Activate Local Member recognition setting is selected**
- **D. Users should have authorization for template administration**

Antwort: C,D

Begründung:

Local Members in SAP IBP's Excel add-in are user-defined calculations (e.g., summing two key figures) within a planning view, not stored in the system.

* Option A: Use Excel Cell reference in the Report Editor option is selected This is incorrect. Cell references are used in local member formulas, but this isn't a prerequisite setting; it's an action during creation.

* Option B: Users should have authorization for template administration This is correct. Creating Local Members requires permissions tied to template administration (e.g., via a business role), ensuring control over UI modifications, per SAP IBP's security model.

* Option C: Activate Local Member recognition setting is selected This is correct. The "Local Member Recognition" setting must be enabled in the Excel add-in options to allow Local Members to be created and recognized, per SAP IBP's Excel documentation.

* Option D: A key figure is selected in the Key Figures tab in the SAP IBP, add-in for Microsoft Excel This is incorrect. Selecting a key figure is part of building a view, not a specific condition for Local Members.

Thus, B and C are prerequisites for Local Members, per SAP IBP's Excel UI guidelines.

36. Frage

Which processes are embedded in the sample planning areas SAP6 and SAP3?

- A. SAP6 Demand Planning and Sensing, and SAP3 Control Tower
- **B. SAP6 Demand Planning and Sensing, and SAP3 Inventory Planning**
- C. SAP6 Sales and Operations Planning and Supply Planning, and SAP3 Inventory Planning
- D. SAP6 Control Tower, and SAP3 Sales and Operations Planning and Supply Planning

Antwort: B

Begründung:

SAP IBP provides sample planning areas (e.g., SAPIBP1, SAP3, SAP6) with preconfigured processes to demonstrate module-specific functionality.

* SAP6: Focused on Demand Planning and Sensing, enhancing short-term demand forecasts.

* SAP3: Focused on Inventory Optimization, managing multi-stage inventory targets.
 * Option A: SAP6 Control Tower, and SAP3 Sales and Operations Planning and Supply Planning This is incorrect. SAP6 is not Control Tower-specific (that's SAP8), and SAP3 focuses on Inventory Optimization, not broad S&OP or Supply Planning.
 * Option B: SAP6 Demand Planning and Sensing, and SAP3 Control Tower This is incorrect. SAP3 is Inventory Optimization, not Control Tower, which is a separate module (SAP8).
 * Option C: SAP6 Demand Planning and Sensing, and SAP3 Inventory Planning This is correct.
 SAP6 includes Demand Planning (statistical forecasting) and DemandSensing (short-term adjustments), while SAP3 focuses on Inventory Planning (e.g., safety stock optimization), matching their official purposes per SAP IBP's sample content documentation.
 * Option D: SAP6 Sales and Operations Planning and Supply Planning, and SAP3 Inventory Planning This is incorrect. SAP6 is narrower (Demand Planning/Sensing), not full S&OP or Supply Planning (more aligned with SAPIBP1). SAP3 is correct for Inventory Planning.
 Thus, C accurately reflects the processes in SAP6 and SAP3, per SAP IBP's sample planning area definitions.

37. Frage

.....

Sich für IT-Branche interessierend Sie bereiten sich jetzt auf die wichtige SAP C-IBP-2502 Prüfung? Lassen wir Zertpruefung Ihnen helfen! Was wir Ihnen garantieren ist, dass Sie nicht nur die SAP C-IBP-2502 Prüfung bestehen können, sondern auch Sie der leichte Vorbereitungsprozess und guter Kundendienst genießen.
