Valid Braindumps ISO-IEC-27001-Foundation Free & ISO-IEC-27001-Foundation Reliable Test Pdf

Solutions is commented APMG-International to ace your ISO-IEC-27001-Foundation preparation and enable you to pass the final APMG-International ISO-IEC-27001-Foundation with flying colors. To achieve this objective Exams. Solutions is offering updated, real, and error-Free ISO-IEC-27001-Foundation Exam Questions in three easy-to-use and compatible formats. These ISO-IEC-27001-Foundation questions formats will help you in preparation.

APMG-International ISO-IEC-27001-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	• Information Management (IM): Information management (IM) encompasses the entire lifecycle of information within an organization—from its collection and storage to its distribution, use, and eventual archiving or disposal.

Topic 2	• Framework Design: Framework design is the process of developing a reusable structural foundation that supports and guides the creation and organization of software systems.
Topic 3	• Security Breaches: Security breaches occur when unauthorized access or violations of security protocols are detected or imminent, potentially compromising data or system integrity.
Topic 4	• Self Confidence: Self-confidence is the belief in one's abilities, competence, and value, reflecting a sense of assurance and inner strength.
Topic 5	• Cybersecurity: Cybersecurity, also known as IT security or computer security, involves safeguarding computer systems, networks, and data from unauthorized access, theft, damage, or disruption to ensure the integrity and availability of digital information.
Topic 6	• Compliance: Regulatory compliance refers to an organization's commitment to understanding and adhering to applicable laws, policies, and regulations to operate within established legal and ethical standards.
Topic 7	• Data Security: Data security refers to protecting digital information—such as that stored in databases or networks—from destruction, unauthorized access, or malicious attacks, ensuring confidentiality and integrity.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q31-Q36):

NEW QUESTION # 31
Which statement describes the control for the Compliance with policies, rules and standards for information security within Annex A of ISO/IEC 27001?

- A. Return assets to their legal owners
- B. Maintain contact with legal authorities
- C. Regular review of contractual compliance
- D. Regular review of compliance

Answer: D

Explanation:
Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:
Annex A.5.36 (Compliance with policies, rules and standards for information security) requires:
"Compliance with the organization's information security policies, rules and standards for information security should be regularly reviewed." This directly matches option A. Option B refers to contractual compliance, which is part of supplier management controls (Annex A.5.19). Option C relates to Annex A.5.7 (Contact with authorities). Option D refers to asset return controls (Annex A.5.9).
Thus, the correct answer isA.

NEW QUESTION # 32
In which clause would the requirements for internal audit be found?

- A. Operation
- B. Improvement
- C. Performance Evaluation
- D. Planning

Answer: C

Explanation:
The requirements for internal audit are explicitly placed inClause 9.2 (Performance Evaluation)of ISO/IEC
27001:2022. The standard requires:
* "The organization shall conduct internal audits at planned intervals to provide information on whether the information security

management system... conforms to the organization's own requirements... and to the requirements of this document." (9.2.1)
* "The organization shall plan, establish, implement and maintain an audit programme(s)..." (9.2.2) This clause clearly falls underPerformance Evaluation (Clause 9), not Planning (Clause 6), Operation (Clause 8), or Improvement (Clause 10). Therefore, the correct answer isC.

NEW QUESTION # 33
In an audit, what is the definition of an observation?

- A. An issue raised by an interested party
- B. An issue excluded from the scope of the standard
- C. A non-fulfilment of a requirement of ISO/IEC 27001
- D. A conformity to the standard where there is an opportunity for improvement

Answer: D

Explanation:
ISO/IEC 27001 mandates internal audits (Clause 9.2) and continual improvement (Clause 10.1) but doesnot define the specific audit term "observation." However, the audit framework in 9.2 requires an audit programme and impartial auditors, and management review inputs include "feedback on the information security performance including trends in... audit results" and "opportunities for continual improvement
." The companion implementation guidance (ISO/IEC 27002) reinforces the concept ofopportunities for improvementin the review of policies: "The reviews should include assessing opportunities for improvement and the need for changes to the approach to information security..." In practical ISO audit usage (aligned with ISO 19011 guidance referenced in the Study Guide), anobservationis a recorded conformity where improvement is advisable-commonly termed an Opportunity for Improvement (OFI). The Study Guide's internal audit section emphasizes running an audit programme to identify "potential areas of weakness or non-compliance," supporting the notion of recording improvement opportunities alongside nonconformities. Therefore, within ISO/IEC 27001 audit practice, the best-fit definition isB: a conformity where there is an opportunity for improvement.

NEW QUESTION # 34
Which action must top management take to provide evidence of its commitment to the establishment, operation and improvement of the ISMS?

- A. Producing a risk assessment report
- B. Communicating feedback from interested parties to the organization
- C. Implementing the actions from internal audits
- D. Ensuring information security objectives are established

Answer: D

Explanation:
Clause 5.1 (Leadership and Commitment) requires top management to demonstrate leadership by:
* "ensuring the information security policy and the information security objectives are established and are compatible with the strategic direction of the organization;"
* "ensuring the integration of the ISMS requirements into the organization's processes;"
* "ensuring that the resources needed for the ISMS are available;"
Among the options, the one explicitly mandated isensuring that information security objectives are established. Risk assessments (C) and implementing audit actions (D) are responsibilities of management but not the direct leadership evidence required in Clause 5.1. Communicating interested party feedback (A) is relevant but not specifically cited as leadership evidence. Thus, the verified answer isB.

NEW QUESTION # 35
Which item is required to be defined when planning the organization's risk assessment process?

- A. The parts of the ISMS scope which are excluded from the risk assessment
- B. There are NO specific information requirements
- C. The criteria for acceptable levels of risk
- D. How the effectiveness of the method will be measured

Answer: C

Explanation:
Clause 6.1.2 (Information security risk assessment) requires organizations to "define and apply an information security risk assessment process that... establishes and maintains information security risk criteria, including criteria for accepting risk." This means that acceptable levels of risk (risk acceptance criteria) must be explicitly defined. These criteria ensure consistent decision-making when evaluating whether identified risks need further treatment or can be tolerated.
Option A is incorrect because exclusions relate to the ISMS scope (Clause 4.3), not risk assessment planning.
Option B is not a requirement; effectiveness of risk assessment methods is not required to be measured, though methods must be applied consistently. Option D is false-the standard clearly specifies required elements for risk assessment.
Thus, the correct answer isC: The criteria for acceptable levels of risk.

NEW QUESTION # 36
