We can guarantee that the study materials from our company will help you pass the exam and get the certification in a relaxed and efficient method.

### CrowdStrike Certified Falcon Hunter Sample Questions (Q18-Q23):

#### NEW QUESTION # 18

Which of the following is a way to create event searches that run automatically and recur on a schedule that you set?

- A. Scheduled Searches
- B. Event Search
- C. Scheduled Reports
- D. Workflows

**Answer: A**

Explanation:

Scheduled Searches are a way to create event searches that run automatically and recur on a schedule that you set. You can use Scheduled Searches to monitor your environment for specific conditions or patterns, generate reports or alerts, or enrich your data with additional fields or tags. Workflows, Event Search, and Scheduled Reports are not ways to create event searches that run automatically and recur on a schedule.

#### NEW QUESTION # 19

What Search page would help a threat hunter differentiate testing, DevOPs, or general user activity from adversary behavior?

- A. Domain Search
- B. Hash Search
- C. IP Search
- D. User Search

**Answer: D**

Explanation:

User Search is a search page that allows a threat hunter to search for user activity across endpoints and correlate it with other events. This can help differentiate testing, DevOPs, or general user activity from adversary behavior by identifying anomalous or suspicious user actions, such as logging into multiple systems, running unusual commands, or accessing sensitive files.

#### NEW QUESTION # 20

Which threat framework allows a threat hunter to explore and model specific adversary tactics and techniques, with links to intelligence and case studies?

- A. Director of National Intelligence Cyber Threat Framework
- B. Lockheed Martin Cyber Kill Chain
- C. NIST 800-171 Cyber Threat Framework
- D. MITRE ATT&CK

**Answer: D**

Explanation:

MITRE ATT&CK is a threat framework that allows a threat hunter to explore and model specific adversary tactics and techniques, with links to intelligence and case studies. It is a knowledge base of adversary behaviors and tactics that covers various platforms, domains, and scenarios. It provides a common language and structure for threat hunters to understand and analyze threats, as well as to share findings and recommendations.

#### NEW QUESTION # 21

Which of the following best describes the purpose of the Mac Sensor report?

- A. The Mac Sensor report provides a detection focused view of known malicious activities occurring on Mac hosts, including machine-learning and indicator-based detections
- B. The Mac Sensor report displays a listing of all Mac hosts with a Falcon sensor installed
- C. The Mac Sensor report displays a listing of all Mac hosts without a Falcon sensor installed
- D. The Mac Sensor report provides a comprehensive view of activities occurring on Mac hosts, including items of interest that may be hunting or investigation leads

**Answer: D**

Explanation:

This is the correct answer for the same reason as above. The Mac Sensor report provides a comprehensive view of activities occurring on Mac hosts, including items of interest that may be hunting or investigation leads. It does not display a listing of all Mac hosts with or without a Falcon sensor installed, nor does it provide a detection focused view of known malicious activities occurring on Mac hosts.

#### NEW QUESTION # 22

With Custom Alerts you are able to configure email alerts using predefined templates so you're notified about specific activity in your environment. Which of the following outlines the steps required to properly create a custom alert rule?

- **A. Choose the template you would like to configure, preview the search results, and then schedule the alert**
- B. Choose the template you would like to configure, setup how often you would like the alert to run, and then schedule the alert
- C. Create the query for the alert, setup the email template for the alert, and then set the schedule for the alert
- D. Create a new custom template, configure the email template, and then create the custom query for the alert

**Answer: A**

Explanation:

These are the steps required to properly create a custom alert rule. Custom Alerts are a feature that allows you to configure email alerts using predefined templates so you're notified about specific activity in your environment. You can choose from various templates that cover different use cases, such as suspicious PowerShell activity, network connections to risky countries, etc. You can also preview the search results of the template before scheduling the alert. You do not need to create the query for the alert, setup the email template for the alert, or create a new custom template, as these are already provided by the predefined templates.

#### NEW QUESTION # 23

.....

For candidates who want to get the certificate of the exam, choosing a proper CCFH-202b learning material is important. We will provide you the CCFH-202b learning with high accuracy and high quality.
