- **B. Malware behavior detected by FortiClient EMS**
- C. Bulk firmware upgrades
- **D. IPS signature match on multiple packets**

Answer: B,D

NEW QUESTION # 120

Your office wants to set up a Wi-Fi network for visitors. Your company would like to require them to log in for (racking purposes.

Which two types of captive portals could be enabled on an interface? (Choose two.)

- A. Guest Pass Access
- **B. Terms Acknowledgment Without Authentication**
- C. Email Notification Only
- **D. Authentication**
- E. Disclaimer + Authentication

Answer: B,D

Explanation:

A FortiGate interface can operate with different types of captive portal modes.

The available portal types that require user interaction or login include:

#A. Terms Acknowledgment Without Authentication

* Forces users to accept terms before accessing the network

* No credentials required

* Still considered a captive portal. Common in guest Wi-Fi.

#E. Authentication

* Requires username/password

* Supports local users, RADIUS, LDAP, OAuth, etc.

Why the other options are incorrect

#B. Email Notification Only

Not a valid captive portal mode on FortiGate.

#C. Disclaimer + Authentication

This is not a selectable mode; disclaimers are part of the captive portal customization but not a standalone option.

#D. Guest Pass Access

Guest pass authentication exists on FortiAuthenticator, not as a direct portal type on FortiGate.
