NEW QUESTION # 58

Which of the following are valid options to speed up reports? (Select all the apply.)

- A. Edit description
- B. Edit permissions
- C. Edit schedule
- D. Edit acceleration

Answer: D

Explanation:

One of the valid options to speed up reports is to edit acceleration, which means that you can enable summary indexing or data model acceleration for your reports to improve their performance². Summary indexing allows you to create reports that run over large amounts of data by storing the results of scheduled searches in a summary index and using that index for faster reporting². Data model acceleration allows you to create reports that use data models by creating and storing summaries of the data model datasets and using them for faster reporting². Therefore, option C is correct, while options A, B and D are incorrect because they are not options to speed up reports.

NEW QUESTION # 59

Which of the following Statements about macros is true? (select all that apply)

- A. Arguments are defined when the macro is created.
- B. Argument values are used to resolve the search string at execution time.
- C. Argument values are used to resolve the search string when the macro is created.
- D. Arguments are defined at execution time.

Answer: A,B

Explanation:

A macro is a way to save a commonly used search string as a variable that you can reuse in other searches¹. When you create a macro, you can define arguments that are placeholders for values that you specify at execution time¹. The argument values are used to resolve the search string when the macro is invoked, not when it is created¹. Therefore, statements B and C are true, while statements A and D are false.

NEW QUESTION # 60
