* Understanding User Field Mapping Labels:

* User Field Mapping labels define how user data fields (e.g., User ID, name, department) are mapped between SAP SuccessFactors Learning and external systems (e.g., SAP SuccessFactors HCM) during data imports or integrations.

* Sources for Accepted User Field Mapping Labels:

* Connector Workbook (A):The Connector Workbook provides templates and mappings for user data imports, including accepted field labels.

"The Connector Workbook is a standardized template that defines accepted field mappings for user data imports, including User ID, job code, and other attributes. It is used to ensure data consistency during connector-based integrations" (SAP SuccessFactors Learning Admin Guide, Connectors).

* Connector Property File (B):The Connector Property file specifies configurations for connectors, including field mappings for user data.

"The Connector Property file (e.g., userConnector.properties) includes settings for field mappings, defining how user data fields are interpreted during imports or synchronizations" (SAP SuccessFactors Learning Admin Guide, System Configuration).

* How Field Mappings are Used:

* Administrators use the Connector Workbook to prepare user data files and the Connector Property file to configure how those fields are processed by the system. Both contain standardized labels for user fields.

* Extract from SAP SuccessFactors Learning Documentation (SAP Help Portal, Admin Guide, Data Integration):

"To map user fields during data imports, refer to the Connector Workbook for accepted labels and the Connector Property file for mapping configurations. These ensure that user data aligns with system requirements."

* Option C (Search Selector file):The Search Selector file is used for configuring search filters, not user field mappings.
