## **Three User-Friendly and Easy-to-Install ExamsTorrent C-S4CPB-2508 Exam Questions**

Practicing for an SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C-S4CPB-2508) exam is one of the best ways to ensure success. It helps students become familiar with the format of the actual C-S4CPB-2508 practice test. It also helps to identify areas where more focus and attention are needed. Furthermore, it can help reduce the anxiety and stress associated with taking an SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C-S4CPB-2508) exam as it allows students to gain confidence in their knowledge and skills.

### **SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q36-Q41):**

#### **NEW QUESTION # 36**

What can you do with the SAP for Me mobile app? Note: There are 2 correct answers to this question.

- A. Access the SAP ONE Support Launchpad
- B. Download learning content from SAP Learning Hub
- C. **Interact with SAP easily**
- D. Get full transparency into your SAP product portfolio

**Answer: C,D**

Explanation:

The SAP for Me mobile app allows you to easily interact with SAP anywhere and anytime. You can review and reply to SAP support cases, start a chat with an expert, monitor your SAP cloud service status, receive notifications about important events, and more. The app also provides you with full transparency into your SAP product portfolio, including your licenses, systems, users, orders, contracts, and invoices. You can view the details of each product and service, as well as access relevant resources and tools. #### **NEW QUESTION # 37**

Which of the following are captured in a completed Digital Discovery Assessment? Note: There are 2 correct answers to this question.

- A. **Business role requirements**
- B. SAP Fiori application extensions
- C. Target customer go-live date

- D. Known integration requirements

**Answer: A,D**

Explanation:

A completed Digital Discovery Assessment is a comprehensive evaluation conducted during the planning stages of an SAP S/4HANA Cloud Public Edition implementation. This assessment captures various critical aspects of the project to ensure a tailored and efficient approach. Two key elements captured in this assessment are 'Known integration requirements' and 'Business role requirements'. Understanding the integration requirements is essential for ensuring seamless connectivity and data flow between SAP S/4HANA Cloud and other systems. Identifying business role requirements is crucial for aligning the system's capabilities with the specific needs and responsibilities of different user groups within the organization. Both elements are pivotal for designing a solution that is both integrated and user-centric.

### NEW QUESTION # 38

How can you migrate data to SAP S/4HANA Cloud Public Edition? Note: There are 2 correct answers to this question.

- A. With a separate SAP HANA database
- B. With Core Data Services
- C. With the zero downtime service
- D. With XML or CSV templates

**Answer: A,D**

Explanation:

You can migrate data to SAP S/4HANA Cloud Public Edition using the SAP S/4HANA Migration Cockpit, a tool that provides multiple methods of migrating data from legacy systems, SAP or non-SAP, to the target system. The SAP S/4HANA Migration Cockpit supports the following migration methods:

\* With XML or CSV templates: You can use predefined templates in XML or CSV format to fill in your source data and upload them to the staging tables in the SAP S/4HANA Cloud system. The templates are based on the predefined migration objects that cover the most common business data, such as master data, transaction data, and configuration data. You can download the templates from the SAP S/4HANA Migration Cockpit or from the SAP Best Practices Explorer.

\* With a separate SAP HANA database: You can use a separate SAP HANA database as a staging area to store your source data and transfer it to the SAP S/4HANA Cloud system. You can use any tool or method to extract your source data from your legacy system and load it to the SAP HANA database.

You can also use the predefined migration objects or create your own custom objects using the migration object modeler.

\* Directly from an SAP ERP system: You can connect your SAP ERP system to the SAP S/4HANA Cloud system and transfer your source data directly without using a staging area. You can use the predefined migration objects or create your own custom objects using the migration object modeler.

This method requires the installation of the SAP S/4HANA Migration Cockpit add-on in your SAP ERP system.

The other two options, with the zero downtime service and with Core Data Services, are not valid methods of migrating data to SAP S/4HANA Cloud Public Edition. The zero downtime service is a tool that enables you to upgrade your SAP S/4HANA system with minimal downtime, but it is not used for data migration. Core Data Services (CDS) are a set of domain-specific languages and services for defining and consuming semantically rich data models, but they are not used for data migration. References = Migrating Data to SAP S/4HANA Cloud, Public Edition, Migrating Data with the SAP S/4HANA Migration Cockpit, Zero Downtime Service for SAP S/4HANA, Core Data Services (CDS)

### NEW QUESTION # 39

If a customer wants to develop their own custom application and integrate it with SAP S/4HANA Cloud Public Edition, what tools would you recommend to develop the app? Note: There are 2 correct answers to this question.

- A. SAP HANA Cloud
- B. SAP Build
- C. SAP Business Application Studio
- D. SAP Cloud Portal Service

**Answer: B,C**

#### Explanation:

SAP Business Application Studio and SAP Build are two tools that enable customers to develop their own custom applications and integrate them with SAP S/4HANA Cloud Public Edition. SAP Business Application Studio is a cloud-based development environment that offers both low-code and full-stack development capabilities. It supports various SAP technologies and frameworks, such as SAP Fiori, SAPUI5, SAP Cloud Application Programming Model, and SAP Cloud SDK. SAP Build is a cloud-based prototyping and user research tool that helps customers to design and test user interfaces for their applications. It provides a drag- and-drop interface, a library of UI components, and integration with SAP Web IDE and SAP Fiori Launchpad. Both tools are part of the SAP Extension Suite, which provides a range of services and capabilities to extend SAP applications and processes. References = Create a SAP Fiori App and Deploy it to SAP S/4HANA Cloud > Create a SAP Fiori App and Deploy it to SAP S/4HANA Cloud. Create a SAP Fiori App and Deploy it to SAP S/4HANA Cloud > Create a SAP Fiori App and Deploy it to SAP S/4HANA Cloud. Low-code/No-code | SAP Developers.

#### NEW QUESTION # 40

In which application can you see the available business context capacity remaining for extension items?

- A. Extensibility Cockpit app
- B. Extensibility Inventory app
- C. Custom Reusable Elements app
- D. Extensibility Explorer app

**Answer: A**

#### NEW QUESTION # 41
