AI-102 Latest Test Questions, Real AI-102 Testing Environment

The Designing and Implementing a Microsoft Azure AI Solution (AI-102) PDF dumps are suitable for smartphones, tablets, and laptops as well. So you can study actual Designing and Implementing a Microsoft Azure AI Solution (AI-102) questions in PDF easily anywhere. Prep4away updates Designing and Implementing a Microsoft Azure AI Solution (AI-102) PDF dumps timely as

per adjustments in the content of the actual Microsoft AI-102 exam.

Microsoft Designing and Implementing a Microsoft Azure AI Solution Sample Questions (Q61-Q66):

NEW QUESTION # 61
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 62
You are building an app that will share user images.
You need to configure the app to meet the following requirement's
* uploaded images must be scanned and any text must be extracted from the images.
* Extracted text must be analyzed for the presence of profane language.
* The solution must minimize development effort.
what should you use for each requirement? To answer, select the apocopate opinions in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:
Text Extraction: b) Computer Vision
Computer Vision is a service that can analyze images and extract text from them using optical character recognition (OCR) or read API1. OCR can detect and extract printed or handwritten text from images in various languages and formats, such as PDF, TIFF, or JPEG2. Read API can perform asynchronous batch processing of text from multiple images, and can also handle text in tables, mixed languages, and rotated text3.
Profane Language Detection: c) Content Moderator
Content Moderator is a service that can detect and filter out potentially offensive or unwanted content in text, images, and videos. For text, Content Moderator can identify profane or abusive language, personal data, and custom terms that you define. You can also use Content Moderator to review and moderate the content manually or automatically using workflows.

NEW QUESTION # 63
SIMULATION
You need to configure and publish bot12345678 to answer questions by using the frequently asked questions (FAQ) located at https://docs.microsoft.com/en-us/ azure/bot-service/bot- service-resources-bot-framework-faq. The solution must use bot%@lab.LabInstance.Id-qna- qna%.
To complete this task, use the Microsoft Bot Framework Composer.

Answer:

Explanation:
Step 1: Open Microsoft Bot Framework Composer
Step 2: Select the bot bot12345678
Step 3: Open the Configure page in Composer. Then select the Development resources, and scroll down to Azure QnA Maker.
Step 4: To access the Connect to QnA Knowledgebase action, you need to select + under the node you want to add the QnA knowledge base and then select Connect to QnAKnowledgeBase from the Access external resources action menu.
Step 5: Review the QnA Maker settings panel after selecting the QnA Maker dialog.
Use:
Instance: bot%@lab.LabInstance.Id-qna-qna%
Reference:
https://docs.microsoft.com/en-us/composer/how-to-create-qna-kb
https://docs.microsoft.com/en-us/composer/how-to-add-qna-to-bot

NEW QUESTION # 64

You have an Azure subscription that contains an Azure OpenAI resource named AM.

You build a chatbot that uses All to provide generative answers to specific questions.

You need to ensure that questions intended to circumvent built-in safety features are blocked.

Which Azure Al Content Safety feature should you implement?

- A. Moderate text content
- B. Monitor online activity
- C. Jailbreak risk detection
- D. Protected material text detection

Answer: C

Explanation:

* The requirement: Ensure the chatbot blocks questions that attempt to circumvent built-in safety features.

* This is known as a jailbreak attempt (e.g., prompt injection, role-play tricking).

* Azure AI Content Safety recently added Jailbreak risk detection for precisely this purpose.

* Other options:

* Protected material detection # for copyright/IP detection.

* Monitor online activity # not related to OpenAI safety.

* Moderate text content # general harmful content moderation (violence, hate, sexual, self-harm), but not jailbreaks.

Microsoft Reference:

Azure AI Content Safety jailbreak risk detection

NEW QUESTION # 65

Case Study 1 - Wide World Importers

Overview

Existing Environment

A company named Wide World Importers is developing an e-commerce platform.

You are working with a solutions architect to design and implement the features of the e- commerce platform. The platform will use microservices and a serverless environment built on Azure.

Wide World Importers has a customer base that includes English, Spanish, and Portuguese speakers.

Applications

Wide World Importers has an App Service plan that contains the web apps shown in the following table.

Azure Resources

You have the following resources:

* An Azure Active Directory (Azure AD) tenant

- The tenant supports internal authentication.

- All employees belong to a group named AllUsers.

- Senior managers belong to a group named LeadershipTeam.

* An Azure Functions resource

- A function app posts to Azure Event Grid when stock levels of a product change between OK, Low Stock, and Out of Stock.

The function app uses the Azure Cosmos DB change feed.

* An Azure Cosmos DB account

- The account uses the Core (SQL) API.

- The account stores data for the Product Management app and the Inventory Tracking app.

* An Azure Storage account

- The account contains blob containers for assets related to products.

- The assets include images, videos, and PDFs.

* An Azure AI Services resource named wwics

* An Azure Video Analyzer for Media (previously Video Indexer) resource named wwivi

Requirements

Business Goals

Wide World Importers wants to leverage AI technologies to differentiate itself from its competitors.

Planned Changes

Wide World Importers plans to start the following projects:

* A product creation project: Help employees create accessible and multilingual product entries,

while expediting product entry creation.

* A smart e-commerce project: Implement an Azure AI Search solution to display products for customers to browse.
* A shopping on-the-go project: Build a chatbot that can be integrated into smart speakers to support customers.

Business Requirements

Wide World Importers identifies the following business requirements for all the projects:

* Provide a multilingual customer experience that supports English, Spanish, and Portuguese.

* Whenever possible, scale based on transaction volumes to ensure consistent performance.

* Minimize costs.

Governance and Security Requirements

Wide World Importers identifies the following governance and security requirements:

* Data storage and processing must occur in datacenters located in the United States.

* Azure AI Services must be inaccessible directly from the internet.

Accessibility Requirements

Wide World Importers identifies the following accessibility requirements:

* All images must have relevant alt text.

* All videos must have transcripts that are associated to the video and included in product descriptions.

* Product descriptions, transcripts, and all text must be available in English, Spanish, and Portuguese.

Product Creation Requirements

Wide World Importers identifies the following requirements for improving the Product Management app:

* Minimize how long it takes for employees to create products and add assets.

* Remove the need for manual translations.

Smart E-Commerce Requirements

Wide World Importers identifies the following requirements for the smart e-commerce project:

* Ensure that the Azure AI Search solution meets a Service Level Agreement (SLA) of 99.9% availability for searches and index writes.

* Provide users with the ability to search insight gained from the images, manuals, and videos associated with the products.

* Support autocompletion and autosuggestion based on all product name variants.

* Store all raw insight data that was generated, so the data can be processed later.

* Update the stock level field in the product index immediately upon changes.

* Update the product index hourly.

Shopping On-the-Go Requirements

Wide World Importers identifies the following requirements for the shopping on-the-go chatbot:

* Answer common questions.

* Support interactions in English, Spanish, and Portuguese.

* Replace an existing FAQ process so that all Q&A is managed from a central location.

* Provide all employees with the ability to edit Q&As. Only senior managers must be able to publish updates.

* Support purchases by providing information about relevant products to customers. Product displays must include images and warnings when stock levels are low or out of stock.

Product JSON Sample

You have the following JSON sample for a product.

Hotspot Question

You are planning the product creation project.

You need to build the REST endpoint to create the multilingual product descriptions.

How should you complete the URI? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: api-nam.cognitive.microsofttranslator.com

The case study specifically states under Business Requirements "Data storage and processing must occur in datacenters located in the United States." Box 2: /translate Reference:
