#### NEW QUESTION # 135

Northern Trail Outfitters has many users set up as system administrators to perform Salesforce Administration.

Which two functions would a delegated administrator be able to perform in order to help the existing Salesforce Administrator?

Choose 2 answers

- A. Configure updates to sharing rules.
- B. Make updates to permission set configurations.
- C. Set up users and password management.
- D. Manage custom objects and customize nearly every aspect.

**Answer: B,C**

Explanation:

A delegated administrator is a user who has been granted limited administrative privileges by an administrator through delegated administration groups. Delegated administrators can perform some administrative tasks without having full access to Setup.

Some functions that delegated administrators can perform are:

\* A) Set up users and password management.

Delegated administrators can set up and manage users who belong to specified roles or territories, including creating, editing, freezing, and unlocking users; resetting passwords; assigning permission sets; and managing public groups. References:

\* D) Make updates to permission set configurations

Permission sets are collections of settings and permissions that can extend users' functional access without changing their profiles.

Delegated administrators can make updates to permission set configurations if they have been granted access to manage users by an administrator. References:
