

퍼펙트한 C-ACDET-2506 시험패스보장덤프 인증 공부자료

BONUS!!! Fast2test C-ACDET-2506 시험 문제집 전체 버전을 무료로 다운로드하세요: https://drive.google.com/open?id=1n3Lpo-llHGduM1GTP3DG9RZxqy7hK7q_

제일 간단한 방법으로 가장 어려운 문제를 해결해드리는 것이 Fast2test의 취지입니다. SAP인증 C-ACDET-2506 시험은 가장 어려운 문제이고 Fast2test의 SAP인증 C-ACDET-2506 덤프는 어려운 문제를 해결할 수 있는 제일 간단한 공부 방법입니다. Fast2test의 SAP인증 C-ACDET-2506 덤프로 시험 준비를 하시면 아무리 어려운 SAP인증 C-ACDET-2506 시험도 쉬워집니다.

SAP C-ACDET-2506 인증 시험을 패스하고 자격증 취득으로 하여 여러분의 인생은 많은 인생역전이 이루어질 것입니다. 회사, 생활에서는 물론 많은 업그레이드가 있을 것입니다. 하지만 C-ACDET-2506 시험은 SAP인증의 아주 중요한 시험으로서 C-ACDET-2506 시험 패스는 쉬운 것도 아닙니다.

최신 업데이트 버전 C-ACDET-2506 시험패스보장덤프 시험자료

SAP C-ACDET-2506 인증덤프가 Fast2test 전문가들의 끈임 없는 노력 하에 최고의 버전으로 출시되었습니다. 여러분의 꿈을 이루어드리려고 말이지요. IT 업계에서 자기만의 자리를 잡고 싶다면 SAP C-ACDET-2506 인증 시험이 아주 좋은 자격증입니다. 만약 SAP C-ACDET-2506 인증 시험 자격증이 있다면 일에서도 많은 변화가 있을 것입니다, 연봉상

승은 물론, 자기자신만의 공간도 넓어집니다.

SAP C-ACDET-2506 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none">• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
주제 2	<ul style="list-style-type: none">• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.
주제 3	<ul style="list-style-type: none">• Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

최신 SAP Certified Associate C-ACDET-2506 무료샘플문제 (Q23-Q28):

질문 # 23

What actions can typically be performed on existing fields? (Select 3 correct answers)

- **A. Make the field mandatory**
- **B. Add a Visibility, Editability, or Validity Condition**
- C. Change the field type
- D. Change the internal name
- **E. Change the help tip**

정답: A,B,E

설명:

In SAP Ariba, existing fields can be made mandatory by setting the Required property, help tips can be edited to clarify field usage, and visibility, editability, and validity conditions can be added or modified to control when and how fields appear or accept values. However, the internal field name is immutable once the field is created, and the field data type cannot be changed post-creation. These restrictions ensure system consistency and prevent data corruption. These limitations are well documented in SAP Ariba configuration best practices.

질문 # 24

While working on editing a field for a customer, you notice that "Editable in full Contract Amendment" is not an option available in the advanced tab of field configuration. What is likely the cause for this behavior? (Select 2 correct answers)

- **A. The contract must be in an amendment state for this option to be visible in customizing.**
- B. The field you are customizing is standard and therefore cannot be changed.
- **C. The field you are customizing is not in the contract workspace or request classes.**
- D. A customization is in flight and needs to be cleared and reset prior to making this change.

정답: A,C

설명:

The "Editable in full Contract Amendment" option in SAP Ariba is available only when the contract is in an amendment status, meaning this option appears contextually when the contract supports amendment workflows. If the contract is not in amendment state, the option remains hidden (A).

Additionally, this option is only relevant for fields that belong to the Contract Workspace or Request field classes; fields outside these classes will not show amendment-specific editability options (C).

The presence or absence of this option is not related to ongoing customizations needing reset (B), nor is it restricted solely to custom or standard fields (D), as standard fields can also have this option if class- applicable.

질문 # 25

The full SAP Ariba Strategic Sourcing suite baseline (Greenfield baseline scenario) has been applied to the customer Test site. The customer and project team will configure SAP Ariba Sourcing and deploy that to the Production site, then configure and deploy the remaining solutions in stages. What does this mean for subsequent migration activities?

- A. Subsequent migration activities follow Bluefield deployment scenario.
- B. Both SAP Ariba Sourcing as well as subsequent migration activities would be Brownfield deployments.
- C. If the baseline applied the full suite, the full suite must be configured and migrated to production at the same time.
- D. Subsequent migration activities will require a complete reconfiguration of existing solutions.

정답: A

설명:

In SAP Ariba deployments, when a full Greenfield baseline has been applied initially—meaning a fresh, full suite setup on the Test site—and the customer deploys a single solution (like Sourcing) to Production first, all subsequent deployments follow a Bluefield scenario. This means that later stages of deployment (e.g., Contracts, Supplier Risk) involve selective migration and incremental configuration changes to Production without rebuilding everything from scratch. Bluefield scenarios specifically accommodate environments where Production may already be live with transactions, requiring careful selective migration to avoid disruption. This contrasts with Brownfield, which typically involves upgrading or reusing existing deployments without full baseline resets. Also, Greenfield deployments do not require all suite components to migrate simultaneously; phased deployments are supported.

This approach ensures minimal risk during deployment and provides flexibility to roll out additional modules progressively.

Extract summary: SAP Ariba documentation highlights Bluefield for phased, incremental deployments post Greenfield baseline application to accommodate live production environments.

질문 # 26

How do you format the Help Tip for a field?

- A. Select Field Configuration and edit the field. In the Help Tip, you can only use plain text without any formatting options.
- B. Select Field Configuration, select the class, and edit the field. In the Help Tip, you can add standard HTML tags for formatting
- C. Select Field Configuration and edit the field. In the Help Tip, you can format the text by using the mouse to highlight the text and then right-clicking to access formatting options.
- D. Select Field Configuration, select the class, and edit the field. In the Help Tip, you can format the text by selecting the string and use regular keyboard controls such as Ctrl-I, Ctrl-b

정답: B

질문 # 27

Who leads Suite Integration activities?

- A. Customer Success Manager
- B. SAP Support
- C. SAP Deployment Lead
- D. Partner/Customer Functional Lead

정답: C
