ED-Con-101 Hot Spot Questions, Reliable ED-Con-101 Test Price

So we are looking forward to establishing a win-win relation with you by our ED-Con-101 training engine. In our trade with merchants of various countries, we always adhere to the principles of mutual benefits rather than focusing solely on our interests on the ED-Con-101 Exam Questions. So our aim is to help our customers to pass the ED-Con-101 exam as easy as possible. We have invested a lot on the compiling the content of the ED-Con-101 study materials and want to be the best.

Salesforce Certified Education Cloud Consultant Sample Questions (Q115-Q120):

NEW QUESTION # 115

A system admin has an idea for a custom solution for their org and thinks it might be useful to others as well. The system admin discusses it with colleagues from two other schools. They are excited about the system admin's idea and offer to help. What should the system admin consider doing as a next step?

- A. Post the idea in the Trailblazer Idea Exchange.
- B. Ask colleagues to sign a nondisclosure agreement.
- C. Join the Open Source Commons & Community Sprints group
- D. Download and install the project from GitHub.

Answer: C

Explanation:

The system admin should consider joining the Open Source Commons & Community Sprints group in the Power of Us Hub as a next step for their custom solution idea. The Open Source Commons & Community Sprints group is a group that connects users who are interested in contributing to or learning from open source projects that are supported by Salesforce.org. The Open Source Commons & Community Sprints group provides access to resources, events, discussions, and opportunities related to various open source projects, such as EDA, NPSP, CumulusCI, or Metecho. The system admin can join the group and share their idea with other users who may want to collaborate on it or provide feedback. Posting the idea in the Trailblazer Idea Exchange, downloading and installing the project from GitHub, or asking colleagues to sign a nondisclosure agreement are not next steps that the system admin should consider for their custom solution idea. NEW QUESTION # 116

Advisors at a university send follow-up emails to each of their assigned students. The advisors want to use Student Success Hub to enable this process.

Which solution should a consultant implement?

- A. Queue Management
- B. Alerts
- **C. Mass Actions**

Answer: C

Explanation:

Mass Actions allow advisors to send follow-up emails to multiple students at once from the Student Success Hub. Queue Management is a feature that helps advisors prioritize their tasks and appointments, not send emails. Alerts are notifications that appear on the Student Success Hub to inform advisors of important events or actions, not send emails. Reference:

https://help.salesforce.com/s/articleView?id=sf.advisor_link_mass_actions.htm&type=5

https://help.salesforce.com/s/articleView?id=sf.advisor_link_queue_management.htm&type=5

https://help.salesforce.com/s/articleView?id=sf.advisor_link_alerts.htm&type=5

NEW QUESTION # 117

An elementary school district has evaluated Nonprofit Success Pack and now wants to evaluate the K-12 Architecture Kit.

Which action should the consultant take?

- A. Install the K-12 Architecture Kit from the AppExchange.
- B. Start a new K-12 Architecture Kit trial.
- **C. Install the K-12 Architecture Kit from GitHub.**
- D. Make K-12 Architecture Kit record types available to profiles.

Answer: C

Explanation:

The consultant should install the K-12 Architecture Kit from GitHub to evaluate it for the school district. GitHub is a platform that hosts code repositories and allows users to collaborate on software development projects. The K-12 Architecture Kit is a solution that extends EDA to meet the needs of K-12 schools. The K-12 Architecture Kit provides objects and features to track student information, such as grades, attendance, and program enrollments. The K-12 Architecture Kit is not available on the AppExchange, but rather on GitHub as an open source project that users can install and customize. Installing the K-12 Architecture Kit from the AppExchange, starting a new K-12 Architecture Kit trial, or making K-12 Architecture Kit record types available to profiles are not actions that the consultant can take to evaluate it for the school district. NEW QUESTION # 118

The Alumni Association is interested in using Education Cloud to support its operations. The Association tracks what engages alumni

and their hobbies.

Which Education Cloud feature should the consultant recommend?

- A. Interest Tags
- B. Relationships
- C. Activity Timeline

Answer: A

Explanation:

Tracking Engagement and Hobbies:

Interest Tags in Education Cloud allow the tracking of specific interests and hobbies of alumni.

This feature helps in understanding what engages alumni and can be used to tailor communications and activities.

Setting Up Interest Tags:

Define Interest Tags: Create tags that represent different interests and hobbies.

Assign Tags: Assign these tags to alumni based on their interests and engagement history.

Utilizing Interest Tags:

Segmentation: Use Interest Tags to segment alumni for targeted communications and events.

Personalized Outreach: Tailor outreach efforts based on the specific interests and hobbies tracked by the tags.

Implementation Steps:

Configure Tags: Set up and define the tags in the system.

Data Entry: Tag alumni with the appropriate interests.

Analyze Engagement: Use reports and analytics to understand the impact of interest-based engagement.

Reference:

Salesforce Education Cloud Documentation: Interest Tags

NEW QUESTION # 119

A consultant is working with a university that uses Salesforce and wants to install the Education Data Architecture (EDA) in that environment.

What does the consultant need to do after installing EDA to ensure it is set up correctly?

- A. Create and assign roles to all users who have access to EDA.
- B. Assign EDA access to a cloned System Admin profile.
- C. Assign EDA layouts to the Cases object.
- D. Make the EDA record types available to profiles.

Answer: D

Explanation:

After installing EDA, the consultant needs to make the EDA record types available to profiles that need to access them. This is because EDA comes with several custom record types for standard objects, such as Account, Contact, Course, and Program Enrollment. These record types enable different views and fields for different types of records, such as Household, Student, Faculty, Course Offering, and Program Enrollment. By default, these record types are not assigned to any profiles, so the consultant needs to manually assign them to the appropriate profiles based on the business requirements and user roles of the university. This will ensure that the users can see and use the EDA record types and fields correctly and efficiently. Reference: Education Data Architecture Basics, Assign Record Types to Profiles

NEW QUESTION # 120

.....

We know that time is really important to you. So that as long as we receive you email or online questions about our ED-Con-101 study materials, then we will give you information as soon as possible.
