

Pass Guaranteed Quiz 2026 Cisco First-grade 350-901: Test Developing Applications using Cisco Core Platforms and APIs (DEVCOR) Questions Fee

BONUS!!! Download part of PDFBraindumps 350-901 dumps for free: <https://drive.google.com/open?id=1oaqEjfgBmSyxZQaCeXQ4Ypl5jlpTxSn>

There is no doubt that our Developing Applications using Cisco Core Platforms and APIs (DEVCOR) guide torrent has a higher pass rate than other study materials. We deeply know that the high pass rate is so important for all people, so we have been trying our best to improve our pass rate all the time. Now our pass rate has reached 99 percent. If you choose our 350-901 study torrent as your study tool and learn it carefully, you will find that it will be very soon for you to get the Developing Applications using Cisco Core Platforms and APIs (DEVCOR) certification in a short time. Do not hesitate and buy our 350-901 test torrent, it will be very helpful for you.

The most notable feature of our 350-901 learning quiz is that they provide you with the most practical solutions to help you learn the exam points of effortlessly and easily, then mastering the core information of the certification course outline. Their quality of our 350-901 Study Guide is much higher than the quality of any other materials, and questions and answers of 350-901 training materials contain information from the best available sources.

350-901 Reliable Test Review & 350-901 Customized Lab Simulation

Just look at the text version of the introduction, you may still be unable to determine whether this product is suitable for you, or whether it is worth your purchase. We are very fond of preparing trial versions of our 350-901 study materials for you so that you can have a clearly check on not only the content of the 350-901 Exam Braindumps, but also the displays. The content of the trial version is a small part of our 350-901 practice questions, and it is easy and convenient to free download.

Cisco Developing Applications using Cisco Core Platforms and APIs (DEVCOR) Sample Questions (Q214-Q219):

NEW QUESTION # 214

Which interface provides an IOx application on a Catalyst 9000 Series switch access to the network?

- A. AppLoopback 1
- B. AppGigabitEthernet 1/0/1
- C. Loopback 1
- D. GigabitEthernet 1/0/1

Answer: B

Explanation:

The AppGigabitEthernet interface provides IOx applications on a Catalyst 9000 Series switch with access to the network. These interfaces are specifically designed for applications running on the switch and offer a way to connect the app to the network infrastructure.

NEW QUESTION # 215

Refer to the exhibit. A network engineer creates a Python script to retrieve the Cisco Meraki organizations that are associated with their API key. The script fails occasionally, but the engineer cannot determine the cause of the problem. Which code snippet must be placed in the blank in the code to implement error handling?

```
import requests
api_key = "3d652b9f7ab7502345"
base_url = "https://api.meraki.com"
headers = {
    "X-Cisco-Meraki-API-Key": api_key,
    "Content-Type": "application/json"
}

response = requests.get(f'{base_url}/api/v1/organizations', headers=headers)

print(f'There was a Server error: {response.status_code}')
else:
    print(f'There was an unknown error: {response.status_code}')
```

```
if response.status_code == codes.all_good:
    print(response.text)
if response.status_code == codes.all_bad:
```

• A.

```
if response.status_code == requests.codes.all_good:
    print(response.text)
elif response.status_code ==
requests.codes.bad_gateway:
```

• B.

```
elif response.status_code ==
requests.codes.bad_gateway:
    print(response.text)
elif response.status_code ==
requests.codes.bad_gateway:
```

• C.

```
if response.status_code == requests.codes.all_good:
    print(response.text)
if response.status_code == 501:
```

• D.

Answer: B

Explanation:

The Python script retrieves data from the Cisco Meraki API and requires proper error handling for HTTP response codes. The correct approach is to:

1. Check for a successful response (200 OK) and print the data.

2. Handle server errors (502 Bad Gateway), which may indicate an issue with Meraki's servers.
3. Handle other unknown errors by logging them.

NEW QUESTION # 216

```
response = requests.get(url)
if response.status_code != 200:
    error_message = "Unexpected HTTP Response code: {}".format(response.status_code)
    raise Exception(error_message)
data = response.json()
```

Refer to the exhibit. This snippet of a script has recently started exiting abnormally with an exception stating "Unexpected HTTP Response code: 429".

Which solution handles rate limiting by the remote API?

- A.

```
response = requests.get(url)
if response.status_code != 200 and response.status_code != 429:
    error_message = "Unexpected HTTP Response code: {}".format(response.status_code)
    raise Exception(error_message)
data = response.json()
```

- B.

```
response = requests.get(url)
if response.status_code != 200 and response.status_code != 429:
    backoff_seconds = int(response.headers['Retry-After'])
    sleep(backoff_seconds)
    error_message = "Unexpected HTTP Response code: {}".format(response.status_code)
    raise Exception(error_message)
data = response.json()
```

- C.

```
response = requests.get(url)
if response.status_code == 429:
    backoff_seconds = int(response.headers['Retry-After'])
    sleep(backoff_seconds)
elif response.status_code != 200:
    error_message = "Unexpected HTTP Response code: {}".format(response.status_code)
    raise Exception(error_message)
data = response.json()
```

- D.

```
response = requests.get(url)
if response.status_code == 429:
    backoff_seconds = int(response.headers['Retry-After'])
    sleep(backoff_seconds)
    response = requests.get(url)
elif response.status_code != 200:
    error_message = "Unexpected HTTP Response code: {}".format(response.status_code)
    raise Exception(error_message)
data = response.json()
```

Answer: D

Explanation:

Section: Using APIs

NEW QUESTION # 217

Refer to the exhibit.

Description

The addNetworkObject operation handles configuration related to [NetworkObject](#) model. This API call is not allowed on the standby unit in an HA pair.

HTTP request

URL

```
POST /api/fdm/v4/object/networks
```

Data Parameters

Parameter	Required	Type	Description
name	True	string	A string that is the name of the network object.
description	False	string	A string containing the description information. Field level constraints: length must be between 0 and 200 (inclusive). (Note: Additional constraints might exist)
subType	True	string	An enum value that specifies the network object type. HOST - A host type. NETWORK - A network type. FQDN - A FQDN type. RANGE - A range type. Field level constraints: cannot be null. (Note: Additional constraints might exist)
value	True	string	A string that defines the address content for the object. For HOST objects, this is a single IPv4 or IPv6 address without netmask or prefix. For NETWORK objects, this is an IPv4 or IPv6 network address with netmask (in CIDR notation) or prefix. For FQDN objects, this is a Fully qualified domain name. For RANGE objects, this is IPv4 or IPv6 addresses separated by '-'. Field level constraints: cannot be null, must match pattern ^((?!:).)*\$ (Note: Additional constraints might exist)
isSystemDefined	False	boolean	A Boolean value. TRUE or FALSE(the default). The TRUE value indicated that this Network object is a system defined object.
dnsResolution	False	string	DNS Resolution type can be IPV4_ONLY, IPV6_ONLY or IPV4_AND_IPV6.
type	True	string	A UTF8 string, all letters lower-case, that represents the class-type. This corresponds to the class name.

```
curl -X <item 1> -H "Authorization: Bearer exwsxads-sadads0as0d0-1w-1-1w-1w" --header 'Content-Type: application/json' --header 'Accept: application/json' -d '{
  "name": "171.168.1.z",
  "value": "<item 2>",
  "subType": "<item 3>",
  "type": "<item 4>"
}' 'https://ast0072-pod.cisco.com:33333/api/fdm/v4/object/<item 5>
```

Drag and drop the code snippets from the left onto the item numbers on the right that match the missing sections in the cURL exhibit to complete the cURL request to FirePower Device Manager API to create objects. Not all code snippets are used.

HOST

POST

NEW QUESTION # 218

Refer to the exhibit.

```

1 root@ci-job-1:/job-6768# pytest --verbose src/
2 bash: pytest: command not found
  
```

Refer to the exhibit. An engineer is setting up a CI/CD pipeline for a new application that depends on other services. The services must be prepared beforehand. Build dependencies must be installed by the pipeline. One of the pipeline stages fails. What is the cause of the issue?

- A. A package is missing.
- B. The dependent services are not ready.
- C. The CI syntax is invalid.
- D. The unit test failed.

Answer: A

NEW QUESTION # 219

.....

The world is a stage. We must seize all opportunities for career progression and to actualize our dream. So, you must seize PDFBraindumps to undersell yourself in the future. PDFBraindumps Cisco 350-901 study guide will help you to overcome difficulties and to get the certification. We will help you to understand the laws of 350-901 Exam. PDFBraindumps provides original questions and pdf real questions and answers. If you get the certification, you will rise to undreamed-of heights.

350-901 Reliable Test Review: https://www.pdfbraindumps.com/350-901_valid-braindumps.html

Cisco Test 350-901 Questions Fee Since we have business connections all over the world, our customers are from different countries, in order to provide after sale service for all of our customers, we will offer after sale service in twenty four hours a day, seven days a week, so you can feel free to contact with our after sale service staffs at any time, Cisco Test 350-901 Questions Fee It is our responsibility to aid you through those challenges ahead of you.

These sprints/rallies are work sessions and are usually limited to a group of Valid 350-901 Study Plan Canonical, Ltd, In this particular case, the form is drawing its information from the Employees table, which you saw when you clicked the Tables shortcut.

Test 350-901 Questions Fee - Cisco 350-901 Reliable Test Review: Developing Applications using Cisco Core Platforms and APIs (DEVCOR) Pass for Sure

Since we have business connections all over the world, 350-901 our customers are from different countries, in order to provide after sale service for all of our customers, we will offer after sale service in twenty four hours Test 350-901 Questions Fee a day, seven days a week, so you can feel free to contact with our after sale service staffs at any time.

It is our responsibility to aid you through Valid 350-901 Study Plan those challenges ahead of you, They are in fact meant to provide

you the opportunity to revise your learning and overcome your 350-901 exam fear by repeating the practice tests as many times as you can.

In addition, we provide one year service warranty for Cisco 350-901 exams cram, As we all know, there are some difficulty and obstacles for getting the 350-901 exam certification.
