## Splunk Cloud Certified Admin Sample Questions (Q47-Q52):

#### NEW QUESTION # 47

Where can an administrator download the Splunk Cloud Universal Forwarder credentials package?

- A. Universal Forwarder app in the Splunk Cloud search head.
- B. Splunkbase.
- C. Cloud Monitoring Console forwarder drop-down.
- D. Splunk Support.

**Answer: A**

Explanation:

Explanation: The Universal Forwarder credentials package is available in the Splunk Cloud search head's Universal Forwarder app for secure, managed deployment. [Reference: Splunk Docs on Universal Forwarder credentials package]

#### NEW QUESTION # 48

Which Windows-specific input type allows Splunk software to read special Windows log files such as the DNS debug server log?

- A. Windows Event Log
- B. Windows Registry
- C. MonitorNoHandle
- D. Windows Management Instrumentation (WMI)

**Answer: C**

#### NEW QUESTION # 49

What is the name of the Splunk index that contains the most valuable information for troubleshooting a Splunk issue?

- A. \_internal
- B. lastchanceindex
- C. defaultdb
- D. \_monitoring

**Answer: A**

#### NEW QUESTION # 50

Which of the following tasks is the responsibility of a Splunk Cloud administrator?

- A. Configuring indexes
- B. Configuring cluster master
- C. Configuring indexers
- D. Configuring deployer

**Answer: A**

Explanation:

In Splunk Cloud, configuring indexes is one of the primary responsibilities of a Splunk Cloud administrator.

This task includes setting up new indexes, managing retention policies, and configuring index settings as required by the organization's data retention and compliance policies. Other tasks like configuring deployer, cluster master, or indexers are typically handled by Splunk Enterprise administrators, not Splunk Cloud administrators.
