- A. **Translations are included in migrations and are listed as AMLStringResource in the migration**
- B. Create a package to migrate translations by ICM.
- C. Contact an SAP Deployment lead for customization help.
- D. User with Partner Administrator can configure translation.

Answer: A

NEW QUESTION # 32

Which scenarios are applicable when moving templates from the test site to the production site by Intelligent Configuration Manager (ICM)? (Select 2 correct answers)

- A. **Draft templates on the source site are skipped.**
- B. Published templates with flex master data references in the test site are migrated to the production site during the first migration attempt.
- C. Batch imports are available for templates when migrating configuration bundles.
- D. **New templates that successfully migrated to the production site are in Draft state.**

Answer: A,D

Explanation:

ICM only migrates published templates; draft templates are skipped (A). When templates are imported into production, they arrive in draft state by default to allow review and publishing before use (C). Batch imports for templates (B) are not supported; migration is typically handled per template. Flex master data references require manual migration steps and are not migrated automatically during the initial template transfer (D).
